# *Preface*

## **THIS MANUAL**

The Programming Manual provides the technician with all of the necessary information for programming the UNIVERGE SV8100 system.

Programming can be accomplished using a PC or a Multiline Terminal.

## **SUPPORTING DOCUMENTS**

### **UNIVERGE SV8100 General Description Manual**

This Manual provides general information about the system, its features, system configuration and standards. This manual provides an overview of the UNIVERGE SV8100 system and can be used to present information to potential customers.

### **UNIVERGE SV8100 System Hardware Manual**

The System Hardware Manual is provided for the system installer. This manual has detailed instructions for installing the SV8100 chassis, Blades, Multiline Terminals, and optional equipment.

### **UNIVERGE SV8100 Features and Specifications Manual**

This manual provides detailed information for each of the system features. If you are not familiar with the features, the Table of Contents lists each of the features and where to find the feature within the manual.

### **UNIVERGE SV8100 Key-Common Channel Interoffice Signaling (K-CCIS) Manual**

This manual provides information installing and programming the Key-Common Channel Interoffice Signaling (K-CCIS) System.

## ***Chapter 1      Introduction***

<b>Section 1</b>	<b>Before You Start Programming .....</b>	<b>1-1</b>
<b>Section 2</b>	<b>How to Use Manual .....</b>	<b>1-1</b>
<b>Section 3</b>	<b>How to Enter Programming Mode .....</b>	<b>1-2</b>
<b>Section 4</b>	<b>How to Exit Programming Mode .....</b>	<b>1-3</b>
<b>Section 5</b>	<b>Using Keys to Move Around in the Programs .....</b>	<b>1-4</b>
<b>Section 6</b>	<b>Programming Names and Text Messages .....</b>	<b>1-5</b>
<b>Section 7</b>	<b>Using Softkeys For Programming .....</b>	<b>1-6</b>
<b>Section 8</b>	<b>What the Softkey Display Prompts Mean .....</b>	<b>1-7</b>
<b>Section 9</b>	<b>System Number Plan/Capacities .....</b>	<b>1-8</b>

## ***Chapter 2      Programming the UNIVERGE SV8100***

<b>Section 1</b>	<b>Programming Your System .....</b>	<b>2-1</b>
<b>Program 10 : System Configuration Setup</b>		
10-01 :	<b>Time and Date .....</b>	<b>2-5</b>
10-02 :	<b>Location Setup .....</b>	<b>2-6</b>
10-03 :	<b>ETU Setup .....</b>	<b>2-7</b>
10-04 :	<b>Music On Hold Setup .....</b>	<b>2-18</b>
10-05 :	<b>General Purpose Relay Setup .....</b>	<b>2-19</b>
10-06 :	<b>ISDN-BRI Setup .....</b>	<b>2-20</b>
10-08 :	<b>Pre-Ringing Setup .....</b>	<b>2-21</b>
10-09 :	<b>DTMF and Dial Tone Circuit Setup .....</b>	<b>2-22</b>
10-12 :	<b>CD-CP00-US Network Setup .....</b>	<b>2-24</b>
10-13 :	<b>In-DHCP Server Setup .....</b>	<b>2-27</b>

10-14 : Managed Network Setup .....	2-28
10-15 : Client Information Setup .....	2-29
10-16 : Option Information Setup .....	2-30
10-17 : H.323 Gatekeeper Setup .....	2-34
10-18 : H.323 Alias Address Setup .....	2-35
10-19 : VoIP DSP Resource Selection .....	2-36
10-20 : LAN Setup for External Equipment .....	2-37
10-21 : CD-CP00-US Hardware Setup .....	2-39
10-23 : SIP System Interconnection Setup .....	2-40
10-24 : Daylight Savings Setup .....	2-41
10-25 : H.323 Gateway Prefix Setup .....	2-43
10-26 : IP System Operation Setup .....	2-44
10-28 : SIP System Information Setup .....	2-45
10-29 : SIP Server Information Setup .....	2-46
10-30 : SIP Authentication Information Setup .....	2-48
10-33 : SIP Registrar/Proxy Information Basic Setup .....	2-49
10-36 : SIP Trunk Registration Information Setup .....	2-50
10-37 : UPnP Setup .....	2-51
10-38 : BGM Resource Setup .....	2-52
10-39 : Fractional Setup .....	2-53
10-40 : VoIP Trunk Availability .....	2-54
10-41 : General Purpose Contact Detector Setup .....	2-55
10-43 : SNMP Setting .....	2-56
10-45 : VoIP Routing Table Setup .....	2-58
10-46 : SIP Multiline Server Information Setup .....	2-59
10-47 : Terminal License Server Information Setup .....	2-62
10-48 : License Activation .....	2-63
10-49 : License File Activation .....	2-64
10-50 : License Information .....	2-65
10-51 : PRI/T1 Selection of PRIU Unit .....	2-66
10-52 : Free/Demo License Information .....	2-67
10-53 : SPoE Setup .....	2-68

10-54 : License Configuration for Each Package .....	2-69
--	------

**Program 11 : System Numbering**

11-01 : System Numbering .....	2-71
11-02 : Extension Numbering .....	2-79
11-04 : Virtual Extension Numbering .....	2-81
11-06 : ACI Extension Numbering .....	2-83
11-07 : Department Group Pilot Numbers .....	2-84
11-08 : ACI Group Pilot Number .....	2-85
11-09 : Trunk Access Code .....	2-86
11-10 : Service Code Setup (for System Administrator) .....	2-88
11-11 : Service Code Setup (for Setup/Entry Operation) .....	2-91
11-12 : Service Code Setup (for Service Access) .....	2-95
11-13 : Service Code Setup (for ACD) .....	2-99
11-14 : Service Code Setup (for Hotel) .....	2-101
11-15 : Service Code Setup, Administrative (for Special Access) .....	2-103
11-16 : Single Digit Service Code Setup .....	2-105
11-17 : ACD Group Pilot Number .....	2-107
11-20 : Dial Extension Analyse Table .....	2-108

**Program 12 : Night Mode Setup**

12-01 : Night Mode Function Setup .....	2-109
12-02 : Automatic Night Service .....	2-110
12-03 : Weekly Night Service Switching .....	2-112
12-04 : Holiday Night Service Switching .....	2-114
12-05 : Night Mode Group Assignment for Extensions .....	2-115
12-06 : Night Mode Group Assignment for Trunks .....	2-116
12-07 : Text Data for Night Mode .....	2-117
12-08 : Night Mode Service Range .....	2-118

**Program 13 : Abbreviated Dialing**

13-01 : Speed Dialing Option Setup .....	2-119
13-02 : Group Speed Dialing Bins .....	2-120
13-03 : Speed Dialing Group Assignment for Extensions .....	2-121

13-04 : Speed Dialing Number and Name .....	2-122
13-05 : Speed Dial Trunk Group .....	2-124
13-07 : Telephone Book Dial Number and Name .....	2-125
13-08 : Telephone Book System Name .....	2-126
13-09 : Telephone Book Group Name .....	2-127
13-10 : Telephone Book Routing .....	2-128

**Program 14 : Trunk, Basic Setup**

14-01 : Basic Trunk Data Setup .....	2-129
14-02 : Analog Trunk Data Setup .....	2-135
14-04 : Behind PBX Setup .....	2-138
14-05 : Trunk Group .....	2-139
14-06 : Trunk Group Routing .....	2-140
14-07 : Trunk Access Map Setup .....	2-142
14-08 : Music on Hold Source for Trunks .....	2-144
14-09 : Conversation Recording Destination for Trunks .....	2-145
14-11 : ID Setup for IP Trunk .....	2-146
14-12 : SIP Register ID Setup for IP Trunk .....	2-147
14-13 : CCIS System Route ID .....	2-148
14-14 : CCIS Trunk CIC Assignment .....	2-149

**Program 15 : Extension, Basic Setup**

15-01 : Basic Extension Data Setup .....	2-151
15-02 : Multiline Telephone Basic Data Setup .....	2-153
15-03 : Single Line Telephone Basic Data Setup .....	2-161
15-05 : IP Telephone Terminal Basic Data Setup .....	2-164
15-06 : Trunk Access Map for Extensions .....	2-168
15-07 : Programmable Function Keys .....	2-169
15-08 : Incoming Virtual Extension Ring Tone Setup .....	2-180
15-09 : Virtual Extension Ring Assignment .....	2-182
15-10 : Incoming Virtual Extension Ring Tone Order Setup .....	2-183
15-11 : Virtual Extension Delayed Ring Assignment .....	2-185
15-12 : Conversation Recording Destination for Extensions .....	2-186

15-14 : Programmable One-Touch Keys .....	2-187
15-16 : SIP Register ID Setup for Extension .....	2-188
15-17 : CO Message Waiting Indication .....	2-189
15-18 : Virtual Extension Key Enhanced Options .....	2-190
15-19 : System Telephone Book Setup for Extension .....	2-191
15-20 : LCD Line Key Name Assignment .....	2-192
15-22 : Mobile Extension Setup .....	2-193

**Program 16 : Department Group Setup**

16-01 : Department Group Basic Data Setup .....	2-195
16-02 : Department Group Assignment for Extensions .....	2-198
16-03 : Secondary Department Group .....	2-199
16-04 : Call Restriction Between Department Groups .....	2-200

**Program 20 : System Option Setup**

20-01 : System Options .....	2-201
20-02 : System Options for Multiline Telephones .....	2-203
20-03 : System Options for Single Line Telephones .....	2-206
20-04 : System Options for Virtual Extensions .....	2-208
20-06 : Class of Service for Extensions .....	2-209
20-07 : Class of Service Options (Administrator Level) .....	2-210
20-08 : Class of Service Options (Outgoing Call Service) .....	2-213
20-09 : Class of Service Options (Incoming Call Service) .....	2-216
20-10 : Class of Service Options (Answer Service) .....	2-218
20-11 : Class of Service Options (Hold/Transfer Service) .....	2-220
20-12 : Class of Service Options (Charging Cost Service) .....	2-223
20-13 : Class of Service Options (Supplementary Service) .....	2-224
20-14 : Class of Service Options for DISA/E&M .....	2-229
20-15 : Ring Cycle Setup .....	2-231
20-16 : Selectable Display Messages .....	2-233
20-17 : Operator Extension .....	2-236
20-18 : Service Tone Timers .....	2-237
20-19 : System Options for Caller ID .....	2-239

20-20 : Message Setup for Non-Caller ID Data .....	2-240
20-21 : System Options for Long Conversation .....	2-241
20-22 : System Options for Wireless – DECT Service .....	2-242
20-23 : System Options for CTI .....	2-243
20-25 : ISDN Options .....	2-244
20-26 : Multiplier Changing CO .....	2-246
20-28 : Trunk to Trunk Conversation .....	2-247
20-29 : Timer Class for Extension .....	2-248
20-30 : Timer Class for Trunks .....	2-249
20-31 : Timer Class Timer Assignment .....	2-250
20-35 : Extension's Operator Setting .....	2-254
20-36 : Trunk's Operator Setting .....	2-255
20-37 : Operator Extension Group Setup .....	2-256
20-38 : Operator Group Setting .....	2-257

### **Program 21 : Outgoing Call Setup**

21-01 : System Options for Outgoing Calls .....	2-259
21-02 : Trunk Group Routing for Extensions .....	2-263
21-03 : Trunk Group Routing for Trunks .....	2-264
21-04 : Toll Restriction Class for Extensions .....	2-265
21-05 : Toll Restriction Class .....	2-266
21-06 : Toll Restriction Table Data Setup .....	2-269
21-07 : Toll Restriction Override Password Setup .....	2-272
21-08 : Repeat Dial Setup .....	2-273
21-09 : Dial Block Setup .....	2-274
21-10 : Dial Block Restriction Class Per Extension .....	2-275
21-11 : Extension Ringdown (Hotline) Assignment .....	2-276
21-12 : ISDN Calling Party Number Setup for Trunks .....	2-277
21-13 : ISDN Calling Party Number Setup for Extensions .....	2-278
21-14 : Walking Toll Restriction Password Setup .....	2-279
21-15 : Individual Trunk Group Routing for Extensions .....	2-280
21-17 : IP Trunk (SIP) Calling Party Number Setup for Trunk .....	2-281
21-18 : IP Trunk Calling Party Number Setup for Extension .....	2-282

21-19 : IP Trunk (SIP) Calling Party Number Setup for Extension ....	2-283
21-21 : Toll Restriction for Trunks (Seized Trunk Basis Setting) .....	2-284
21-22 : CO Message Waiting Indication – Call Back Settings .....	2-285

**Program 22 : Incoming Call Setup**

22-01 : System Options for Incoming Calls .....	2-287
22-02 : Incoming Call Trunk Setup .....	2-289
22-03 : Trunk Ring Tone Range .....	2-291
22-04 : Incoming Extension Ring Group Assignment .....	2-293
22-05 : Incoming Trunk Ring Group Assignment .....	2-294
22-06 : Normal Incoming Ring Mode .....	2-295
22-07 : DIL Assignment .....	2-296
22-08 : DIL/IRG No Answer Destination .....	2-297
22-09 : DID Basic Data Setup .....	2-298
22-10 : DID Translation Table Setup .....	2-300
22-11 : DID Translation Number Conversion .....	2-302
22-12 : DID Intercept Ring Group .....	2-306
22-13 : DID Trunk Group to Translation Table Assignment .....	2-308
22-14 : VRS Delayed Message for IRG .....	2-309
22-15 : VRS Delayed Message for Department Group .....	2-311
22-16 : Private Call Refuse Target Area Setup .....	2-313
22-17 : Dial-In Conversion Table Area Setup for Time Pattern .....	2-314
22-18 : Private Call Assignment Setup .....	2-315
22-20 : Flexible Ringing by Caller ID Setup .....	2-316

**Program 23 : Answer Features Setup**

23-02 : Call Pickup Groups .....	2-317
23-03 : Universal Answer/Auto Answer .....	2-318
23-04 : Ringing Line Preference for Virtual Extensions .....	2-320

**Program 24 : Hold/Transfer Setup**

24-01 : System Options for Hold .....	2-321
24-02 : System Options for Transfer .....	2-323
24-03 : Park Group .....	2-325

24-04 : Automatic Trunk-to-Trunk Transfer Target Setup .....	2-326
24-05 : Department Group Transfer Target Setup .....	2-327
24-09 : Call Forward Split Settings .....	2-328

**Program 25 : VRS/DISA Setup**

25-01 : VRS/DISA Line Basic Data Setup .....	2-331
25-02 : DID/DISA VRS Message .....	2-332
25-03 : VRS/DISA Transfer Ring Group With Incorrect Dialing .....	2-333
25-04 : VRS/DISA Transfer Ring Group With No Answer/Busy .....	2-334
25-05 : VRS/DISA Error Message Assignment .....	2-335
25-06 : VRS/DISA One-Digit Code Attendant Setup .....	2-336
25-07 : System Timers for VRS/DISA .....	2-338
25-08 : DISA User ID Setup .....	2-340
25-09 : Class of Service for DISA Users .....	2-341
25-10 : Trunk Group Routing for DISA .....	2-342
25-11 : DISA Toll Restriction Class .....	2-343
25-12 : Alternate Trunk Group Routing for DISA .....	2-344
25-13 : System Option for DISA .....	2-345

**Program 26 : ARS Service**

26-01 : Automatic Route Selection Service .....	2-347
26-02 : Dial Analysis Table for ARS/LCR .....	2-349
26-03 : ARS Dial Treatments .....	2-351
26-04 : ARS Class of Service .....	2-353
26-11 : Transit Network ID Table .....	2-354
26-12 : Network Specified Parameter Table for ARS .....	2-355

**Program 30 : DSS/DLS Console Setup**

30-01 : DSS Console Operating Mode .....	2-357
30-02 : DSS Console Extension Assignment .....	2-358
30-03 : DSS Console Key Assignment .....	2-359
30-04 : DSS Console Alternate Answer .....	2-367
30-05 : DSS Console Lamp Table .....	2-368
30-10 : DSS Console IP Terminal Setup .....	2-371

**Program 31 : Paging Setup**

31-01 : System Options for Internal/External Paging .....	2-373
31-02 : Internal Paging Group Assignment .....	2-375
31-03 : Internal Paging Group Settings .....	2-376
31-04 : External Paging Zone Group .....	2-379
31-05 : Universal Night Answer/Ring Over Page .....	2-380
31-06 : External Speaker Control .....	2-381
31-07 : Combined Paging Assignments .....	2-383
31-08 : BGM on External Paging .....	2-384

**Program 32 : Door Box and Sensor Setup**

32-01 : Door Box Timers Setup .....	2-385
32-02 : Door Box Ring Assignment .....	2-386
32-03 : Door Box Basic Setup .....	2-387
32-04 : Door Box Name Setup .....	2-388

**Program 33 : CTA and ACI Setup**

33-01 : ACI Port Type Setup .....	2-389
33-02 : ACI Department Calling Group .....	2-390

**Program 34 : Tie Line Setup**

34-01 : E&M Tie Line Basic Setup .....	2-391
34-02 : E&M Tie Line Class of Service .....	2-393
34-03 : Trunk Group Routing for E&M Tie Lines .....	2-394
34-04 : E&M Tie Line Toll Restriction Class .....	2-395
34-05 : Tie Line Outgoing Call Restriction .....	2-396
34-06 : Add/Delete Digit for E&M Tie Line .....	2-397
34-07 : E&M Tie Line Timer .....	2-398
34-08 : Toll Restriction Data for E&M Tie Lines .....	2-399
34-09 : ANI/DNIS Service Options .....	2-400
34-10 : Digits Delete for T1 ANI Assignment .....	2-403

**Program 35 : SMDR Account Code Setup**

35-01 : SMDR Options .....	2-405
35-02 : SMDR Output Options .....	2-407

35-03 : SMDR Port Assignment for Trunk Group .....	2-410
35-04 : SMDR Port Assignment for Department Groups .....	2-411
35-05 : Account Code Setup .....	2-412
35-06 : Verified Account Code Table .....	2-414

**Program 40 : Voice Recording System**

40-01 : Voice Mail Basic Setup .....	2-415
40-02 : Mailbox Setup .....	2-417
40-03 : Message Recording Setup .....	2-418
40-04 : Live Recording Setup .....	2-419
40-05 : Call Information Setup .....	2-420
40-06 : Voice Mail Automated Attendant Data Setup .....	2-421
40-07 : Voice Prompt Language Assignment for VRS .....	2-422
40-08 : Voice Prompt Language Assignment for Mailboxes .....	2-423
40-09 : Voice Mail Multiple Address Group Setup .....	2-424
40-10 : Voice Announcement Service Option .....	2-425
40-11 : Preamble Message Assignment .....	2-427

**Program 41 : ACD Setup**

41-01 : System Options for ACD .....	2-429
41-02 : ACD Group and Agent Assignments .....	2-430
41-03 : Incoming Ring Group Assignment for ACD Group .....	2-431
41-04 : ACD Group Supervisor .....	2-433
41-05 : ACD Agent Work Schedules .....	2-434
41-06 : Trunk Work Schedules .....	2-435
41-07 : ACD Weekly Schedule Setup .....	2-436
41-08 : ACD Overflow Options .....	2-437
41-09 : ACD Overflow Table Setting .....	2-439
41-10 : ACI Delay Announcement .....	2-440
41-11 : VRS Delay Announcement .....	2-441
41-12 : Night Announcement Setup .....	2-443
41-13 : VRS Message Number for Night Announcement .....	2-444
41-14 : ACD Options Setup .....	2-445

41-15 : ACD Queue Alarm Information .....	2-448
41-16 : ACD Threshold Overflow .....	2-450
41-17 : ACD Login Mode Setup .....	2-451
41-18 : ACD Agent Identity Code Setup .....	2-452
41-19 : ACD Voice Mail Delay Announcement .....	2-454
41-20 : ACD Queue Display Settings .....	2-456

**Program 42 : Hotel Setup**

42-01 : System Options for Hotel/Motel .....	2-459
42-02 : Hotel/Motel Telephone Setup .....	2-460
42-03 : Class of Service Options (Hotel/Motel) .....	2-461
42-04 : Hotel Mode One-Digit Service Codes .....	2-463
42-05 : Hotel Room Status Printer .....	2-464
42-06 : PMS Service Setting .....	2-465
42-07 : PMS Restriction Level Conversion Table .....	2-466

**Program 44 : ARS/F-Route Setup**

44-01 : System Options for ARS/F-Route .....	2-467
44-02 : Dial Analysis Table for ARS/F-Route Access .....	2-468
44-03 : Dial Analysis Extension Table .....	2-470
44-04 : ARS/F-Route Selection for Time Schedule .....	2-472
44-05 : ARS/F-Route Table .....	2-473
44-06 : Additional Dial Table .....	2-475
44-07 : Gain Table for ARS/F-Route Access .....	2-476
44-08 : Time Schedule for ARS/F-Route .....	2-478
44-09 : Weekly Schedule for ARS/F-Route .....	2-480
44-10 : Holiday Schedule for ARS/F-Route .....	2-481

**Program 45 : Voice Mail Integration**

45-01 : Voice Mail Integration Options .....	2-483
45-02 : NSL Option Setup .....	2-485
45-04 : Voice Mail Digit Add Assignment .....	2-486
45-05 : Voice Mail Send Protocol Signal Without Additional Digits ...	2-487

**Program 47 : InMail**

47-01 : VM8000 InMail System Options .....	2-489
47-02 : VM8000 InMail Station Mailbox Options .....	2-497
47-03 : VM8000 InMail Group Mailbox Options .....	2-503
47-06 : Group Mailbox Subscriber Options .....	2-505
47-07 : VM8000 InMail Routing Mailbox Options .....	2-510
47-08 : Call Routing Mailbox Options .....	2-512
47-09 : Announcement Mailbox Options .....	2-514
47-10 : VM8000 InMail Trunk Options .....	2-516
47-11 : VM8000 InMail Answer Table Options .....	2-518
47-12 : VM8000 InMail Answer Schedules .....	2-522
47-13 : VM8000 InMail Dial Action Tables .....	2-531
47-15 : Routing Directory Mailbox Options .....	2-538
47-16 : InMail Language License .....	2-539

**Program 50 : Common Channel Interoffice Signaling Service**

50-01 : CCIS System Setting .....	2-541
50-02 : Connecting System Settings .....	2-542
50-03 : CCIS Destination System Settings .....	2-544
50-04 : CCIS Office Code Assignment .....	2-545
50-05 : CCIS Maximum Call Forwarding Hop Counter .....	2-546
50-06 : CCIS Feature Availability .....	2-547
50-07 : CCIS Centralized Billing Center Office .....	2-548
50-08 : CCIS Centralized BLF Sending Group Assignment .....	2-549
50-09 : CCIS Centralized BLF Sending Extension Number Assignment .....	2-550
50-10 : CCIS Centralized BLF Interval Time Assignment .....	2-552
50-11 : CCIS Centralized Day/Night Switching Sending Group Assignment 2-553	
50-12 : CCIS Centralized Day/Night Mode to System Mode Assignment .....	2-554
50-13 : CCIS Centralized Response Timeout Assignment .....	2-555

**THIS PAGE INTENTIONALLY LEFT BLANK**

# Introduction

## SECTION 1 BEFORE YOU START PROGRAMMING

Before customizing your system be sure to read this chapter first.

This chapter provides you with detailed information about the system programs. By changing a program, you change the way the feature associated with that program works. In this chapter, you find out about each program, the features that the program affects and how to enter the program data into system memory.

## SECTION 2 HOW TO USE MANUAL

This section lists each program in numerical order. For example, Program 10-01 is at the beginning of the section and Program 92-01 is at the end. The information on each program is subdivided into the following headings:

**Description** describes what the program options control. The Default Settings for each program are also included. When you first install the system, it uses the Default Setting for all programs. Along with the Description are the **Conditions** which describe any limits or special considerations that may apply to the program.

The reverse type (white on black) just beneath the Description heading is the program access level. You can only use the program if your access level meets or exceeds the level the program requires. Refer to [Section 3 How to Enter Programming Mode on page 1-2](#) for a list of the system access levels and passwords.

**Feature Cross Reference** provides you with a table of all the features affected by the program. You will want to keep the referenced features in mind when you change a program. Customizing a feature may have an effect on another feature that you did not intend.

**Telephone Programming Instructions** shows how to enter the program data into system memory. For example:

1. Enter the programming mode.
2. 15-07-01

tells you to enter the programming mode, dial 150701 from the telephone dial pad. After you do, you will see the message “15-07-01 TEL” on the first line of the telephone display. This indicates the program number (15-07), item number (01), and that the options are being set for the extension . The second row of the display “KY01 = \*01” indicates that Key 01 is being programmed with the entry of \*01. The third row allows you to move the cursor to the left or right, depending on which arrow is pressed. To learn how to enter the programming mode, refer to [Section 3 How to Enter Programming Mode](#) below.

## SECTION 3 HOW TO ENTER PROGRAMMING MODE

### To enter programming mode:

1. Go to any working display telephone.  
☞ In a newly installed system, use extension (port 1).
2. Do not lift the handset.
3. Press **Speaker**.
4. # \* # \* .
5. Dial the system password + **Transfer**.  
Refer to the following table for the default system passwords. To change the passwords, use [90-02 : Programming Password Setup](#).

Password	User Name	Level	Programs at this Level
47544	<b>necii</b>	1 (MF)	Manufacturer (MF): All programs
12345678	<b>tech</b>	2 (IN)	Installation (IN): All programs in this section not listed below for SA and SB
0000	<b>ADMIN1</b>	3 (SA)	System Administrator – Level 1 (SA): 10-01, 10-02, 10-12, 10-13, 10-14, 10-15, 10-16, 10-17, 10-18, 10-22, 12-02, 12-03, 12-04, 15-01, 15-07, 15-09, 15-10, 15-11, 20-16, 21-07, 21-14, 22-04, 22-11, 25-08, 30-03, 32-02, 40-02, 41-02, 41-03, 41-04, 41-05, 41-06, 41-07, 41-08, 41-09, 41-10, 41-11, 41-12, 41-13, 41-14, 41-15, 41-16, 41-17, 41-18, 90-03, 90-04, 90-06, 90-07, 90-18, 90-19
9999	<b>ADMIN2</b>	4 (SB)	System Administrator – Level 2 (SB): 13-04, 13-05, 13-06

## SECTION 4 HOW TO EXIT PROGRAMMING MODE

### To exit the programming mode:

When you are done programming, you must be out of a program options to exit (pressing the **Answer** key will exit the program option).

1. Press **Answer** key to exit the program options, if needed.

**Program Mode**  
 Base Service OP1 OP2

2. Press **Speaker**. If changes were to the system programming, "Saving System Data" is displayed.
3. The display shows "Complete Data Save" when completed and exits the telephone to an idle mode.

 To save a customer's database, a blank USB Drive is required. Insert the USB Drive into the CD-CP00-US and, using Program 90-03, save the software to the USB Drive. (Program 90-04 is used to reload the customer data if necessary.) Note that a USB Drive can only hold one customer database. Each database to be saved requires a separate drive.

**SECTION 5****USING KEYS TO MOVE AROUND IN THE PROGRAMS**

Once you enter the programming mode, use the keys in the following chart to enter data, edit data and move around in the menus.

**Table 1-1 Keys for Entering Data**

Keys for Entering Data	
Use this key...	When you want to...
<b>0~9 and *</b>	Enter data into a program.
<b>Transfer</b>	Complete the programming step you just made (e.g., pressing <b>Enter</b> on a PC keyboard). When a program entry displays, press <b>Transfer</b> to bypass the entry without changing it.
<b>Recall</b>	Delete the entry to the left (e.g., pressing <b>Backspace</b> on a PC keyboard).
<b>Hold</b>	Delete or clear all characters to the right of the cursor.
<b>Answer</b>	Exit one step at a time from the program window currently being viewed.  For example, if programming item 5 in 15-03, pressing <b>Answer</b> allows you to enter a new option in program 15-03. Pressing <b>Answer</b> again allows you to select a new program in the 15-XX series. Pressing <b>Answer</b> a third time allows you to enter a new program beginning with 1. Pressing <b>Answer</b> one last time brings you to the beginning program display, allowing you to enter any program number.
<b>MIC</b>	Switch between the different input data fields by pressing <b>MIC</b> . The cursor moves up to the top row of the display. Pressing <b>MIC</b> again moves the cursor back to the middle row.
<b>LINE KEYS</b>	Use pre-programmed settings to help with the program entry. These settings vary between programs from LINE 1 = 0 (off) and LINE 2 = 1 (on) to preset values for timers where LINE 1 = 5, LINE 2 = 10, LINE 3 = 15, etc.  For programs with this option, the line key, which currently matches the programmed setting, lights steady.  The display can also indicate Softkey, which will allow you to select the values as well (-1 and +1 will step through these pre-programmed settings.)
<b>LINE KEY 1</b>	Program a pause into an Speed Dialing bin.
<b>LINE KEY 2</b>	Program a recall/flash into an Speed Dialing bin.
<b>LINE KEY 3</b>	Program an @ into an Speed Dialing bin.

**Table 1-1 Keys for Entering Data (Continued)**

Keys for Entering Data	
Use this key...	When you want to...
<b>VOL ▲</b>	Scroll backward through a list of entry numbers (e.g., from extension etc.) or through entries in a table (e.g., Common Permit Table). If you enter data and then press this key, the system accepts the data before scrolling forward.
<b>VOL ▼</b>	Scroll forward through a list of entry numbers (e.g., from extension etc.) or through entries in a table (e.g., Common Permit Table). If you enter data and then press this key, the system accepts the data before scrolling backward.

## SECTION 6 PROGRAMMING NAMES AND TEXT MESSAGES

Several programs (e.g., Program 20-16 : Selectable Display Messages) require you to enter text. Use the following chart when entering and editing text. When using the keypad digits, press the key once for the first character, twice for the second character, etc. For example, to enter a C, press the key **2** three times. Press the key six times to display the lower case letter. The name can be up to 12 digits long.

**Table 1-2 Keys for Entering Names**

Use this keypad digit . . .	When you want to . . .
<b>1</b>	Enter characters: <b>1 @ [ ¥ ] ^ _ ` {   } Æ “ Á À Â Ã Ç É È ï ó</b>
<b>2</b>	Enter characters: <b>A-C, a-c, 2.</b>
<b>3</b>	Enter characters: <b>D-F, d-f, 3.</b>
<b>4</b>	Enter characters: <b>G-I, g-i, 4.</b>
<b>5</b>	Enter characters: <b>J-L, j-l, 5.</b>
<b>6</b>	Enter characters: <b>M-O, m-o, 6.</b>
<b>7</b>	Enter characters: <b>P-S, p-s, 7.</b>
<b>8</b>	Enter characters: <b>T-V, t-v, 8.</b>
<b>9</b>	Enter characters: <b>W-Z, w-z, 9.</b>
<b>0</b>	Enter characters: <b>0 ! “ # \$ % &amp; ’ ( ) ô Õ ú ä ö ü α ε θ</b>

**Table 1-2 Keys for Entering Names**

<b>Use this keypad digit . . .</b>	<b>When you want to . . .</b>
*	Enter characters: * + , - . / : ; < = > ? π Σ σ Ω ∞ ¢ £
#	# = Accepts an entry (only required if two letters on the same key are needed – ex: TOM). Pressing # again = Space. (In system programming mode, use the right arrow Softkey instead to accept and/or add a space.)
Conf	Clear the character entry one character at a time.
Hold	Clear all the entries from the point of the flashing cursor and to the right.

**SECTION 7****USING SOFTKEYS FOR PROGRAMMING**

Each UNIVERGE SV8100 display telephone provides interactive Softkeys for intuitive feature access. The options for these keys will automatically change depending on where you are in the system programming. Simply press the Softkey located below the option you wish and the display will change accordingly.

Pressing the VOLUME ▲ or VOLUME ▼ will scroll between the menus.

---

## SECTION 8     WHAT THE SOFTKEY DISPLAY PROMPTS MEAN

When using a display telephone in programming mode, various Softkey options are displayed. These keys will allow you to easily select, scan, or move through the programs.

**Table 1-3 Softkey Display Prompts**

Softkey Display Prompts	
If you press this Softkey ...	The system will...
back	Go back one step in the program display. You can press VOLUME ▲ or VOLUME ▼ to scroll forward or backward through a list of programs.
↑	Scroll down through the available programs.
↓	Scroll up through the available programs.
select	Select the currently displayed program.
←	Move the cursor to the left.
→	Move the cursor to the right.
-1	Move back through the available program options.
+1	Move forward through the available program options.

## SECTION 9 SYSTEM NUMBER PLAN/CAPACITIES

The following table provides the capacities for the UNIVERGE SV8100 system.

**Table 1-4 System Number Plan/Capacities**

System Number Plan/Capacities	
System Type	Number Plan/Capacities
<b>System</b>	
Analog Caller ID Detector (detected by DSP)	32/64 channels
Classes of Service	15
Day/Night Mode Numbers	8
Day/Night Service Patterns	32
Dial Tone Detector DTMF Receiver	64
Toll Restriction Classes	15
Verifiable Account Code Table	2000
<b>Trunk</b>	
Trunk Port Number	200
Trunk Ports (Total):	200
○ Analog Trunks	176
○ BRI Trunk Ports	176
○ T1/PRI Trunk Ports	200
○ E&M Analog Trunk Ports	44

DID Translation Table Entries	2000
DISA:	
○ Classes of Service	15
○ Users	15
Ring Groups	100
Tie Line Classes of Service	15
Tie Line Toll Restriction Classes	15
Trunk Access Maps	200
Trunk Group Numbers	100
Trunk Routes	100

**Table 1-4 System Number Plan/Capacities (Continued)**

System Number Plan/Capacities	
System Type	Number Plan/Capacities
<b>Extension</b>	
Telephone Extension Ports	512
○ Multiline Terminals	256
○ Single Line Phones/Analog Devices	256
○ VoIP Extensions	512
○ SIP DECT Wireless	504
DLCA:	01~16
○ Physical Ports	
LCA:	01~16
○ Physical Ports	
Telephone Extension Number Range	1~89999999*
	(*Extension cannot start with 0 or 9)
Virtual Extension Ports	256
Virtual Extension Number Range	1~89999999*
	(*Extension cannot start with 0 or 9)
PGD(2)-U10 ADP	56
ADA (Recording Jack) Adapters	240
UNIVERGE SV8100 Wireless – SIP DECT Access Points	Unlimited
Door Boxes	8
Door Box Numbers	1~8
DSS Consoles Numbers:	
○ 60 Button DSS Console	32
Operator Access Number	0 (Default)
Operator Extension	15
Ringdown Assignments	512
SLT Adapters	16
HF-R Adapters	240

**Table 1-4 System Number Plan/Capacities (Continued)**

System Number Plan/Capacities	
System Type	Number Plan/Capacities
<b>Speed Dialing</b>	
Speed Dialing Groups	64
Speed Dialing Bins	0~1999
Speed Dialing Table-Common	1000
<b>ACD</b>	
ACD Groups	64
ACD Agent Extensions	512
<b>ACI</b>	
ACI Groups	16
ACI Ports	96
<b>Automated Attendant</b>	
VRS Message Numbers	1~100
<b>Conference</b>	
Conference Circuits	64 - maximum (32 Parties Per Conference)
<b>Data Communication Interfaces</b>	
APR Software Port Numbers	449~512
APA Adapters	240
APR Adapters	240
CTA or CTU Adapters	32 (Only works with DTH/DTR style telephones)
<b>Department and Pickup Groups</b>	
Department (Extension) Group Numbers	1~64
Call Pickup Group Numbers	1~64
<b>Hotline</b>	
Internal Hotline	512
External Hotline	512

**Table 1-4 System Number Plan/Capacities (Continued)**

System Number Plan/Capacities	
System Type	Number Plan/Capacities
<b>Paging and Park</b>	
Internal Page Group Numbers	0, 01~64
External Page Group Numbers	0, 1~8
External Speakers <ul style="list-style-type: none"> <li>○ CD-CP00-US( )-U10</li> <li>○ PGD(2)-U10 ADP</li> </ul>	9 (1) (1~8)
Park Group Numbers	1~64
Park Orbits	1~64
<b>SMDR</b>	
SMDR Ports	1~8
<b>VRS/VM8000 InMail</b>	
VRS/VM8000 InMail	1
VRS/VM8000 InMail Channels	16 (Note 1)
VRS Attendant Messages	3
VRS Recordable Messages	100
VM8000 InMail Ports	8 (Note 1)
<b>VoIP</b>	
ADA2 (Recording Jack) Adapters	240
PSA (Power Failure) Adapters	256
RTP Ports	0~65535
RTCP Ports	0~65535
DSP Resources	128 (Note 2)

Note 1: The PZ-VM21 supports up to 16 ports and they are shared by the VM8000 InMail and VRS.

Note 2: The maximum number of VOIP DSP Resources depend on which PZ-IPLA is installed.

Passwords	
Programming Passwords:	
Level 1 (MF) PCPro/WebPro User Name:	47544 <b>necii</b>
Level 2 (IN) PCPro/WebPro User Name:	12345678 <b>tech</b>

Programming Password Users	8
Extension numbers can be one to eight digits long. Refer to the Flexible System Numbering feature in the UNIVERGE SV8100 Features and Specifications Manual.	

**DRAFT**

# *Programming the UNIVERGE SV8100*

2

## **SECTION 1 PROGRAMMING YOUR SYSTEM**

The information contained in this chapter provides the information necessary to properly program your UNIVERGE UNIVERGE SV8100 system.

The programming blocks are organized into the following programming modes.

**Table 2-1 Programming Modes**

Program Number : Program Name
Program 10 : System Configuration Setup
Program 11 : System Numbering
Program 12 : Night Mode Setup
Program 13 : Abbreviated Dialing
Program 14 : Trunk, Basic Setup
Program 15 : Extension, Basic Setup
Program 16 : Department Group Setup
Program 20 : System Option Setup
Program 21 : Outgoing Call Setup
Program 22 : Incoming Call Setup
Program 23 : Answer Features Setup
Program 24 : Hold/Transfer Setup
Program 25 : VRS/DISA Setup
Program 26 : ARS Service
Program 30 : DSS/DLS Console Setup

**Table 2-1 Programming Modes (Continued)**

<b>Program Number : Program Name</b>
Program 31 : Paging Setup
Program 32 : Door Box and Sensor Setup
Program 33 : CTA and ACI Setup
Program 34 : Tie Line Setup
Program 35 : SMDR Account Code Setup
Program 40 : Voice Recording System
Program 41 : ACD Setup
Program 42 : Hotel Setup
Program 44 : ARS/F-Route Setup
Program 45 : Voice Mail Integration
Program 47 : InMail
Program 50 : Common Channel Interoffice Signaling Service (CCIS)

# Program 10 : System Configuration Setup

## 10-01 : Time and Date

Level:  
SA

### Description

Use Program 10-01 : Time and Date to change the system Time and Date through system programming. Extension users can also dial Service Code 728 to change the time if allowed by an extension Class of Service.

### Input Data

Item No.	Item	Input Data	Default	Description
01	Year	00~99	No Setting	Enter 2 digits for year (00~99).
02	Month	01~12	No Setting	Enter 2 digits (01~12) for the month.
03	Day	01~31	No Setting	Enter 2 digits (01~31) for the day.
04	Week	1~7 (Sun~Sat)	No Setting	Enter digit for the day of the week (1=Sunday, 7=Saturday).
05	Hour	00~23	No Setting	Enter 2 digits for the hour (00~23).
06	Minute	00~59	No Setting	Enter 2 digits for the minute (00~59).
07	Second	00~59	No Setting	Enter 2 digits for the second (00~59).

# Program 10 : System Configuration Setup

## 10-02 : Location Setup

Level:

SA

### Description

Use **Program 10-02 : Location Setup** to define the location of the installed system.

#### Input Data

Item No.	Item	Input Data	Default	Description
01	<b>Country Code</b>	Dial (up to four digits): 0~9, *, #	1	Enter the country code.
02	<b>International Access Code</b>	Dial (up to four digits): 0~9, *, #	No setting	Enter the international access code.
03	<b>Other Area Access Code</b>	Dial (up to two digits): 0~9, *, #	9	Enter the other area access code
04	<b>Area Code</b>	Dial (up to six digits): 0~9, *, #	No setting	Enter the local area code.
05	<b>Trunk Access Code</b>	Dial (up to eight digits): 0~9, *, #	No setting	Enter the trunk access code digits required to place an outgoing call.

## 10-03 : ETU Setup

**Level:**  
IN

### Description

Use **Program 10-03 : ETU Setup** to setup and confirm the Basic Configuration data for each blade. When changing a defined terminal type, first set the type to 0 and then plug the new device in to have the system automatically define it or you may have to reseat the blade.

 *The items highlighted in gray are read only and cannot be changed.*

#### Input Data

##### For CNF PKG Setup

Physical Port Number	01~16
----------------------	-------

Item No.	Item	Input Data	Default
01	Logical Port Number	0~256	0

##### For DLCA PKG Setup

Physical Port Number	01~16
----------------------	-------

Item No.	Item	Input Data	Default
01	Terminal Type (B1)	0 = Not set 1 = Multiline Terminal 2 = SLT Adapter 6 = PGD(2)-U10 ADP (Paging) 7 = PGD(2)-U10 ADP (Tone Ringer) 8 = PGD(2)-U10 ADP (Door Box) 9 = PGD(2)-U10 ADP (ACI) 10 = DSS Console 11 = --- Not Used ---	0

Item No.	Item	Input Data	Default
02	<b>Logical Port Number (B1)</b>	0 = Not set 1 = Multiline Terminal (1~256) 2 = SLT Adapter (1~256) 6 = PGD(2)-U10 ADP (Paging) (1~8) 7 = PGD(2)-U10 ADP (for Tone Ringer) (1~8) 8 = PGD(2)-U10 ADP (for Door Box) (1~8) 9 = PGD(2)-U10 ADP (for ACI) (1~96) 10 = DSS (1~32) 11 = --- Not Used ---	0

11	<b>Handset Option Information</b>	0 = No option 1 = PSA/PSD	0

**For LCA PKG Setup**

Physical Port Number	01~16
----------------------	-------

Item No.	Item	Input Data	Default
01	<b>Logical Port Number</b>	0~256	0
03	<b>Transmit Gain Level (S-Level)</b>	1~63 (-15.5 +15.5dB)	32 (0dB)
04	<b>Receive Gain Level (R-Level)</b>	1~63 (-15.5 +15.5dB)	32 (0dB)

**For COTA Unit Setup**

Physical Port Number	1~8
----------------------	-----

Item No.	Item	Input Data	Default
01	<b>Logical Port Number</b>	0~200	0

**For ODTA PKG Setup**

Physical Port Number	01~04
----------------------	-------

Item No.	Item	Input Data	Default
01	<b>Logical Port Number</b>	0~200	0
02	<b>2/4 Wire</b>	0 = 2 Wire 1 = 4 Wire	1
03	<b>E&amp;M Line Control Method</b>	0 = TYPE I 1 = TYPE V	1

**For DIOP PKG Setup**

Physical Port Number	01~04
----------------------	-------

Item No.	Item	Input Data	Default
01	<b>LD/OPX Specification</b>	0 = LD Trunk 1 = OPX	0
02	<b>Logical Port Number</b>	0 = 1~200 (LD Trunk) 1 = 1~256 (OPX)	0

**For BRIA PKG Setup**

ISDN Line Number	01~04
------------------	-------

Item No	Item	Input Data	Default
01	<b>ISDN Line Mode</b>	0 = Not Set 1 = T-Point	1
02	<b>Logical Port Number</b>  ☞ The starting port number of a BRI line is displayed. Two logic ports are automatically assigned to a BRI line.	0 = Not Set 1 = For T-Bus (1~200)	0
03	<b>Connection Type</b>	0 = Point-to-Multipoint 1 = Point-to-Point	0
04	<b>Layer 3 Timer Type</b>  ☞ Each timer value of Layer 3 is set up for every type using Program 81-06 (T-Bus)	1~5	1
05	<b>CLIP Information Announcement</b> Based on this setting, the system includes a Presentation Allowed (1) or Presentation Restricted (0) in the Setup message to allow or deny the Calling Party Number. Program 15-01-04 must also be set to 1 if this option is enabled.	0 = Disable 1 = Enable	1
06	<b>--- Not Used ---</b>		
07	<b>--- Not Used ---</b>		
08	<b>Dial Sending Mode</b> ISDN Protocol definition	0 = Enblock Sending 1 = Overlap Sending	1
09	<b>Dial Information Element</b> ISDN Protocol definition [Only when Dialing Sending Mode (10-03-08) is set for 1 (Overlap Sending)]	0 = Keypad Facility 1 = Called Party Number	0
10	<b>Master/Slave System</b> If set to 0, system is synchronized to network clock. If set to 1, system is not synchronized to the network clock.	0 = Slave System 1 = Master System	0
11	<b>--- Not Used ---</b>		
14	<b>--- Not Used ---</b>		
15	<b>--- Not Used ---</b>		
17	<b>ISDN Line Ringback Tone</b> If Telco does not provide ringback tone, SV8100 can if set to 1:Enable.	0 = Disable 1 = Enable	0

Item No	Item	Input Data	Default
18	<b>Type of Number</b> ISDN Protocol definition	0 = Unknown 1 = International number 2 = National number 3 = Network specific number 4 = Subscriber number 5 = Abbreviated number	2
19	<b>Numbering Plan Identification</b> ISDN Protocol definition	0 = Unknown 1 = ISDN numbering plan 2 = Data numbering plan 3 = Telex numbering plan 4 = National standard numbering plan 5 = Private numbering plan	1
22	<b>--- Not Used ---</b>		
23	<b>--- Not Used ---</b>		
24	<b>--- Not Used ---</b>		

**For PRTA PKG Setup**

ISDN Line Number	01~24
------------------	-------

Item No.	Item	Input Data	Default
01	<b>--- Not Used ---</b>		
02	<b>Logical Port Number</b>  ☞ <i>The start port number of a PRI line is displayed.</i>	1 = for T-Bus 1~200	1
03	<b>--- Not Used ---</b>		
04	<b>Layer 3 Timer Type</b>  ☞ <i>Each timer value of Layer 3 is set up for each type in Program 81-06 (T-Bus)</i>	1~5	1
05	<b>CLIP Information</b> Based on this setting, the system includes a Presentation Allowed (1) or Presentation Restricted (0) in the Setup message to allow or deny the Calling Party Number. Program 15-01-04 must also be set to 1 if this option is enabled.	0 = Disable 1 = Enable	1
06	<b>Length of Cable</b>	0 = 0 ~ 40m 1 = 41~ 80m 2 = 81~ 121m 3 = 122 ~ 162m 4 = 163 ~ 200m	0
07	<b>--- Not Used ---</b>		
08	<b>Dial Sending Mode</b> ISDN Protocol definition	0 = Enbloc Sending 1 = Overlap Sending	0
09	<b>Dial Information Element</b> ISDN Protocol definition  (Only when Dialing Sending Mode (10-03-08) is set for 1 (Overlap Sending))	0 = Keypad Facility 1 = Called Party Number	0
10	<b>--- Not Used ---</b>		
11	<b>--- Not Used ---</b>		
12	<b>Short / Long-Haul</b> If a CSU/DSU is installed between the Telco and the DTI-U40, 10-30-12 must be set to Short:0. If a CSU/DSU is not installed between the Telco and the DTI-40, 10-03-12 must be set to Long-Haul (1).	0 = Short-Haul 1 = Long-Haul	0

Item No.	Item	Input Data	Default
13	<b>Loss-Of-Signal Detection Limit</b> If the transmit/receive voltage is less than the setting in 10-03-13, the system considers this as Loss-Of-Signal and the PRTA does not come up. Note that there are different values based on the setting in 10-03-12 for the PRI.	0 = Level 0 (lowest sensitivity) 1 = Level 1 2 = Level 2 3 = Level 3 4 = Level 4 5 = Level 5 6 = Level 6 7 = Level 7 (highest sensitivity)	2
14	<b>--- Not Used ---</b>		
15			
16			
17	<b>ISDN Ringback Tone</b> If Telco does not provide ringback tone, SV8100 can if 10-03-17 is set to 1:Enable.	0 = Disable 1 = Enable	1
18	<b>Type of Number</b> ISDN Protocol definition. Select the number type for the ISDN circuit.	0 = Unknown 1 = International number 2 = National number 3 = Network Specific number 4 = Subscriber number 5 = Abbreviated number	2
19	<b>Numbering Plan Identification</b> ISDN Protocol definition. Select the Numbering Plan used for the ISDN circuit.	0 = Unknown 1 = ISDN numbering plan 2 = Data numbering plan 3 = Telex numbering plan 4 = National standard numbering plan 5 = Private numbering plan	1
20	<b>Network Exchange Selection</b> Select the ISDN protocol for the ISDN circuit.	0 = Standard (same as NI-2) 1 = reserved 2 = reserved 3 = DMS (A211) 4 = 5ESS 5 = DMS (A233) 6 = 4ESS 7 = NI2	0
21	<b>Number of Ports</b>	0 = Auto 1 = 4 Ports 2 = 8 Ports 3 = 12 Ports 4 = 16 Ports 5 = 20 Ports	0

Item No.	Item	Input Data	Default
22			
23	<b>Straight/Cross Wiring</b>	0 = Auto 1 = Manual (Cross) 2 = Manual (Straight)	0

**For DTI (T1) PKG Setup**

Physical Port Number	01~24
----------------------	-------

Item No.	Item	Input Data	Default
01	<b>Logical Port Number</b> The start port number of a T1 line is displayed, and 24 logic ports are automatically assigned to a DTI (T1) line.	0~200	0
02	<b>T1 Signal Format Selection</b>	0 = D4 (12 Multi Frame) 1 = ESF (24 Multi Frame)	1
03	<b>Clear Channel Selection</b>		0
04	<b>Line Length Selection</b>	0 = 0 feet ~ 133 feet 1 = 134 feet ~ 266 feet 2 = 267 feet ~ 399 feet 3 = 400 feet ~ 533 feet 4 = 534 feet ~ 655 feet	0
05	<b>DTI Trunk Type Assignment</b>	0 = CO 1 = E&M 2 = DID 3 = ANI	0
06	<b>Number of Ports</b>	0 = Auto 1 = 4 Ports 2 = 8 Ports 3 = 12 Ports 4 = 16 Ports 5 = 20 Ports	0

**For IPLA PKG Setup**

Physical Port Number	01~128
----------------------	--------

Item No.	Item	Input Data	Default
01	Trunk Logical Port Number	0~200	0
02	Trunk Type	0 = H.323 1 = SIP	1
03	IPL		

**For VMOO PKG Setup**

Physical Port Number	01~16
----------------------	-------

Item No.	Item	Input Data	Default
01	Logical Port Number	0~256	0

**Conditions**

- When changing a defined terminal type, first set the type to 0 and then plug the new device in to have the system automatically define it, or redefine the type manually.
- The system must have a blade installed to view/change the options for that type of blade.

# Program 10 : System Configuration Setup

## 10-04 : Music On Hold Setup

**Level:**

IN

### Description

Use **Program 10-04 : Music on Hold Setup** to set the Music on Hold (MOH) source. For internal Music on Hold, the system can provide a service tone callers on hold or one of eleven synthesized selections.

#### Input Data

Item No.	Item	Input Data	Default	Description
01	<b>Music on Hold Source Selection</b>	0 = No Tone 1 = External MOH 2 = Service Tone 3 = Internal MOH	2	The Music on Hold (MOH) source can be internal (synthesized) or from a customer-provided music source.  The customer-provided source can connect to a PGD(2)-U10 ADP or the connector on the side of the Base Cabinet MOH/ IN connection.  Trunk MOH and Extension MOH music source use the same Music on Hold source.
02	<b>Music on Hold Tone Selection</b>	???	1	???
03	<b>Audio Gain Setup</b>	1~63 (-15.5 ~ +15.5dB)	32 (0dB)	

#### Conditions

None

### Feature Cross Reference

- Analog Communications Interface (ACI)
- Background Music
- Music on Hold

## Program 10 : System Configuration Setup

### 10-05 : General Purpose Relay Setup

Level:

IN

---

#### Description

Use **Program 10-05 : General Purpose Relay Setup** to define which Relay circuits (5~8) on PGD(2)-U10 ADP are used for General Purpose Relay.

#### Input Data

General Purpose Relay No.	1~8
---------------------------	-----

Item No.	Item	Input Data	Default
01	<b>Slot No. Physical Port of DLCA Sensor Circuit No.</b>	Slot No: 0~24 DLCA Port: 0~16 Relay No: 0, 5~8  <i>After each entry, pressing the Transfer Key advances to the next entry.</i>	0 - 0 - 0

#### Conditions

None

---

#### Feature Cross Reference

# Program 10 : System Configuration Setup

## 10-06 : ISDN-BRI Setup

**Level:**  
IN

### Description

Use **Program 10-06 : ISDN - BRI Setup** to configure the ISDN - BRI Terminal Endpoint Identifier (TEI), mode of operation, and Service Profile Identifier (SPID) number for each circuit B-Channels.

#### **Input Data**

SLOT Number	1 ~ 24
-------------	--------

#### **Input Data**

ISDN - BRI Circuit	1 ~ 4
--------------------	-------

Item No.	Item	Input Data	Default
01	<b>TEI Selection</b> Selects the method the system uses when assigning Terminal Endpoint Identifier (TEI) values to BRI ports.	0 = Select by SPID number 1 = Select by Channel ID number	0
02	<b>DID Mode</b>	0 = Route by Called Party Number 1 = Route by Redirecting Number	0
03	<b>SPID 1</b>	Dial up to 20 digits	No Setting
04	<b>SPID 2</b>	Dial up to 20 digits	No Setting

#### **Conditions**

None

### Feature Cross Reference

- ISDN Compatibility

# Program 10 : System Configuration Setup

## 10-08 : Pre-Ringing Setup

Level:

IN

---

### Description

Use **Program 10-08 : Pre-Ringing Setup** to enable or disable pre-ringing for trunk calls. This sets how a trunk initially rings a telephone. With pre-ringing, a burst of ringing occurs as soon as the trunk LED flashes. The call then continues ringing with the normal ring cadence cycle. Without pre-ringing, the call starts ringing only when the normal ring cadence cycle occurs. This may cause a ring delay, depending on when call detection occurs in reference to the ring cycle.

#### Input Data

Item No.	Description	Input Data	Default
01	Pre-Ringing	0 = No 1 = Yes	0

#### Conditions

- Used with Analog Trunks only.

---

### Feature Cross Reference

- Central Office Calls, Answering
- Synchronous Ringing

# Program 10 : System Configuration Setup

## 10-09 : DTMF and Dial Tone Circuit Setup

Level:

IN

### Description

Use **Program 10-09 : DTMF and Dial Tone Circuit Setup** to allocate the circuits on the CD-CP00-US for either DTMF receiving or dial tone detection. The CD-CP00-US has 32 circuits initially. On the UNIVERGE SV8100, with a PZ-BS10 installed, the system can provide a total of 64 circuits (32 + 32). These are used as follows:

- Extension      DTMF receiver for single line telephone
- Trunk            DTMF receiver for analog trunks, dial tone & busy tone detection for analog trunks

### Input Data

Circuit/Resource Number	01~160
-------------------------	--------

Item No.	Input Data	Default Setting
01	0 = Common Use 1 = Extension Only 2 = Trunk Only	Circuit/Resource 01~08 = 1 (Extension Only) Circuit/Resource 09~32 = 2 (Trunk Only) Circuit/Resource 33~64 = 0 (Common Use)

### Conditions

None

---

## Feature Cross Reference

- Caller ID
- Central Office Calls, Placing
- Direct Inward Dialing (DID)
- Direct Inward System Access (DISA)
- Tie Lines

# Program 10 : System Configuration Setup

## 10-12 : CD-CP00-US Network Setup

**Level:**

SA

### Description

Use **Program 10-12 : CD-CP00-US Network Setup** to setup the IP Address, Subnet-Mask, and Default Gateway addresses.

**Caution! If any IP Address or NIC settings are changed, the system must be reset for the changes to take affect.**

#### Input Data

Item No.	Item	Input Data			Default	Description
01	IP Address	0.0.0.0 ~ 126.255.255.254 128.0.0.1 ~ 191.254.255.254 192.0.0.1 ~ 223.255.255.254			192.168.0.10 (Slot 1) 192.168.0.13 (Slot 4)	Set for CD-CP00-US.
02	Subnet Mask	128.0.0.0 240.0.0.0 254.0.0.0 255.192.0.0 255.248.0.0 255.255.0.0 255.255.224.0 255.255.252.0 255.255.255.128 255.255.255.240 255.255.255.254	192.0.0.0 248.0.0.0 255.0.0.0 255.224.0.0 255.252.0.0 255.255.128.0 255.255.240.0 255.255.254.0 255.255.255.192 255.255.255.224 255.255.255.248 255.255.255.255	224.0.0.0 252.0.0.0 255.128.0.0 255.240.0.0 255.254.0.0 255.255.192.0 255.255.248.0 255.255.255.0 255.255.255.224 255.255.255.252	255.255.255.0	The setting of Subnet Mask is invalid when all Host Address are 0.  If the network section is: 0, 127, 128.0, 191.255, 192.0.0, 223.255.255  The setting of Subnet Mask is invalid.
03	Default Gateway	0.0.0.0 ~ 126.255.255.254 128.0.0.1 ~ 191.254.255.254 192.0.0.1 ~ 223.255.255.254			0.0.0.0	IP Address for Router.

**Input Data (Continued)**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>	<b>Description</b>
04	Time Zone	0~24 (0 = -12 Hours and 24 = +12 Hours)	+7 (-5 hours)	Determine the offset from Greenwich Mean Time (GMT) time. Then enter its respective value. For example, Eastern Time (US and Canada) has a GMT offset of -5. The program data would then be 7 (0= -12, 1= -11, 2= -10, 3= -9, 4= -8, 5= -7, 6= -6, 7= -5, .....24= +12)
05	<b>NIC Interface</b>	0 = Auto Detect 1 = 100Mbps, Full Duplex 2 = 100Mbps, Half Duplex 3 = 10Mbps, Full Duplex 4 = 10Mbps, Half Duplex	0	NIC Auto Negotiate (CD-CP00-US)
06	<b>NAT Router Setup</b>	0 = No (Disable) 1 = Yes (Enable)	0	If using an external NAT Router or not.
07	<b>NAPT Router IP Address (Default Gateway [WAN])</b>	0.0.0.0 ~ 126.255.255.254 128.0.0.1 ~ 191.255.255.254 192.0.0.1 ~ 223.255.255.254	0.0.0.0	Sets the IP address on the WAN side of router.
08	<b>ICMP Redirect</b>	0= (Enable) 1= (Disable)	0	When receiving ICMP redirect message, this determines if the IP Routing Table updates automatically or not.
09	<b>IP Address</b>		172.16.0.10 (Slot 1) 172.16.0.13 (Slot 4)	Set for IPLA.
10	<b>Subnet Mask</b>		255.255.0.0	Set for IPLA.

**Input Data (Continued)**

Item No.	Item	Input Data	Default	Description
11	<b>NIC Setup</b>	0 = Auto Detect 1 = 100Mbps, Full Duplex 2 = 100Mbps, Half Duplex 3 = 10Mbps, Full Duplex 4 = 10Mbps, Half Duplex 5 = 1 Gbps, Full Duplex 6 = 1 Gbps, Half Duplex	0	Set for IPLA.

**Conditions**

- The system must be reset for these changes to take affect.

## 10-15 : Client Information Setup

Level:

SA

---

### Description

Use **Program 10-15 : Client Information Setup** to set up the client information when the DHCP server needs to assign a fixed IP address to clients.

#### Input Data

Client Number	1~512
---------------	-------

Item No.	Item	Input Data	Default
01	The IP address should be assigned out of the scope range set up in Program 10-14.	MAC: 00-00-00-00-00-00 ~ FF-FF-FF-FF-FF-FF	00-00-00-00-00-00
02	IP Address	1.0.0.0 ~ 126.255.255.254 128.0.0.1 ~ 191.255.255.254 192.0.0.1 ~ 223.255.255.254	0.0.0.0

#### Conditions

None

## 10-16 : Option Information Setup

**Level:**

SA

### Description

Use **Program 10-16 : Option Information Setup** to set up the option given from the DHCP server to each client.

#### Input Data

Item No.	Item	Input Data	Default
01	<b>Router</b> ???	Code number 0~255	3 (Fixed)
		IP address 0.0.0.0 ~ 126.255.255.254 128.0.0.1 ~ 191.255.255.254 192.0.0.1 ~ 223.255.255.254	0.0.0.0
02	<b>DNS Server</b> ???	Code number 0~255	6 (Fixed)
		IP address 0.0.0.0 ~ 126.255.255.254 128.0.0.1 ~ 191.255.255.254 192.0.0.1 ~ 223.255.255.254	0.0.0.0
03	<b>TFTP Server</b> ???	Code number 0~255	66 (Fixed)
		Maximum 64 character strings	No setting
05	<b>MGC</b> ???	Code number 0~255	129 (Fixed)
		IP address 0.0.0.0 ~ 126.255.255.254 128.0.0.1 ~ 191.255.255.254 192.0.0.1 ~ 223.255.255.254	172.16.0.10
06	<b>Client Host Name</b> ???	Code number 0~255	12 (Fixed)
		Maximum 64 character strings	No setting
07	<b>DNS Domain Name</b> ???	Code number 0~255	15 (Fixed)
		Maximum 20 character strings	No setting

**Input Data (Continued)**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>
08	<b>Download Protocol ???</b>	Code number 0~255	43 (Fixed)
		Sub code number	1 (Fixed)
		1 = FTP 2 = HTTP	
09	<b>Encryption Information ???</b>	Code number 0~255	43 (Fixed)
		Sub code number	2
		Maximum 128 character strings	No setting
10	<b>FTP Server Address ???</b>	Code number 0~255	43 (Fixed)
		Sub code number	141
		IP address 0.0.0.0 ~ 126.255.255.254 128.0.0.1 ~ 191.255.255.254 192.0.0.1 ~ 223.255.255.254	
11	<b>Config File Name ???</b>	Code number 0~255	43 (Fixed)
		Sub code number	151
		Maximum 15 character strings	No setting
12	<b>Vender Class ID</b>	Code number 0~255	60 (Fixed)
		Maximum 256 character strings	NECDTERM95IPSIP
13	<b>SNMP Server</b>	Code number 0~255	69 (Fixed)
		IP address 0.0.0.0 ~ 126.255.255.254 128.0.0.1 ~ 191.255.255.254 192.0.0.1 ~ 223.255.255.254	0.0.0.0
14	<b>POP3 Server</b>	Code number 0~255	70 (Fixed)
		IP address 0.0.0.0 ~ 126.255.255.254 128.0.0.1 ~ 191.255.255.254 192.0.0.1 ~ 223.255.255.254	0.0.0.0
16	<b>SIP Server (IP Address)</b>	Code number 0~255	120 (Fixed)
		IP address 0.0.0.0 ~ 126.255.255.254 128.0.0.1 ~ 191.255.255.254 192.0.0.1 ~ 223.255.255.254	0.0.0.0

**Input Data (Continued)**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>
17	<b>SIP Server (Domain Name)</b>	Code number 0~255	120 (Fixed)
		Maximum 20 character strings	No setting
18	<b>FTP Server</b>	Code number 0~255	141 (Fixed)
		IP address 0.0.0.0 ~ 126.255.255.254 128.0.0.1 ~ 191.255.255.254 192.0.0.1 ~ 223.255.255.254	0.0.0.0
19	<b>Config File Name</b>	Code number 0~255	151 (Fixed)
		Maximum 15 character strings	No setting
20	<b>LDS Server 1</b>	Code number 0~255	162 (Fixed)

# Program 10 : System Configuration Setup

## 10-24 : Daylight Savings Setup

**Level:**  
IN

### Description

Use **Program 10-24 : Daylight Savings Setup** to set the options for daylight savings. As the telephone system is used globally, these settings define when the system should automatically adjust for daylight savings as it applies to the region in which the system is installed.

#### Input Data

Item No.	Item	Input Data	Default
01	<b>Daylight Savings Mode</b> Enable (1) or disable (0) the system ability to adjust the time for daylight savings/standard time.	0 = Disable 1 = Enable	1
02	<b>Time for Daylight Savings</b> Enter the time of day when the system should adjust for daylight savings time.	00:00~23:59	02:00
03	<b>Start Month (Summer Time)</b> Enter the month when the system should adjust the time for daylight savings time (01~12).	1~12 (Jan = 1, 2 = Feb, etc.)	3
04	<b>Start of Week</b> Enter the week of the month when the system should adjust the time for daylight savings time. The week will start on the day listed in 10-24-05.	0 = Last Week of Month 0~5	2
05	<b>Start of Week Day</b> Enter the day of the week when the system should adjust the time for daylight savings time (01 = Sunday, 02 = Monday, etc.).	1~7 (Sun = 1, Mon = 2, etc.)	1
06	<b>End of Month</b> Enter the month when the system should adjust the time for standard time (01~12).	1~12 (Jan = 1, 2 = Feb, etc.)	11
07	<b>End of Week</b> Enter the week of the month when the system should adjust the time for standard time. The week will start on the Day listed in 10-24-08.	0 = Last Week of Month 0~5	1

**Input Data (Continued)**

Item No.	Item	Input Data	Default
08	<b>End of Week Day</b> Enter the day of the week when the system should adjust the time for daylight savings time (01 = Sunday, 02 = Monday, etc.).	1~7 (Sun = 1, Mon = 2, etc.)	1

## 10-25 : H.323 Gateway Prefix Setup

Level:  
IN

### Description

Use **Program 10-25 : H.323 Gateway Setup** to set the gateway prefix registered to the outside gatekeeper.

### Input Data

Item No.	Item	Input Data	Default
01	Gateway Prefix Entry	0 = Off 1 = On	0
02	Gateway Prefix Value	Up to 12 digits (0~9, *, #)	No setting

### Conditions

None

### Feature Cross Reference

None

# Program 10 : System Configuration Setup

## 10-26 : IP System Operation Setup

Level:  
IN

---

### Description

Use **Program 10-26 : IP System Operation Setup** to enable or disable the Peer to Peer feature for SIP MLT and SIP IP stations.

#### Input Data

Item No.	Item	Input Data	Default
01	<b>Peer to Peer Mode</b>	0 = Off 1 = On	1
02	<b>RTP Forwarding Mode</b>	0 = Disable 1 = Enable	0
03	<b>SIP Peer to Peer Mode</b>	0 = Off 1 = On	1

#### Conditions

- Disabling 10-26-01 will result in SIP MLT Station-to-SIP MLT Station calls utilizing a DSP resource.
- SIP-to-SIP MLT Station does not support Peer to Peer function and will result in utilizing a DSP resource.
- Disabling 10-26-03 will result in SIP IP Station-to-SIP IP Station calls utilizing a DSP resource.

# Program 10 : System Configuration Setup

## *10-46 : SIP Multiline Server Information Setup*

**Level:**  
IN

### Description

Use **Program 10-46 : SIP Multiline Server Information Setup** to setup the information of SIP Multiline (DT700 series) Server.

#### Input Data

Item No.	Item	Input Data	Default	Related Program
01	<b>Register Mode</b> 0 = Normal mode: When the phone boots up it will report the ext. assigned in the phone or choose the next available extension in the system. No password required. 1= Auto: If set to auto then the SIP user name and password must be entered into the actual IP phone. These settings must match 84-22/15-05-27, or the phone will not come on-line. 2 = Manual: When the phone boots up it will prompt user to enter a user id and password before logging in. It checks this user id/password against 84-22/15-05-27. If there is no match, the phone will not come on-line.	0 = Normal 1 = Auto 2 = Manual	0	
04	<b>Server Name</b> Assign the Server name to be used in the SIP URL.	Up to 32 characters	sipphd	

**Input Data**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>	<b>Related Program</b>
06	<b>Register Port</b> Assign the port number in which the SIP messages are sent to on the IPLA. This same port number must be assigned in the SIP Multiline terminals. If this command is changed, it requires a CPU reset.	0~65535	5080	10-29-04 84-20-01
07	<b>Encryption Mode</b>	0 = Off 1 = On	0	
08	<b>Encryption Type</b>	0 = Mode1	0	
09	<b>One Time Password</b>	Up to 10 characters (0~9, *, #)	None	10-46-07
10	<b>Start Port</b>	1~512	1	10-46-01
11	<b>Multicast IP Address</b>	224.0.0.0~239.255.255.255	224.0.0.10

# Program 11 : System Numbering

## 11-01 : System Numbering

Level:  
IN

### Description

Use **Program 11-01 : System Numbering** to set the system numbering plan. The numbering plan assigns the first and second digits dialed and affects the digits an extension user must dial to access other extensions and features, such as service codes and trunk codes. If the default numbering plan does not meet the site requirements, use this program to tailor the system numbering to the site.

#### CAUTION!

*Improperly programming this option can adversely affect system operation. Make sure you thoroughly understand the default numbering plan before proceeding. If you must change the standard numbering, use the chart for [Table 2-2 System Numbering Default Settings on page 2-73](#) to keep careful and accurate records of your changes.*

*Before changing your numbering plan, use PC Pro to make a backup copy of your system data.*

Program

11

Changing the numbering plan consists of three steps:

#### Step 1: Enter the digit(s) you want to change

You can make either single or two digit entries. In the Dialed Number column in the [Table 2-2 System Numbering Default Settings on page 2-73](#) table, the nX rows (e.g., 1X) are for single digit codes. The remaining rows (e.g., 11, 12, etc.) are for two digit codes.

- Entering a single digit affects all the Dialed Number entries beginning with that digit. For example, entering 6 affects all number plan entries beginning with 6. The entries you make in step 2 and step 3 below affect the entire range of numbers beginning with 6. (For example, if you enter 3 in step 2 the entries affected are 600-699. If you enter 4 in step 2 below, the entries affected are 6000-6999.)

- Entering two digits lets you define codes based on the first two digits a user dials. For example, entering 60 allows you to define the function of all codes beginning with 60. In the default program, only \* and # use 2-digit codes. All the other codes are single digit. If you enter a two digit code between 0 and 9, be sure to make separate entries for all the other two digit codes within the range as well. This is because in the default program all the two digit codes between 0 and 9 are undefined.
  - ☞ *Defining codes based on more than 2 digits require a secondary program (PRG 11-20) to define the codes.*

### **Step 2: Specify the length of the code you want to change**

After you specify a single or two digit code, you must tell the system how many digits comprise the code. This is the **Number of Digits Required** column in the [Table 2-2 System Numbering Default Settings on page 2-73](#) table.

### **Step 3: Assign a function to the code selected**

After entering a code and specifying its length, you must assign its function. This is the Dial Type column in the [Table 2-2 System Numbering Default Settings on page 2-73](#) table. The choices are:

Dial Types	Dial Type Description	Related Program
0	--- Not Used ---	
1	<b>Service Code</b>	11-10 : Service Code Setup (for System Administrator) 11-11 : Service Code Setup (for Registration) 11-12 : Service Code Setup (for Service Access) 11-13 : Service Code Setup (for ACD) 11-14 : Service Code Setup (for HOTEL) 11-15 : Service Code Setup (Special access) 11-16 : Service Code Setup (Single Digit)
2	<b>Extension Number</b>	11-02 : Extension Numbers 11-04 : Virtual Extension Numbers 11-06 : PGD(2)-U10 ADP (ACI) Extension Numbers 11-07 : Department Calling Group Numbers 11-08 : PGD(2)-U10 ADP (ACI) Group Pilot Numbers 11-17 : ACD Group Pilot Number
3	<b>Trunk Access Code</b>	11-09-01 : Trunk Access Code
4	<b>Special Trunk Access</b>	11-09-02 : Trunk Access Code
5	<b>Operator Access</b>	20-17 : Operator's Extension
6	<b>ARS/F-Route Access</b>	44-xx

Dial Types	Dial Type Description	Related Program
9	Dial Extension Analyze	11-20: System Numbering (Dial Extension Analyze Table)

Changing the **Dial Type** for a range of codes can have a dramatic affect on how your system operates. Assume, for example, the site is a hotel that has room numbers from 100-399. To make extension numbers correspond to room numbers, you should use Program 11-02 to reassign extension numbers on each floor from 100 to 399. (Other applications might also require you to change entries in Program 11-10 ~ 11-16.)

## 11-09 : Trunk Access Code

Level:

IN

### Description

Use **Program 11-09 : Trunk Access Code** to assign the trunk access code (normally 9). The trunk access code can be set from 1~8 digits which is defined to type 3 and 4 in Program 11-01. This is the code extension users dial to access Automatic Route Selection. The Individual Trunk Access Code is used when Trunk Group Routing is desired for an outgoing line.

#### Caution!

*The digit 9 is defined in Program 11-01 as Dial Type 3 with the Number of Digits Required set to 1. If you change the trunk access code in Program 11-09, you must make the corresponding changes in Program 11-01.*

### Input Data

Item No.	Item	Input Data	Default	Description	Related Program
01	Trunk Access Code	Dial (up to four digits)	9	Use this program to assign the trunk access code (normally 9). This is the code extension users dial to access Automatic Route Selection.	<input type="radio"/> 11-01 : System Numbering <input type="radio"/> 14-01 : Trunk Basic Data Setup <input type="radio"/> 14-05 : Trunk Group <input type="radio"/> 14-06 : Trunk Group Routing

# Program 11 : System Numbering

## *11-10 : Service Code Setup (for System Administrator)*

**Level:**

IN

### Description

Use **Program 11-10 : Service Code Setup (for System Administrator)** to customize the Service Codes for the System Administrator. You can customize additional Service Codes in Programs 11-11~11-16. The following chart shows:

- The number of each code (01~27).
- The function of the Service Code.
- The type of telephones that can use the Service Code.
- The default entry. For example, dialing (item 26) allows users to force a trunk line to disconnect.

## 11-12 : Service Code Setup (for Service Access)

**Level:**  
IN

### Description

Use **Program 11-12 : Service Code Setup (for Service Access)** to customize the Service Codes which are used for service access. You can customize additional Service Codes in Programs 11-10, 11-11, and 11-13 through 11-16.

The following chart shows:

- The number of each code (01~59).
- The function of the Service Code.
- The type of telephones that can use the Service Code.
- The default entry. For example, dialing 705 (code 05) cancels a previously set Camp-On.
- Programs that may be affected with the changing the code.

### Input Data

# Program 11 : System Numbering

## 11-17 : ACD Group Pilot Number

Level:  
IN

### Description

Use **Program 11-17 : ACD Group Pilot Number** to assign the ACD Master Number for each ACD Group. This is the number users dial to transfer calls to the ACD Group. Normally, you should use unassigned extension numbers (e.g., 500) for the master number. If you want to use an extension number which, by default, has a port number assigned (for example: in the 101~199, 3101~3257), first remove the default assignment. For example, to use extension number 125 as an ACD Master Number, first give extension port 025 a different extension assignment.

### Input Data

ACD Group Number	01~64
------------------	-------

Item No.	ACD Group Pilot Number
01	Dial (Up to eight digits)

### Default

- No ACD Group Pilot Numbers assigned to any ACD Group (1~64).

### Conditions

None

### Feature Cross Reference

- Automatic Call Distribution (ACD)
- Multiple Directory Numbers/Call Coverage Keys

# Program 11 : System Numbering

## 11-20 : Dial Extension Analyse Table

Level:

IN

---

### Description

Use **Program 11-20 : Dial Extension Analyze Table** to define the dial type based on three or more digits. This program is only relevant if digits in 11-01-01 are set to 9 (Dial Extension Analyze).

#### Input Data

Dial Extension Analyze Table	01~128
------------------------------	--------

Item No.	Dial Extension Analyze Table
01	Dial (Up to eight digits: 0, 1~9, #, *, @)
02	Type of Dials: 0 = Not used 1 = Service Code 2 = Extension Number 5 = Operator Access 6 = F-Route Access

#### Default

- Dial Extension Analyze Tables are not set at default.

#### Conditions

- When the system uses the Dial Extension Analyze Table to determine the dial type, the lower table has priority. For example, if Table 1 has 211 defined and Table 2 has 2113 defined, Table 1 is used to determine the dial type.

# Program 12 : Night Mode Setup

## 12-01 : Night Mode Function Setup

Level:  
IN

### Description

Use **Program 12-01 : Night Mode Function Setup** to set up the Night Mode options. Refer to the following chart for a description of each option, its range and default setting.

### Input Data

Item No.	Item	Input Data	Default	Description	Related Program
01	<b>Manual Night Mode Switching</b>	0 = Off 1 = On	1	Allows or prevents activating Night Service by dialing a service code.	11-10-01
02	<b>Automatic Night Mode Switching</b>	0 = Off 1 = On	0	According to a preset schedule, enable or disable Automatic Night Service for the system.	12-02 12-03 12-04

☞ Even if the operation mode is changed manually, the operation mode changes according to the schedule set up.

### Conditions

None

### Feature Cross Reference

- Night Service

# Program 12 : Night Mode Setup

## 12-02 : Automatic Night Service

**Level:**

**SA**

### Description

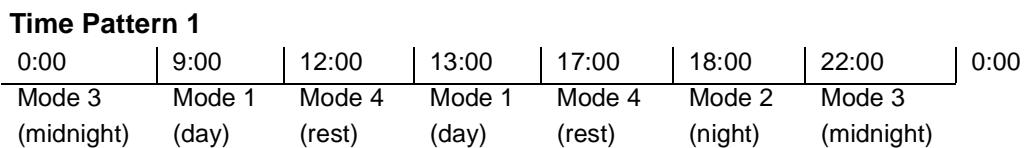

Use **Program 12-02 : Automatic Night Service Patterns** to define the daily pattern of the Automatic Mode Switching. Each Mode Group has 10 patterns. These patterns are used in Programs 12-03 and 12-04. The daily pattern consists of 20 timer settings.

#### **Input Data**

Night Mode Service Group Number	01~32
Time Pattern Number	01~10
Set Time Number	01~20

Item	Description	Input Data
01	Start Time	0000~2359
02	End Time	0000~2359
03	Operation Mode	1~8

Example:

To make the above schedule, it is necessary to set the data as follows:

Time setting 01:	00:00 to 09:00	Mode 3 (midnight)
Time setting 02:	09:00 to 12:00	Mode 1 (day)
Time setting 03:	12:00 to 13:00	Mode 4 (rest)
Time setting 04:	13:00 to 17:00	Mode 1 (day)
Time setting 05:	17:00 to 18:00	Mode 4 (rest)
Time setting 06:	18:00 to 22:00	Mode 2 (night)
Time setting 07:	22:00 to 00:00	Mode 3 (midnight)

**Time Pattern 2**

0:00	0:00
Mode 2	
(night)	

Time setting 01:      00:00 to 00:00      Mode 2 (night)

**Default**

All groups, all patterns : 00:00 to 00:00 = Mode 1

**Time Pattern 1**

<b>Set Time Number</b>	<b>Start Time</b>	<b>End Time</b>	<b>Mode</b>
01	0000	0800	2
02	0800	1700	1
03	1700	0000	2
04	0000	0000	1
:	:	:	:
20	0000	0000	1

**Time Pattern 2**

<b>Set Time Number</b>	<b>Start Time</b>	<b>End Time</b>	<b>Mode</b>
01	0000	0000	2
02	0000	0000	1
:	:	:	:
20	0000	0000	1

**Time Pattern 3**

<b>Set Time Number</b>	<b>Start Time</b>	<b>End Time</b>	<b>Mode</b>
01	0000	0000	1
:	:	:	:
20	0000	0000	1

## Program 12 : Night Mode Setup

### 12-03 : Weekly Night Service Switching

Level:

SA

#### Description

Use **Program 12-03 : Weekly Night Service Switching** to define a weekly schedule of night-switch settings.

Night Mode Service Group Number	01~32
---------------------------------	-------

Item No.	Day of the Week	Time Schedule Pattern Number
01	01 = Sunday	0~10
	02 = Monday	
	03 = Tuesday	
	04 = Wednesday	
	05 = Thursday	
	06 = Friday	
	07 = Saturday	

#### Default

Day of the Week	Time Schedule Pattern Number
01 = Sunday	2
02 = Monday	1
03 = Tuesday	1
04 = Wednesday	1
05 = Thursday	1
06 = Friday	1
07 = Saturday	2

**Conditions**

None

---

**Feature Cross Reference**

- Night Service

### 12-04 : Holiday Night Service Switching

Level:

SA

---

#### Description

Use **Program 12-04 : Holiday Night Service Switching** to define a yearly schedule of holiday night-switch settings. This schedule is used for the setting of special days when the company is expected to be closed, such as a national holiday.

#### Input Data

Night Mode Service Group Number	01~32
---------------------------------	-------

Item No.	Days and Months	Time Pattern Number
01	0101~1231 (e.g. 0101 = Jan. 1; 1231 = Dec. 31)	0~10 (0 = No Setting)

#### Default

- No setting

#### Conditions

None

---

#### Feature Cross Reference

- Night Service

## Program 12 : Night Mode Setup

### 12-05 : Night Mode Group Assignment for Extensions

Level:

IN

#### Description

Use **Program 12-05 : Night Mode Group Assignment for Extensions** to assign Day/Night Mode Group for each extension.

#### Input Data

Extension Number	Up to eight digits
------------------	--------------------

Item No.	Night Mode Service Group Number	Default
01	01~32	1

#### Conditions

None

#### Feature Cross Reference

- Night Service

## Program 12 : Night Mode Setup

### **12-06 : Night Mode Group Assignment for Trunks**

Level:

IN

---

#### Description

Use **Program 12-06 : Night Mode Group Assignment for Trunks** to assign a Day/Night Mode Group for each trunk port.

#### Input Data

Trunk Port Number	001~200
-------------------	---------

Item No.	Night Mode Service Group Number	Default
01	01~32	1

#### Conditions

None

---

#### Feature Cross Reference

- Night Service

## Program 12 : Night Mode Setup

### 12-07 : Text Data for Night Mode

Level:

IN

#### Description

Use **Program 12-07 : Text Data for Night Mode** to make an original text message which is displayed on an LCD of Multiline telephone in each Mode.

#### Input Data

Night Mode Service Group Number	01~32
---------------------------------	-------

Day/Night Mode	1~8
----------------	-----

Item No.	Text Message
01	Maximum 12 Characters (alphabetic or numeric)

#### Default

- Mode 1 = No setting
- Mode 2 = <Night>
- Mode 3 = <Midnight>
- Mode 4 = <Rest>
- Mode 5 = <Day2>
- Mode 6 = <Night2>
- Mode 7 = <Midnight2>
- Mode 8 = <Rest2>

#### Conditions

None

#### Feature Cross Reference

- Night Service

## Program 12 : Night Mode Setup

### 12-08 : Night Mode Service Range

Level:  
IN

#### Description

Use **Program 12-08 : Night Mode Service Range** to define the changing range of toggle key for each Day/Night Mode.

#### Input Data

Night Mode Service Group Number	01~32
---------------------------------	-------

Item No.	Range
01	2~8 (default = 2)

#### Example:

When Program 12-08 is set to 3 and the Mode Key is pressed (SC 751, 09 +0), the following modes are switched:

- Press once = Night
- Press twice = Mid-night
- Press third = Day
- Default = 2

#### Conditions

None

# Program 14 : Trunk, Basic Setup

## 14-01 : Basic Trunk Data Setup

Level:

IN

### Description

Use **Program 14-01 : Basic Trunk Data Setup** to set the basic options for each trunk port. Refer to the chart below for a description of each option, its range and default setting.

### Input Data

Trunk Port Number	001~200
-------------------	---------

Item No.	Item	Input Data	Default	Related Program
01	<b>Trunk Name</b> Set the names for trunks. The trunk name displays on a multiline terminal for incoming and outgoing calls.	Up to 12 Characters	Line 001 Line 002 Line 003 : Line 200	
02	<b>Transmit Level</b> Use this option to select the CODEC gain for the trunk. The option sets the gain (signal amplification) for the trunk you are programming.	1~63 (-15.5dB~+15.5dB in 0.5dB intervals)	32 (0dB)	
03	<b>Receive Level</b> Use this option to select the CODEC gain for the trunk. The option sets the gain (signal amplification) for the trunk you are programming.	1~63 (-15.5dB ~+15.5dB in 0.5dB intervals)	32 (0dB)	

Program

14

Item No.	Item	Input Data	Default	Related Program
04	<b>Transmit Gain Level for Conference and Transfer Calls</b>  Use this option to select the CODEC gain type used by the trunk when it is part of an Unsupervised Conference.	1~63 (-15.5dB ~ +15.5dB in 0.5dB intervals)	32 (0dB)	
05	<b>Receive Gain Level for Conference and Transfer Calls</b>  Use this option to select the CODEC gain type used by the trunk when it is part of an Unsupervised Conference.	1~63 (-15.5dB ~ +15.5dB in 0.5dB intervals)	16 (-8dB)	
06	<b>SMDR Printout</b>  Use this option to have the system include/exclude the trunk you are programming from the SMDR printout. Refer to Program 35-01 and 35-02 for SMDR printout options.	0 = No Print Out 1 = Prints Out	0	35-01 35-02
07	<b>Outgoing Calls</b>  Use this option to allow/prevent outgoing calls on the trunk you are programming.	0 = Deny (No) 1 = Allow (Yes)	1	
08	<b>Toll Restriction</b>  Use this option to enable/disabled Toll Restriction for the trunk. If enabled, the trunk follows Toll Restriction programming (example: Programs 21-05, 21-06). If disabled, the trunk is a toll free line.	0 = Restriction Disabled (No) 1 = Restriction Enabled (Yes)	1	21-04 21-05 21-06

Item No.	Item	Input Data	Default	Related Program
09	<b>Private Line</b>	0 = Disable Private Line (Normal) 1 = Enable Private Line (Private Line)	0	
10	<b>DTMF Tones for Outgoing Calls</b>  Use this option to enable (1) or disable (0) DTMF tones for outgoing trunk calls.	0 = Disable (No) 1 = Enable (Yes)	0	
11	<b>Account Code Required</b>	0 = Disable (No) 1 = Enable (Yes)	1	
12	<b>--- Not Used ---</b>			
13	<b>Trunk-to-Trunk Transfer</b>  Use this option to enable (1) or disable (0) loop supervision for the trunk. This option is required for Call Forwarding Off-Premise and Tandem Trunking only.	0 = Disable (No) 1 = Enable (Yes)	1	
14	<b>Long Conversation Cutoff</b>  Use this option to enable or disable the Long Conversation Cutoff feature for each trunk.	0 = Disable (No) 1 = Enable (Yes)	0	20-21-03 20-21-04
15	<b>Long Conversation Alarm Before Cutoff</b>  Use this option to enable or disable the Long Conversation Alarm for each trunk.	0 = Disable (No) 1 = Enable (Yes)	0	20-21-01 20-21-02

Item No.	Item	Input Data	Default	Related Program
16	<p><b>Forced Release of Held Call</b></p> <p>Use this option to enable/disable forced release for calls on Hold. If enabled, the system disconnects a call if it is on Hold longer than a programmed interval (Program 24-01-05). If disabled, forced disconnection does not occur. Program 24-01-01 also affects this option.</p>	0 = Disable (No) 1 = Enable (Yes)	0	24-01-01 24-01-05
17	<p><b>Trunk to Trunk Warning Tone for Long Conversation Alarm</b></p> <p>Use this option to enable or disable the Warning Tone for Long Conversation feature for DISA callers.</p>	0 = Disable (No) 1 = Enable (Yes)	0	
18	<b>Warning Beep Tone Signaling</b>	0 = Disable (No) 1 = Enable (Yes)	0	
19	<p><b>Privacy Mode Toggle Option</b></p> <p>Use this option to enable or disable a trunk ability to be switched from private to non-private mode by pressing the line key or Privacy Release function key.</p>	0 = Disable (No) 1 = Enable (Yes)	0	

Item No.	Item	Input Data	Default	Related Program
20	<b>Block Outgoing Caller ID</b> Allow (1) or prevent (0) the system from automatically blocking outgoing Caller ID information when a user places a call. If allowed (i.e. block, enabled), the system automatically inserts the Caller ID block code (defined in 14-01-21) before the user dialed digits.	0 = Disable (No) 1 = Enable (Yes)	0	14-01-21
21	<b>Caller ID Block Code</b> Enter the code, up to 8 digits, that should be used as the Caller ID Block Code. This code is automatically inserted before dialed digits if Program 14-01-20 is set to 1.	Dial (up to eight digits)	*67	14-01-20
22	<b>Caller ID to Voice Mail</b> Enable or disable the system ability to send the Caller ID digits (Remote Log-On Protocol) to voice mail.	0 = Disable (No) 1 = Enable (Yes)	0	
23	<b>--- Not Used ---</b>			
24	<b>Trunk-to-Trunk Outgoing Caller ID through Mode</b> Enable (1) or Disable (0) the ability to send the original Caller ID through when the call is Forward Off-Premise.	0 = Disable (No) 1 = Enable (Yes)	0	

Item No.	Item	Input Data	Default	Related Program
25	<b>Continued/ Discontinued Trunk-to-Trunk Conversation</b>  Enable (1) or Disable (0) the ability to dial a service code code to continue or disconnect the Trunk-to-Trunk conversation after the alert tone is heard.	0 = Disable (No) 1 = Enable (Yes)	0	20-28-01 20-28-02 20-28-03 24-02-07 24-02-10 25-07-07 25-07-08

# Program 14 : Trunk, Basic Setup

## 14-02 : Analog Trunk Data Setup

**Level:**  
IN

### Description

Use **Program 14-02 : Analog Trunk Data Setup** to set the basic options for each analog trunk port. Refer to the table below for a description of each option, its range and default setting.

#### Input Data

Trunk Port Number	001~200
-------------------	---------

Item No.	Item	Input Data	Default	Related Program
01	<b>Signaling Type (DP/DTMF)</b>  This option sets the signaling type for the trunk.	0 = Dial Pulse (10 PPS) 1 = Dial Pulse (20 PPS) 2 = DTMF	2	
02	<b>Ring Detect Type</b>  This option sets Extended Ring Detect or Immediate Ring Detect for the trunk. For T1 loop/ground start trunks, this option must be set to 1 for the trunks to ring and light correctly.	0 = Normal/delayed 1 = Immediate Ringing	1	
03	<b>Flash Type</b>  This option selects the flash type (open loop flash or ground). Always set this option for open loop flash.	0 = Open Loop Flash 1 = Ground	0	
04	<b>Hooking Type</b>  This option lets you use Flash for Timed Flash (Program 81-01-14) or Disconnect (Program 81-01-15). (A user implements Flash by pressing the FLASH key while on a trunk call.)	0 = Timed Flash (Hooking) 1 = Disconnect (Cut)	0	81-10-07 81-10-08
05	<b>Dial Tone Detection for Manually Accessed Trunks</b>  Use this option enable/disable dial tone detection for directly accessed trunks. If disabled, the system outdials on the trunks without monitoring for dial tone.	0 = Dial Tone Detection Not Used 1 = Dial Tone Detection Used	0	21-01-04

Item No.	Item	Input Data	Default	Related Program
06	<b>Pause at 1st Digit after Line Seize in Manual Dial Mode</b>	0 = No Pause (No) 1 = Pause (Yes)	1	21-01-06
07	<b>DP to DTMF Conversion Options</b>  Determine how a user can convert a Dial Pulse (DP) call to a DTMF call. For each trunk, set the type of DP to DTMF conversion required. There are three conversion options: Automatic (0), Automatic and Manual (1), or Manual (2).  <i>Automatic:</i> DP to DTMF conversion occurs automatically if the extension user waits more than 10 seconds before dialing the next digit.  <i>Automatic and Manual:</i> DP to DTMF conversion occurs automatically if the extension user waits more than 10 seconds before dialing the next digit. In addition, the user can dial # to switch a DP trunk to DTMF dialing.  <i>Manual:</i> Users can dial # to switch a DP trunk to DTMF dialing.	0 = Automatic 1 = Automatic and Manual 2 = Manual	2	21-01-03
08	<b>Answering Condition</b>	0 = Polarity Reversing (Polarity) 1 = Polarity Reversing or Timer (Int Digit)	1	21-01-03
09	<b>Busy Tone Detection</b>	0 = Disable (No) 1 = Enable (Yes)	0	
10	<b>Caller ID</b>  Enable or disable a trunk to receive Caller ID information.	0 = No 1 = Yes	0	
11	<b>Next Trunk in Rotary if No Dial Tone</b>  Use this option to enable/disable the system ability to skip over a trunk if dial tone is not detected. This option pertains to calls placed using Speed Dial, ARS, Last Number Redial or Save Number dialed. It does not pertain to line key or Direct Trunk Access calls.	0 = Disable (No) 1 = Enable (Yes)	0	
12	<b>Detect Network Disconnect Signal</b>	0 = Disable (No) 1 = Enable (Yes)	1	

Item No.	Item	Input Data	Default	Related Program
13	<b>Trunk-to-Trunk Limitation</b>	0 = Disable (No) 1 = Enable (Yes)	0

# Program 14 : Trunk, Basic Setup

## 14-04 : Behind PBX Setup

Level:  
IN

### Description

Use **Program 14-04 : Behind PBX Setup** to indicate if the trunk is installed behind a PBX. There is one item for each mode.

### Input Data

Trunk Port Number	1~200
-------------------	-------

Item No.	Day/Night Mode	Type of Connection	Default	Related Program
01	1~8	0 = Stand Alone (Trunk) 1 = Behind PBX (PBX) 2 = Not Used 3 = CTX assume 9	0	22-02

### Conditions

None

### Feature Cross Reference

- Central Office Calls, Placing

# Program 14 : Trunk, Basic Setup

## 14-05 : Trunk Group

Level:

IN

### Description

Use **Program 14-05 : Trunk Group** to assign trunks to Trunk Groups. You can also assign the outbound priority for trunks within the group. When users dial up the trunk group, they seize the trunks in the order you specify in the outbound priority entry.

### Input Data

Trunk Port Number	001~200
-------------------	---------

Item No.	Trunk Group Number	Priority Number
01	0~100	1~200

### Default

Trunk Port	Group	Priority
1	1	1
:	:	:
200	1	200

### Conditions

None

---

### Feature Cross Reference

- Trunk Groups

# Program 14 : Trunk, Basic Setup

## 14-06 : Trunk Group Routing

Level:  
IN

### Description

Use **Program 14-06 : Trunk Group Routing** to set up an outbound routing table for the trunk groups you assigned in Program 14-05. When users dial 9, the system routes their calls in the order (priority) specified. For example, if a user dials 9 and all calls in the first group are busy, the system may route the call to another group. Trunk Access Map programming (Programs 14-07) may limit this option. The system contains 100 routing tables for trunk access. Each table has four priority orders for trunk access. There are 100 available Trunk Group Numbers.

Example for setting:

With less than four trunk groups,

Route Number 1 : Order 1 – Trunk Group 1  
                          : Order 2 – Trunk Group 2

For the above setting, if all the lines in trunk group 1 are busy, the system searches for an idle line in trunk group 2.

With more than four trunk groups,

Route Number 1 : Order 1 – Trunk Group 1  
                          : Order 2 – Trunk Group 2  
                          : Order 3 – Trunk Group 3  
                          : Order 4 – 1002 (Jump To Route Number 2)  
Route Number 2 : Order 1 – Trunk Group 4  
                          : Order 2 – Trunk Group 5

For the above setting, if all the lines in the trunk groups 1, 2 and 3 are busy, the system searches for an idle line in trunk groups 4 and 5.

**Input Data**

Route Table Number	001~100
--------------------	---------

Item No.	Priority Order Number	Input Data	Related Program
01	1~4	0 = Not Specify 1~100 : (Trunk Group Number) 1001~1100 : (1000 + Route Table Number)	14-01-07 14-05 15-01-02 21-02

**Default**

- Route 1, Order Number 1 = 1 (Trunk Group 1).
- Order Numbers 2, 3, 4 = 0 (Not Specified).
- All Other Routes (2~100) and Order Numbers (1~4) = 0 (Not Specified).

# Program 14 : Trunk, Basic Setup

## 14-07 : Trunk Access Map Setup

Level:  
IN

### Description

Use **Program 14-07 : Trunk Access Map Setup** to set up the Trunk Access Maps. This sets an extension access options for trunks. For example, an extension can only place outgoing calls on trunks to which it has outgoing access. There are 200 Access Maps with all 200 trunk ports programmed in Map 1 with full access.

An extension can use one of the maps you set up in this program. Use Program 15-06 to assign Trunk Access Maps to extensions. Each trunk can have one of eight access options for each Access Map.

### Input Data

Access Map Number	001~200
-------------------	---------

Item No.	Trunk Port Number	Input Data
01	001~200	<p>0 = No access 1 = Outgoing access only 2 = Incoming access only 3 = Access only when trunk on Hold 4 = Outgoing access and access when trunk on Hold 5 = Incoming access and access when trunk on Hold 6 = Incoming and Outgoing access 7 = Incoming access, outgoing access and access when trunk on Hold</p>

### Default

- Access Maps 1~200 = Trunk Ports 1~200 assigned with option 7 access (incoming and outgoing access and access when trunk is on Hold).

**Conditions**

None

---

# Program 15 : Extension, Basic Setup

## 15-01 : Basic Extension Data Setup

Level:

SA

### Description

Use **Program 15-01 : Basic Extension Data Setup** to define the basic settings for each extension.

#### Input Data

Extension Number	Maximum eight digits
------------------	----------------------

Item No.	Item	Input Data	Default	Related Program
01	<b>Extension Name</b> Define the extension/virtual extension name.	Up to 12 Characters	STA 101 = Ext 101 STA 102 = Ext 102, etc.	
02	<b>Outgoing Trunk Line Preference</b> Use this option to set the extension outgoing Trunk Line Preference. If enabled, the extension user receives trunk dial tone when they lift the handset. The user hears trunk dial tone only if allowed by Trunk Access Map programming (Programs 14-07 and 15-06). Refer to the Line Preference feature for more details.	0 = Off 1 = On	0	14-06 21-02
03	<b>SMDR Printout</b> Use this option to include or exclude the extension in the SMDR report.	0 = Do not print on SMDR report 1 = Include on SMDR report	1	

Item No.	Item	Input Data	Default	Related Program
04	<b>ISDN Caller ID</b> If both Program 15-01-04 and 10-03-05 are enabled, the system includes Caller ID in the Setup message as Presentation Allowed. If these options are disabled, it is Presentation Restricted.	0 = Disable 1 = Enable	1	10-03-05
05	<b>Restriction for Outgoing Disable on Incoming Line</b> Enable or disable supervised dial detection for an extension.	0 = No 1 = Yes	0	21-01-15 21-01-16 21-01-17
07	<b>Do-Not-Call</b>	0 = Off 1 = On	0	21-01-19
08	<b>Call Attendant Busy Message</b>	0~100 (0 = No setting)	0	11-11-59 40-10-08
09	<b>Call Attendant Answer Message</b>	0~100 (0 = No setting)	0	11-11-60 40-10-09

# Program 15 : Extension, Basic Setup

## 15-02 : Multiline Telephone Basic Data Setup

**Level:**  
IN

### Description

Use **Program 15-02 : Multiline Telephone Basic Data Setup** to set up various Multiline telephone options.

#### Input Data

Extension Number	Maximum eight digits
------------------	----------------------

Item No.	Item	Input Data	Default	Related Program
01	<b>Display Language Selection</b> (To select options 8~10, press either 8 or Recall, then press line keys 1~3. Key 1 is option 8, Key 2 is option 9, and Key 3 is option 10.)	0 = Japanese 1 = English 2 = German 3 = French 4 = Italian 5 = Spanish 6 = Dutch 7 = Portuguese 8 = Norwegian 9 = Danish 10 = Swedish 11 = Turkish 12 = Latin American Spanish 13 = Romanian 14 = Polish	1	11-11-13
02	<b>Trunk Ring Tone</b> Use this option to set the tone (pitch) of the incoming trunk ring for the extension port you are programming. <small>☞ DTU/DTP style telephones only follow high, medium and low range ring tone settings. They do not follow Melodies.</small>	1 = High 2 = Medium 3 = Low 4 = Ring Tone 1 5 = Ring Tone 2 6 = Ring Tone 3 7 = Ring Tone 4 8 = Ring Tone 5	2	22-03

Item No.	Item	Input Data	Default	Related Program
03	<b>Extension Ring Tone</b> Use this option to set the tone (pitch) of the incoming extension call ring for the extension port you are programming. Also see program 15-08.  <i>DTU/DTP style telephones only follow high, medium and low range ring tone settings. They do not follow Melodies.</i>	1 = High 2 = Medium 3 = Low 4 = Ring Tone 1 5 = Ring Tone 2 6 = Ring Tone 3 7 = Ring Tone 4 8 = Ring Tone 5	8	
04	<b>Redial (Speed Dial) Control</b> Use this option to control the function of the extension Redial key when used with Speed Dialing. The Redial key can access either the Common or Group Speed Dialing numbers.	0 = Common and Individual Speed Dialing 1 = Group Speed Dialing	0	
05	<b>Transfer Key Operation Mode</b> Use this option to set the operating mode of the extension CONF key. The keys can be for Call Transfer, Serial Calling or Flash. When selecting the Flash option (selection 2), refer also to Program 81-01-14.	0 = Transfer 1 = Call back 2 = Hook	0	
06	<b>Hold Key Operating Mode</b> Use this option to set the function of the Multiline Hold key. The Hold key can activate normal Hold or Exclusive Hold.	0 = Normal (Common) 1 = Exclusive Hold	0	
07	<b>Automatic Hold for CO Lines</b> When talking on a CO call and another CO line key is pressed, the original trunk is placed on Hold (0) or Disconnected (1)	0 = Hold 1 = Disconnect (Cut)	1	
08	<b>Automatic Handsfree</b> Use this option to set whether pressing a key accesses a One-Touch Key or if it preselects the key.	0 = Preselect 1 = One-Touch (Automatic Handsfree)	1	
10	<b>Ringing Line Preference for Trunk Calls</b> Use this option to select between Idle and Ringing Line Preference for trunk calls.	0 = Idle (Off) 1 = Ringing (On)	1	

Item No.	Item	Input Data	Default	Related Program
11	<b>Callback Automatic Answer</b> Use this option to enable or disable automatic answer of calls recalling to a station. For example, if a Transfer Recall or Hold Recall is ringing back to a station, the following happens: If PRG 15-02-11 is enabled, the station will automatically answer the recall when it goes off-hook. If PRG 15-02-11 is disabled, a station will not automatically answer the recall when it goes off-hook. The user must first press the line appearance of the recalling call or press the answer key.	0 = Off 1 = On	1	
12	<b>Off-Hook Ringing</b> Use this option to set the telephone Off-Hook signaling. Off-hook signaling occurs when a telephone user receives a second call while busy on a handset call. To enable/disable Off-Hook Signaling for an extension Class of Service, use Program 20-13-06.	0 = Muted Off-Hook Ringing 1 = No Off-Hook Ringing 2 = Not Used 3 = Beep in Speaker (SP) 4 = Beep in Handset (HS) 5 = Speaker & Handset Beep	5	
13	<b>Redial List Mode</b> Select whether the Redial List feature should store internal and external numbers (0), or only external numbers (1).	0 = ICM/Trunk (Extension/Trunk Mode) 1 = Trunk Mode	1	
15	<b>Storage of Caller-ID for answered call</b>	0 = Disable (Off) 1 = Enable (On)	1	
16	<b>Handsfree Operation</b> Enable or disable an extension ability to use the speakerphone on <b>outside</b> calls. When disabled, users can hear the conversation, but cannot respond handsfree.	0 = Disable (Off) 1 = Enable (On)	1	
18	<b>Power-Saving Mode</b>	0 = Normal mode 1 = Power-Saving Mode (Eco-Mode)	1	20-02-10
19	<b>CTA Data Communication Mode</b> Select 0 if the dip switch settings on the CTA Adapter are set to PC connection (1=on, 2~8=off) or select 1 if the DIP switches are set to printer connection (1~2=on, 3~8=off).	0 = CTI Mode 1 = Non Procedural Mode (Non-SCS)	0	15-02-20

Item No.	Item	Input Data	Default	Related Program
20	<b>Baud Rate for CTA Port</b> Select the baud rate to be used by the CTA Adapter.	0 = 4800 1 = 9600 2 = 19200	2	15-02-19
21	<b>Virtual Extension Access Mode (when idle Virtual Extension key pressed)</b>  Determine whether a Virtual Extension/Call Arrival Key(CAR) should function as a DSS key, a Virtual Extension, or a CAR key. When DSS (0) is selected, the key functions as a DSS key to the extension and for incoming calls to that extension. When Outgoing (1) is selected, the key functions as a virtual extension and can be used for incoming and outgoing calls. When Ignore (2) is selected, the key functions as a CAR key and can receive incoming calls only.	0 = DSS 1 = Outgoing (OTG) 2 = Ignore	2	
22	<b>Multiple Incoming From Intercom and Trunk</b>  If enabled, this affects how a Hotline key lights, based on the setting in Program 22-01-01. If 22-01-01 is set to 1 for trunk priority, the Hotline key lights solid when a trunk call rings in. If 22-01-01 is set to 0 for intercom priority, the Hotline key does not light for incoming trunk calls, but lights solid for intercom calls.  If 15-02-22 is disabled, Hotline keys light solid for any incoming calls regardless of the setting in Program 22-01-01.	0 = Disable 1 = Enable	1	22-01-01
23	<b>Speed Dial Preview Mode</b>  This option defines how a speed dial key functions when pressed. If set to Preview (0), the speed dial number can be previewed before dialing. If set to Outgoing Immediate (1), the number is dialed immediately.	0 = Preview 1 = Outgoing Immediately	0	

Item No.	Item	Input Data	Default	Related Program
24	<b>Conference Key Mode</b> This option allows an extension Conf key to be programmed for Conference or for Transfer. When set for Transfer (1), the user places a call on hold, dials the extension to which it should be transferred, then presses the Conf key. The call is then transferred. When set for Conference (0), with an active call, the user presses the Conf key, places a second call, then presses the Conf key twice. All the calls are then connected.	0 = Conference 1 = Transfer	0	
26	<b>MSG Key Operation Mode</b> Determine whether an extension MSG key should function as a Message key or Voice Mail key. If set as a Message key, users can press the key to call the voice mail only when they have new messages.	0 = Message Key 1 = Voice Mail Key	0	
27	<b>Handset Volume</b> Determine how an extension handset volume is set after it is adjusted during a call.   <i>When 1 is assigned in this program and a user sets the volume to maximum, the volume is reset to a level to meet FCC standards when the user hangs up.</i>	0 = Back to Default (Back) 1 = Stay at previous level (Stay)	1	
28	<b>Message Waiting Lamp Color</b> Determine whether an extension Message Waiting Lamp lights Green (0) or Red (1) when a message is received.	0 = Green 1 = Red	1	15-02-35 15-02-36 15-02-37 15-02-38
29	<b>PB Back Tone Level</b> This program allows adjustment of the PB Back Tone Level when you are calling an ISDN Line.	1~63 (-15.5dB ~ +15.5dB)	32 (0dB)	
30	<b>Toll Restriction Class</b> Select the Toll Restriction Class to be used when placing a call from a virtual extension.	0 = Vir. Ext. (Virtual Extension Class) 1 = Real Ext. (Real Extension Class)	1	

Item No.	Item	Input Data	Default	Related Program
34	<b>Call Register Mode</b> The Caller ID Scroll stores Trunk calls only (0), or both Internal and Trunk calls (1).	0 = Trunk Mode 1 = Extension/Trunk Mode	0	
35	<b>Message Waiting Lamp Cycle for Calling Extension</b>  Select the cycle method that the Large LED flashes when the extension has set Message Waiting.	1 = Cycle 1 2 = Cycle 2 3 = Cycle 3 4 = Cycle 4 5 = Cycle 5 6 = Cycle 6 7 = Cycle 7	7	15-02-28 15-02-36 15-02-37 15-02-38
36	<b>Message Waiting Lamp Cycle for Called Extension</b>  Select the cycle method that the Large LED flashes when the extension has Message Waiting set to the extension.	1 = Cycle 1 2 = Cycle 2 3 = Cycle 3 4 = Cycle 4 5 = Cycle 5 6 = Cycle 6 7 = Cycle 7	3	15-02-28 15-02-35 15-02-37 15-02-38
37	<b>Voice Mail Message Wait Lamp Color</b>  Select the color of the Large LED when a voice mail message is waiting at the extension.	0 = Green 1 = Red	1	15-02-28 15-02-35 15-02-36 15-02-38
38	<b>Voice Mail Message Wait Lamp Cycle</b>  Select the cycle method that the Large LED flashes when the extension has a VM Message Waiting set to the extension.	1 = Cycle 1 2 = Cycle 2 3 = Cycle 3 4 = Cycle 4 5 = Cycle 5 6 = Cycle 6 7 = Cycle 7	3	15-02-28 15-02-35 15-02-36 15-02-37
40	<b>Additional Dial for Caller ID Call Return</b>  Enter the digits to be dialed in front of the Caller ID when using the Caller ID Return function.	Up to four digits (0, 1~9, #, *)		10-02-04
41	<b>Incoming Ring Setup</b>	0 = Speaker Normal Ring 1 = Headset Ring	0	
42	<b>Incoming Off-Hook Ring Setup</b>	0 = Speaker Off-Hook Ring 1 = Headset Off-Hook Ring	0	

Item No.	Item	Input Data	Default	Related Program
43	<b>Headset Ring Duration</b>  The display on the DT300/DT700 style telephones can be set to Normal (0) or Reversed (1).	0 = No Switch to Speaker Ring 1 = 10 seconds 2 = 20 seconds 3 = 30 seconds 4 = 40 seconds 5 = 50 seconds 6 = 1 minute	0	
44	<b>Reversing Display Indication</b>  On the DT300/DT700 style phones Name and Number Line (2), Calender Line (1) or No Line (0) set to has double height characters.	0 = Normal Indication 1 = Reversing Indication	0	
45	<b>Double Height Character Indication</b>  On the DT300/DT700 style phones set how long the Backlight LCD stays on.	0 = Normal Indication 1 = Double height character indication of calendar display line 2 = Double height character indication of name and number display line	0

# Program 15 : Extension, Basic Setup

## 15-03 : Single Line Telephone Basic Data Setup

**Level:**  
IN

### Description

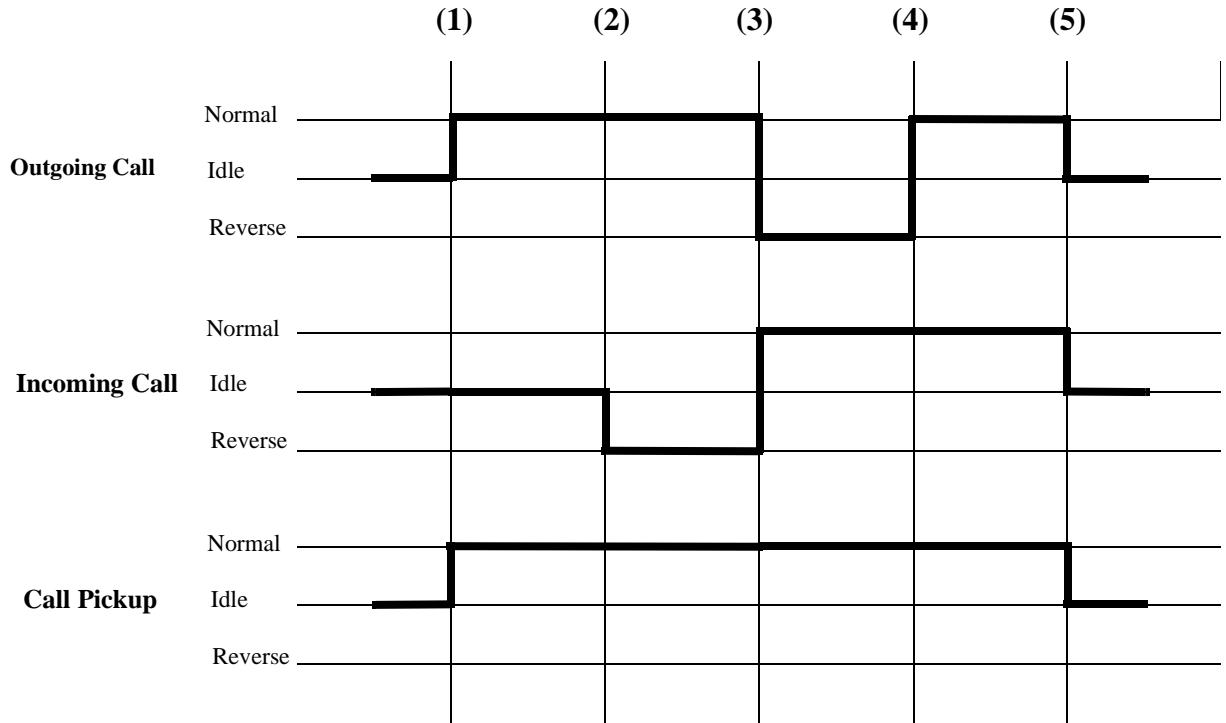

Use **Program 15-03 : Single Line Telephone Basic Data Setup** to set up various single line telephone options.

#### Input Data

Extension Number	Maximum eight digits
------------------	----------------------

Item No	Item	Input Data	Default	Related Program
01	<b>SLT Signaling Type</b> Use this option to tell the system the type of dialing the connected telephone uses. For the UNIVERGE SV8100 Wireless telephones to function correctly, this must be set to 0 (dial pulse). If this option is set for DTMF, after an outside call is placed, the system cannot dial any additional digits. This program change is automatically performed when the UNIVERGE SV8100 Wireless telephone is registered when using system software 1.13+. When upgrading software from prior versions, the previous default of 1 is saved from the prior database so this option must be changed manually.	0 = DP 1 = DTMF	1	15-03-03 45-01-01
03	<b>Terminal Type</b> Enter 1 for this option to allow a single line port to receive DTMF tones after the initial call setup. Enter 0 to have the port ignore DTMF tones after the initial call setup. For Voice Mail, always enter 1 (e.g., receive DTMF tones).	0 = Normal 1 = Special	0	15-03-01 45-01-01
04	<b>Flashing</b> Enables/disables Flash for single line (500/2500 type) telephones.	0 = No 1 = Yes	1	
05	<b>Trunk Polarity Reverse</b> Not Used in U.S. – Do Not Change Default Entry as DTMF issues may arise with voice mail.	0 = Off 1 = On	0	

Item No	Item	Input Data	Default	Related Program

## 15-05 : IP Telephone Terminal Basic Data Setup

**Level:**

IN

### Description

Use **Program 15-05 : IP Telephone Terminal Basic Data Setup** to set up the basic settings for an IP telephone.

#### Input Data

Extension Number	Maximum eight digits
------------------	----------------------

Item No.	Item	Input Data	Default	Description	Related Program
01	Terminal Type	0 = NGT 1 = H.323 2 = SIP 3 = MEGACO 4 = SIP-MLT	0	Viewing Only – No changes permitted	
02	IP Phone Fixed Port Assignment	MAC address 00-00-00-00-00-00 to FF-FF-FF-FF-FF-FF	00-00-00-00-00-00	MAC Address of registered MLT SIP phone is stored and/or can input the MAC address of an MLT SIP phone so when it comes online it will be provided with the extension in which the MAC address matches.	15-05-01
04	Nickname	Up to 48 characters	No setting	Nickname section on Invite message. Example: Extension 100 has a Nickname set to PAUL. Extension 101 has command 15-05-17 set to Nickname. The inbound call to extension 101, from 100, will show PAUL.	15-05-17
07	Using IP Address	0.0.0.0~255.255.255.255	0.0.0.0	Informational Only registered IP Phones	15-05-01
15	CODEC Type	1-Type 1 2-Type 2 3-Type 3 4-Type 4 5-Type 5	1	Assign the CODEC Type of the MLT SIP.	84-24-XX

Item No.	Item	Input Data	Default	Description	Related Program
16	<b>Authentication Password</b>	Up to 24 characters	None	Assign the authentication password for SIP single line telephones.	15-05-01
17	<b>Calling Party Display Info</b>	0 = Nickname 1 = Display Name 2 = User Part 3 = Extension	0	The part of the Invite message the calling party information is taken from. There are four choices:  <b>Nickname:</b> Displays the nickname programmed in 15-05-04.  <b>Display Name:</b> Some SIP phones have a Field called "Display Name". If configured, in the SIP phone, this will display upon a call from that station.  <b>User Part:</b> Some SIP phones have a field called "User Part". If configured in the SIP phone, this will display upon a call from that station.  <b>Extension:</b> Display shows extension of the SIP phone.	
18	<b>IP Duplication Allowed Group</b>	0 = Not Used 1 = Group 1 2 = Group 2 3 = Group 3 4 = Group 4 5 = Group 5 6 = Group 6 7 = Group 7 8 = Group 8 9 = Group 9 10 = Group 10	0	If there is an adapter that has one IP address coming into it but has multiple extensions off of it. Assign all the extensions to a group so that way the CPU knows that the one IP address is assigned to multiple extensions.	15-05-01
19	<b>Side Option Information</b>	0 = No Option 1 = 8LK Unit 2 = 16LK Unit	0	This is a read only program that shows what type of Line Key unit is installed on the ITH-style telephone.	10-03-09 15-05-22
20	<b>Bottom Option Information</b>	0 = No Option 1 = ADA	0	This is a read only program that shows what type of adapter is installed on the ITH-style telephone.	10-03-10
21	<b>Handset Option Information</b>	0 = Normal Handset 1 = Handset for power failure (PSA/PSD)	0	This is a read only program that shows what type of Handset is installed on the ITH-style telephone.	10-03-11 15-05-23

Item No.	Item	Input Data	Default	Description	Related Program
22	<b>Side Option Additional Data</b>	0 = No Setting 1~32 = DSS Console number	0	This is a read only program that shows the DSS console number when one is installed on a ITH-style telephone.	30-01 30-02 30-03 30-04 30-05 30-06
23	<b>Handset Option Additional Information</b>	0 = No Setting 1~16 = Number of Bluetooth Handset Cordless (BTH)	0		
24	<b>Protection Service</b>	0 = Not Used 1 = Used	0	When this is enabled it allows the MLT SIP telephones to use the "security" key. If disabled, and the key is pressed, nothing happens.	90-40-01 90-40-02
26	<b>SIP-MLT Terminal Type</b>	0 = Not Set 1 = ITL-**E-1D/IP-*E-1 2 = ITL-**D-1D/ITL-24BT1D/ITL- 4PA-1D [without 8LKI(LCD)-L] 3 = ITL-**D-1D/ITL-24BT1D/ITL-24PA-1D [with 8LKI(LCD)-L] 4 = ITL-320C-1 5 = Softphone 6 = CTI 7 = AGW	0		
27	<b>Personal ID Index</b>	0~512	0	Used when the SIP Multiline telephone is using manual/ auto registration. Assign each phone a unique personal index. Then go to command 84-22 to assign the user name and password.	84-22-XX
28	<b>Addition Information Setup</b>	0 = Disable 1 = Enable	0		
29	<b>Terminal WAN-side IP Address</b>	0.0.0~255.255.255.255	0.0.0.0		
30	<b>DTMF playing during call</b>	0 = Not Play 1 = Play	0		
31	<b>Warning tone during call</b>	0 = Not Ringing 1 = Ringing	1		

Item No.	Item	Input Data	Default	Description	Related Program
32	Dial Key Talkie	0 = Not Used 1 = Used	0		
33	LAN Side IP Address of Terminal	0.0.0.0~255.255.255.255	0.0.0.0.	Read-only	
34	Terminal Touch Panel On/Off	0 = Off 1 = On	1	Used on ITL-32OC-1 (BK) TEL ???

## 15-07 : Programmable Function Keys

Level:  
SA

### Description

Use **Program 15-07 : Programmable Function Keys** to assign functions to a multiline terminal line keys.

For certain functions, you can append data to the key basic function. For example, the function 26 appended by data 1 makes a Group Call Pickup key for Pickup Group 1. You can also program Function Keys using Service Codes.

To clear any previously programmed key, press **000** to erase any displayed code.

### Input Data

Extension Number	Maximum eight digits
------------------	----------------------

### Default Settings

Line Key	Function Number	Additional Data
LK01	*01 (Trunk Line Key)	1
:	:	:
LK06	*01 (Trunk Line Key)	6
LK07	0 (No Setting)	0
:	:	:
LK48	0 (No Setting)	0

Item No.	Line Key Number	Function Number	Additional Data

LED Pattern 0 : [OFF]

LED Pattern 1 : [FL: On(500ms)/Off(500ms)]

LED Pattern 2 : [WK: On(250ms)/Off(250ms)]

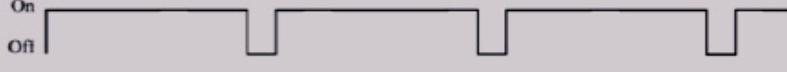

LED Pattern 3 : [RW: On(125ms)/Off(125ms)]

LED Pattern 4 : [IR: On(125ms)/Off(125ms)/On(125ms)/Off(625ms)]

LED Pattern 5 : [IL: On(875ms)/Off(125ms)]

LED Pattern 6 : [IW: On(625ms)/Off(125ms)/On(125ms)/Off(125ms)]

LED Pattern 7 : [ON]

### LED Indication Reference:

ON = LED pattern 7 (On).

OFF = LED pattern 0 (Off).

Rapid Blink = LED pattern 3 (RW).

Slow Blink (General Function Level) = LED pattern 5 (IL).

Slow Blink (Appearance Function Level) = LED pattern 1 (FL).

Fast Blink = LED pattern 3 (RW).

Stutter Blink = LED pattern 4 (IR).

**Conditions**

- When a key is programmed using service code 752, that key cannot be programmed with a function using the 751 code until the key is undefined (000). For example with a Park Key programmed by dialing 752 + \*04 must be undefined by dialing 752 + 000 before it can be programmed as a Voice Over key by dialing 751 + 48.
- When assigning a CAP key, \*08, an orbit number must be used. If orbit 000 is used, it automatically assigns the next available orbit.

---

**Feature Cross Reference**

- Refer to [Function Number List](#).

**THIS PAGE INTENTIONALLY LEFT BLANK**

# Program 15 : Extension, Basic Setup

## 15-08 : Incoming Virtual Extension Ring Tone Setup

Level:

IN

### Description

Use **Program 15-08 : Incoming Virtual Extension Ring Tone Setup** to assign a ring tone range (0~4) to incoming virtual extensions assigned to a Virtual Extension key (Program 15-07). If you enable ringing for the key in Program 15-09, the key rings with the tone you set in this program. Also see Program 22-03. The chart below shows the available tones. There are 256 available extension ports.

### Input Data

Extension Number	Maximum eight digits
------------------	----------------------

Item No.	Incoming Ring Pattern	Default	Description
01	0 = Tone Pattern 1 1 = Tone Pattern 2 2 = Tone Pattern 3 3 = Tone Pattern 4 4 = Incoming Ring Tone Extension	0 = Tone Pattern 1	When an extension or a virtual extension is assigned to the function key on the key telephone, select the ring tone when receiving a call on that key.  For ACD CAR keys, only tone pattern 1 (entry 0) can be used. The remaining patterns are not checked with this feature.

**Table 2-5 Program 15-08 – Incoming Signal Frequency Patterns**

Incoming Signal Frequency Pattern	Type	Frequency 1	Frequency 2	Modulation
Pattern 1	High Middle Low	1100 660 520	1400 760 660	16Hz 16Hz 16Hz
Pattern 2	High Middle Low	1100 660 520	1400 760 660	8Hz 8Hz 8Hz
Pattern 3	High Middle Low	2000 1400 1100	760 660 540	16Hz 16Hz 16Hz
Pattern 4	High Middle Low	2000 1400 1100	760 660 540	8Hz 8Hz 8Hz
Internal Incoming Signal Frequency	High Middle Low	1100 660 520	1400 760 660	8Hz 8Hz 8Hz

## 15-09 : Virtual Extension Ring Assignment

Level:

SA

### Description

Use **Program 15-09 : Virtual Extension Ring Assignment** to assign the ringing options for an extension Virtual Extension Key or Virtual Extension Group Answer Key which is defined in Program 15-07. You make an assignment for each Night Service Mode.

Assign extension numbers and names to virtual extension ports in Program 15-01. Program Virtual Extension keys in Program 15-07 (code \*03). There are 256 Virtual Extension Ports.

### Input Data

Extension Number	Up to eight digits
------------------	--------------------

Key Number	01~48
------------	-------

Item No.	Day/Night Mode	Ringing	Default
01	1~8	0 = No Ringing 1 = Ring	0

### Conditions

- Program the Multiple Directory Number function keys **NOT** to ring before removing the key from telephone programming.

### Feature Cross Reference

None

## Program 15 : Extension, Basic Setup

### ***15-10 : Incoming Virtual Extension Ring Tone Order Setup***

**Level:**

SA

#### Description

Use **Program 15-10 : Incoming Virtual Extension Ring Tone Order Setup** to set the priority (1~4) for the Virtual Extension Ring Tones set in Program 15-08. When Virtual Extension calls ring an extension simultaneously, the tone with the highest order number (e.g., 1) rings. The other keys only flash. There are 256 Virtual Extension ports.

#### Input Data

Extension Number	Up to eight digits
------------------	--------------------

Item No.	Priority Order	Data	Description	Related Program
01	1~4	0 = Tone Pattern 1 1 = Tone Pattern 2 2 = Tone Pattern 3 3 = Tone Pattern 4 4 = Incoming Extension Ring Tone	When two or more virtual extensions are set on a function key on the telephone, and the tone pattern by which the sound of each extension differs, the priority of ring sound is set up.	15-08

#### Default

- By default, Virtual Extension ring tones have the following order:

Priority Order	Ring Tone (Set in Program 15-08)
1	0 (Tone Pattern 1)
2	1 (Tone Pattern 2)
3	2 (Tone Pattern 3)
4	3 (Tone Pattern 4)

**Conditions**

None

---

## Feature Cross Reference

None

## Program 15 : Extension, Basic Setup

### ***15-11 : Virtual Extension Delayed Ring Assignment***

**Level:**

**SA**

#### **Description**

Use **Program 15-11 : Virtual Extension Delayed Ring Assignment** to assign the delayed ringing options for an extension Virtual Extension or Virtual Extension Group Answer keys (defined in Program 15-09). You make an assignment for each Night Service Mode. There are 256 Virtual Extension Ports.

Assign extension numbers (Program 11-04) and names (Program 15-01) to virtual extension ports. Program Multiple Directory Number (virtual extension) keys in Program 15-07 (code \*03).

#### **Input Data**

Extension Number	Maximum eight digits
------------------	----------------------

Key Number	01~48
------------	-------

Item No.	Day/Night Mode	Ringing	Default	Related Program
01	1~8	0 = Immediate Ring 1 = Delayed Ring	0	20-04-03 15-09-01

#### **Conditions**

- Program the Virtual Extension keys **NOT** to ring before removing the key from telephone programming.
- PRG 15-09-01 has to be assigned to Ring Immediately before assigning the CAR/VE key to Delay Ring.

#### **Feature Cross Reference**

None

# Program 15 : Extension, Basic Setup

## 15-12 : Conversation Recording Destination for Extensions

Level:

IN

### Description

Use **Program 15-12 : Conversation Recording Destination for Extensions** to set the ACI Conversation Recording destination for each extension.

 **If both Programs 14-09 and 15-12 define a destination, the destination in Program 15-12 is followed.**

### Input Data

Extension Number	Maximum eight digits
------------------	----------------------

Item Number	Item	Input Data	Default
01	<b>ACI Recording Destination Extension Number</b> Enter the ACI extension number to which the trunk calls should be recorded.	Maximum eight digits	No Setting
02	<b>ACI Automatic Recording for Incoming Calls</b> Determine if an extension incoming calls should be automatically recorded to the ACI.	0 = Off 1 = On	0

### Conditions

None

### Feature Cross Reference

- Analog Communications Interface (ACI)

# Program 15 : Extension, Basic Setup

## 15-14 : Programmable One-Touch Keys

Level:  
IN

### Description

Use **Program 15-14 : Programmable One-Touch Keys** to define the One-Touch key data for each multiline terminal.

For each UNIVERGE SV8100 Wireless telephone to use the Transfer When Out of Range feature, enter the destination number (up to 24 digits) and name (up to 12 characters) into One-Touch bin 10. Make sure to add any required trunk access codes for outside numbers. If this bin information is changed either through 15-14-01 or through user programming, the destination for the transferred calls is also changed.

Extension Number	Maximum eight digits
------------------	----------------------

Key Number	01~10
------------	-------

Item No.	Dial Data	Name	Default
01	1~0, *, #, Pause, Hook-flash, @ (Code for Answer-Wait) Up to 24 digits	Up to 24 Digits	No Setting
02	Name	Up to 12 Digits	No Setting

### Default

- No entries for any extension.

### Conditions

None

### Feature Cross Reference

- One-Touch Keys

# Program 16 : Department Group Setup

## 16-01 : Department Group Basic Data Setup

Level:

IN

### Description

Use **Program 16-01 : Department Group Basic Data Setup** to set the function mode for each department group. There are 64 available Department Groups.

### Input Data

Department Group Number	0~64
-------------------------	------

Item No.	Item	Input Data	Default	Related Program
01	<b>Department Name</b>	Maximum 12 characters	No setting	11-07
02	<b>Department Calling Cycle</b>  Use this option to set the call routing for Department Calling. Routing can be either circular (cycles to all phones in group) or priority (cycles to highest priority extensions first).	0 = Normal Routing (Priority) 1 = Easy – UCD Routing (Circular)	0	16-02
03	<b>Department Routing when Busy (Auto Step Call)</b>  Use this option to set how the system routes an Intercom call to a busy Department Group member. Intercom callers to the extension can either hear busy or route to the first available department number. This only occurs for calls to the extension directly, not the department number assigned in Program 11-07.	0 = Normal (Intercom caller to busy department member hears busy) 1 = Circular (Intercom callers to busy department member routes to idle member)	0	16-02

Item No.	Item	Input Data	Default	Related Program
04	<b>Hunting Mode</b> Use this option to set the action taken when a call reaches the last extension in the Department Group (0=hunting stopped, 1 =hunting repeats with circular routing through the Department Group).	0 = Last extension is called and hunting is stopped 1 = Circular	0	
05	<b>Extension Group All Ring Mode Operation</b>  Determine whether calls ringing a Department Group should ring all extensions in the group simultaneously automatically or manually when using the service code defined in Program 11-12-09.  ☞ When set to (1) Automatic, only ICM Calls and DID Calls will ring all the stations in the Department Group.	0 = Manual 1 = Automatic	0	11-16-10
06	<b>STG Withdraw Mode</b>	0 = Disable (Camp On) 1 = Enable (Overflow Mode)	0	
07	<b>Call Recall Restriction for STG</b>  Determine whether or not an unanswered call transferred to a Department Group should recall the extension from which it was transferred.	0 = Disable (Recall) 1 = Enable (No Recall)	0	
08	<b>--- Not Used ---</b>			
09	<b>Department Hunting No Answer Time</b>  Set how long a call rings a Department group extension before hunting occurs.	0~64800 seconds	15	
10	<b>Enhanced Hunt Type</b>  Set the type of hunting for each Extension (Department) Group.	0 = No queuing 1 = Hunting When Busy 2 = Hunting When Not Answered 3 = Hunting When Busy or No Answer	0	

**Conditions**

None

# Program 16 : Department Group Setup

## ***16-02 : Department Group Assignment for Extensions***

**Level:**

IN

### Description

Use **Program 16-02 : Department Group Assignment for Extensions** to set the Department Groups. The system uses these groups (64 Department Groups) for Department Calling. Assign pilot numbers to Department Groups you set up in Program 11-07. This lets system users place calls to the departments. Use Program 16-01 to set the priority of each extension in each Department Group. When a call comes to the group, the extensions ring in order of their priority.

#### **Input Data**

Extension Number	Maximum 8 digits
------------------	------------------

Item No.	Group Number	Priority	Default	Description	Related Program
01	1~64	1~999	1 – xxx (See Note)	Set up the Department Group called by the pilot number and the extension priority when a group is called. Call Pickup Groups are set up in 23-02.	11-07 16-01

 *The initial value of a priority becomes the ports numerical order assigned in Program 11-02 and 11-04. (Extension ports are 1~ 256. Virtual extension ports are 1~256.)*

## *20-03 : System Options for Single Line Telephones*

**Level:**

IN

### Description

Use **Program 20-03 : System Options for Single Line Telephones** to set up various options for single line telephones.

#### **Input Data**

Item No.	Item	Input Data	Default	Related Program
01	<b>SLT Call Waiting Answer Mode</b> For a busy single line (500/2500 type) telephone, set the mode used to answer a camped-on trunk call.	0 = Hookflash (Hooking) 1 = Hookflash + Service Code 654	0	11-12-47
02	<b>Ignore Received DP Dial on DTMF SLT Port</b> Use this option to define whether the system should receive dial pulse and DTMF signals (0) or ignore dial pulse and only accept DTMF signals (1).	0 = Do Not Ignore (No) 1 = Ignore (Yes)	0	15-03-01
03	<b>SLT DTMF Dial to Trunk Lines</b> <ul style="list-style-type: none"> <li>○ <b>Type 0:</b> The system keeps the digits dialed by the single line telephone on a trunk in a buffer. After all the digits are received, the system sends all the digits to the trunk. If the time space between digits is longer than the time in Item 4, the system considers all digits received.</li> <li>○ <b>Type 1:</b> The system passes the received digits from the single line telephone to the trunk immediately. If the single line telephone has a Last Number Dial key without a pause, this key may not be able to use the Last Number Dial key with the Type 1 setting.</li> </ul> When using a third-party external paging device, set this option to 1. In addition, set Program 20-03-04 to 1. These programs must be set for Wireless – DECT users to be able to break dial tone on an analog trunk that is used for paging.	0 = Receive all dialed data, before sending (All) 1 = Direct through out (Direct)	0	20-03-04

**Input Data**

Item No.	Item	Input Data	Default	Related Program
04	<b>Dial Sending Start Time for SLT or ARS</b> When ARS or an analog extension user accesses a trunk and dials an outside call, the system waits this interval before outdialing the first digit. When using a third-party external paging device, set this option to 1. In addition, set Program 20-03-03 to 1.	0~64800 seconds	3	20-03-03
05	<b>SLT Operation Mode</b>	0 = Normal Mode 1 = Extended Mode 1 2 = Extended Mode 2	0	
06	<b>Headset Ringing Start Time (for SLT)</b> Define the headset ringing start time. After this time expires from the time when a single line telephone is off-hook, the system sets the single line telephone to headset ringing mode.	0~64800 seconds	5	20-13-38
07	<b>Trunk Call Dial Forced Sending Start Time (Forced Dial)</b>	0~64800 seconds	0	20-03-03 20-03-04

## 20-09 : Class of Service Options (Incoming Call Service)

**Level:**

IN

### Description

Use **Program 20-09 : Class of Service Options (Incoming Call Service)** to define the incoming call feature availability for each extension Class of Service (COS).

#### Input Data

Class of Service Number	01~15	
-------------------------	-------	--

Item No.	Item	Input Data	Default		Related Program
			COS 01~14	COS 15	
01	<b>Second Call for DID/DISA/DIL/E&amp;M Override</b> Turns off or on the extension ability to receive a second call from a DID, DISA, DIL, or tie line caller.  With this option set to 1, the destination extension must be busy for a second DNIS caller to ring through. If the destination extension does not have a trunk or CAP key available for the second call and a previous call is ringing the extension but has not yet been answered, the second caller hears busy regardless of this program setting.	0 = Off 1 = On	1	1	
02	<b>Caller ID Display</b> Turns off or on the Caller ID display at an extension.	0 = Off 1 = On	0	0	15-02-08
03	<b>Sub Address Identification</b> Defines whether or not an extension displays the Caller Sub-Address.	0 = Off 1 = On	0	0	
04	<b>Notification for Incoming Call List Existence</b> Determines whether or not an extension display shows Check List when an incoming call is missed by a user.	0 = Off 1 = On	0	0	20-09-02

Item No.	Item	Input Data	Default		Related Program
			COS 01~14	COS 15	
05	<b>Signal/Voice Call</b> Turn off or on an extension ability to enable Handsfree Answerback or Forced Intercom Ringing for their incoming Intercom calls.	0 = Off 1 = On	1	1	11-11-15, 11-11-16
06	<b>Incoming Time Display</b>	0 = Off 1 = On	0	0	
07	<b>Call Queuing</b> Turn off or on an extension ability to have calls queued if a call rings the extension when it is busy.	0 = Off 1 = On	1	1	20-13-06
08	<b>Calling Party Information</b> Turn off or on an extension ability to display calling party information on CCIS calls.	0 = Off 1 = On	1	1	50-02-05

## 20-11 : Class of Service Options (Hold/Transfer Service)

Level:

IN

### Description

Use **Program 20-11 : Class of Service Options (Hold/Transfer Service)** to define the Hold and Transfer feature availability for each extension Class of Service (COS).

#### Input Data

Class of Service Number	01~15	
-------------------------	-------	--

Item No.	Item	Input Data	Default	
			COS 01~14	COS 15
01	<b>Call Forward All</b> Turns off or on an extension ability to initiate Call Forwarding All.	0 = Off 1 = On	1	1
02	<b>Call Forward When Busy</b> Turns off or on an extension ability to use Call Forward when Busy.	0 = Off 1 = On	1	1
03	<b>Call Forwarding When Unanswered</b> Turns off or on an extension ability to use Call Forward when Unanswered.	0 = Off 1 = On	1	1
04	<b>Call Forwarding (Both Ringing)</b> Turns off or on an extension ability to activate Call Forwarding with Both Ringing.	0 = Off 1 = On	1	1
05	<b>Call Forwarding with Follow Me</b> Turns off or on an extension ability to initiate Call Forwarding with Follow Me.	0 = Off 1 = On	1	1
06	<b>Unscreened Transfer (Ring Inward Transfer)</b> Turns off or on an extension ability to use Unscreened Transfer.	0 = Off 1 = On	1	1
07	<b>Transfer Without Holding</b> Turns off or on an extension ability to use Transfer Without Holding.	0 = Off 1 = On	0	0

Item No.	Item	Input Data	Default	
			COS 01~14	COS 15
08	<b>Transfer Information Display</b> Turns off or on an extension ability for incoming Transfer preanswer display.	0 = Off 1 = On	1	1
09	<b>Group Hold Initiate</b> Turns off or on an extension ability to initiate a Group Hold.	0 = Off 1 = On	1	1
10	<b>Group Hold Answer</b> Turns off or on an extension ability to pick up a call on Group Hold.	0 = Off 1 = On	1	1
11	<b>Automatic On-Hook Transfer</b> Turns off or on an extension ability to use Automatic On Hook Transfer.	0 = Off 1 = On	0	0
12	<b>Call Forwarding Off Premise (External Call Forwarding)</b> Turns off or on an extension ability to set up Call Forwarding Off-Premise for their telephone.	0 = Off 1 = On	0	0
13	<b>Operator Transfer After Hold Callback</b> Turns off or on an extension ability to have a call which recalls from hold transfer to the operator.	0 = Off 1 = On	0	0
14	<b>Trunk-to-Trunk Transfer Restriction</b> Turns off or on the Trunk-to-Trunk Transfer Restriction. If enabled, Trunk-to-Trunk Transfer is not possible.	0 = Off 1 = On	0	0
15	<b>VRS Personal Greeting (Message Greeting)</b> Turns off or on a Service Code to record, listen to, or erase the Personal Greeting Message.	0 = Off 1 = On	1	1
16	<b>Call Redirect</b> Turns off or on a multiline terminal user ability to transfer a call to a predefined destination (such as an operator, voice mail, or another extension) without answering the call.	0 = Off 1 = On	1	1
17	<b>Department Group Trunk-to-Trunk Transfer (Each Telephone Group Transfer)</b> Turns off or on an extension user ability to set Trunk-to-Trunk Forwarding for a Department Group.	0 = Off 1 = On	1	1
18	<b>No Recall</b> No Recall set to "Allow" (1) will not stop transferred calls from recalling from a virtual extension.	0 = Off 1 = On	0	0
19	<b>Hold/Extended Park</b> Determine if an extension Class of Service should allow either a normal or extended Park.	0 = Off 1 = On	0	0

Item No.	Item	Input Data	Default	
			COS 01~14	COS 15
20	<b>No Callback</b> Turns off or on an extension to receive callbacks.	0 = Off 1 = On	0	0
21	<b>Restriction for Tandem Trunking on Hang Up</b> Allow (0) or deny (1) an extension user ability to set up a tandem/conference call automatically when they hang up.	0 = Off 1 = On	0	0
22	<b>Restricted Unsupervised Conference</b> Allow or Deny an extension ability to initiate an unsupervised conference.	0 = Off 1 = On	0	0
23	<b>CAR/VE Call Forward Set/Cancel</b> Turn on or off an extension ability to set or cancel call forwarding for a virtual extension.	0 = Off 1 = On	1	1
24	<b>Trunk Park Hold Mode</b> Set the hold type when a trunk call is put on hold by an extension.	0 = Non Exclusive Hold (Off) 1 = Exclusive Hold (On)	1	1
25	<b>Transfer Park Call</b> Turn off or on and extension ability to transfer a parked call.	0 = Off 1 = On	1	1
27	<b>Call Park Automatically Search</b>	0 = Off 1 = On	1	1

Level:

IN

### Description

Use **Program 20-13 : Class of Service Options (Supplementary Service)** to define the supplementary feature availability for each extension Class of Service (COS).

#### Input Data

Class of Service Number	01~15	
-------------------------	-------	--

Item No.	Item	Input Data	Default		Related Programming
			COS 01~14	COS 15	
01	<b>Long Conversation Alarm</b> Turns off or on the Warning Tone for Long Conversation (not for single line telephones).	0 = Off 1 = On	0	0	
02	<b>Long Conversation Cutoff (Incoming)</b> Turns off or on an extension ability to use Long Conversation Cutoff for incoming calls.	0 = Off 1 = On	0	0	
03	<b>Long Conversation Cutoff (Outgoing)</b> Turns off or on an extension ability to use Long Conversation Cutoff for outgoing calls.	0 = Off 1 = On	0	0	
04	<b>Call Forward/DND Override (Bypass Call)</b> Turns off or on an extension ability to use Call Forwarding/DND Override.	0 = Off 1 = On	1	1	
05	<b>Intercom Off-Hook Signaling</b> Turns off or on an extension ability to receive off-hook signals.	0 = Off 1 = On	1	1	
06	<b>Automatic Off-Hook Signaling (Automatic Override)</b> Allows a busy extension ability to manually (0) or automatically (1) receive off-hook signals.	0 = Off 1 = On	1	1	
07	<b>Message Waiting</b> Turns off or on an extension ability to leave Message Waiting.	0 = Off 1 = On	1	1	

Item No.	Item	Input Data	Default		Related Programming
			COS 01~14	COS 15	
08	<b>Conference</b> Turns off or on an extension user ability to initiate a conference or Meet-Me Conference.	0 = Off 1 = On	1	1	
09	<b>Privacy Release</b> Turns off or on an extension user ability to initiate a Voice Call Conference.	0 = Off 1 = On	1	1	
10	<b>Barge-In Monitor</b> Enables the extension Barge-In Mode to be speech mode (0) or Monitor mode (1).	0 = Off 1 = On	0	0	20-13-45
11	<b>Room Monitor, Initiating Extension</b> Turns off or on an extension user ability to Room Monitor other extensions.	0 = Off 1 = On	0	0	
12	<b>Room Monitor, Extension Being Monitored</b> Turn off or on an extension ability to be monitored by other extensions.	0 = Off 1 = On	0	0	
13	<b>Continued Dialing (DTMF) Signal on ICM Call</b> Turn off or on an extension user ability to use Continued Dialing, which allows DTMF signal sending while talking on extension.	0 = Off 1 = On	1	1	
14	<b>Department Calling (PLT No Called Extension)</b> Turns off or on an extension user ability to call a Department Group Pilot.	0 = Off 1 = On	1	1	
15	<b>Barge-In, Initiate</b> Turns off or on an extension user ability to barge-in on other's calls.	0 = Off 1 = On	0	0	
16	<b>Barge-In, Receive</b> Turns off or on an extension ability to have other extensions barge-in on calls.	0 = Off 1 = On	0	0	
17	<b>Barge-in Tone/Display (Intrusion Tone)</b> Turns off or on the Barge-In tone. If on, callers hear an alert tone and their display indicates the Barge-In when another extension barges into their conversation. If off, there is no alert tone or display indication.	0 = Off 1 = On	1	1	
18	<b>Programmable Function Key Programming (General Level)</b> Turns off or on an extension user ability to program General function keys using Service Code 751 (by default). (Refer to Program 20-07-10 for Service Code 752.)	0 = Off 1 = On	1	1	

Item No.	Item	Input Data	Default		Related Programming
			COS 01~14	COS 15	
19	<b>Selectable Display Messaging (Text Messaging)</b> Turns off or on an extension user ability to use Selectable Display Messaging.	0 = Off 1 = On	1	1	
20	<b>Account Code/Toll Restriction Operator Alert (Restricted Operation Transfer)</b> Turns off or on operator alert when an extension user improperly enters an Account Code or violates Toll Restriction.	0 = Off 1 = On	0	0	
21	<b>Extension Name</b> Turns off or on an extension user ability to program its name.	0 = Off 1 = On	1	1	
22	<b>Busy Status Display (Called Party Status)</b> Turns off or on the ability to display the detailed state of the called party.	0 = Off 1 = On	0	0	20-13-06
23	<b>Display the Reason for Transfer</b> Select whether an extension should display the reason a call is being transferred to their extension (Call Forward Busy, Call Forward No Answer, DND).	0 = Off 1 = On	0	0	
24	<b>Privacy Release by Pressing Line Key</b> Turns off or on a user ability to press a line key to barge into an outside call. The Barge-In feature must be enabled if this option is to be used.	0 = Off 1 = On	0	0	
25	<b>--- Not Used ---</b>				
26	<b>Group Listen</b> Turns off or on an extension user ability to use Group Listen.	0 = Off 1 = On	1	1	
27	<b>Busy on Seizing Virtual Extension</b> If set to 1, you can call a busy extension which is talking on a virtual extension key. Program 20-13-06 (Call Waiting) must be set to off for this option to work.	0 = Off 1 = On	1	1	
28	<b>Allow Class of Service to be Changed</b> Turns off or on the ability of an extension Class of Service to be changed via Service Code 677.	0 = Off 1 = On	0	0	
29	<b>Paging Display</b> Turns off or on an extension user ability to display paging information.	0 = Off 1 = On	1	1	
30	<b>Background Music</b> Allows or Denys an extension user to turn Background Music on and off.	0 = Off 1 = On	1	1	

Item No.	Item	Input Data	Default		Related Programming
			COS 01~14	COS 15	
31	<b>Connected Line Identification (COLP)</b>	0 = Off 1 = On	0	0	
32	<b>Deny Multiple Barge-Ins</b>  Allows or Denies an extension from having multiple users Barge into their conversation.	0 = Off 1 = On	0	0	
33	<b>ACD Supervisor's Position Enhancement</b>  This option must be on for the operator to use service codes in Program 11-13-10 ~ 11-13-13.	0 = Off 1 = On	0	0	11-13-10 11-13-11 11-13-12 11-13-13
34	<b>Block Manual Off-Hook Signaling</b>  Turns off or on an extension user ability to block off-hook signals manually sent from a co-worker.	0 = Off 1 = On	0	0	
35	<b>Block Camp On</b>  Turns off or on an extension user ability to block callers from dialing to Camp On.	0 = Off 1 = On	0	0	
36	<b>Call Duration Timer Display</b>  Turns off or on an extension display of the Call Duration Time. The system waits until the interdigit time (Program 21-01-01) expires before beginning this timer.	0 = Off 1 = On	1	1	
37	--- Not Used ---				
38	<b>Headset Ringing</b>  Turn off or on an extension user ability to use the Headset ringing.	0 = Off 1 = On	0	0	
39	<b>ACD Queue Status Display</b>  Turns off or on the ACD Queue Status Display for an extension Class of Service. Any extension which has this option enabled also hears the queue alarm.	0 = Off 1 = On	0	0	
40	<b>Do Not Disturb</b>  Turn off or on an extension user ability to set or cancel Do Not Disturb.	0 = Off 1 = On	1	1	11-11-08 15-07-03
41	<b>Voice Mail Message Indication on DSS</b>  Turn off or on the Voice Mail Message Indication for an extension on a DSS console.	0 = Off 1 = On	0	0	
42	<b>Extension Data Swap Enabling</b>  Turn off or on an extension user ability to use Extension Data Swap.	0 = Off 1 = On	1	1	11-15-12
43	--- Not Used ---				

Item No.	Item	Input Data	Default		Related Programming

## 20-14 : Class of Service Options for DISA/E&M

**Level:**  
IN

### Description

Use **Program 20-14 : Class of Service Options for DISA/E&M** to enable/disable DISA and tie line Class of Service options. You assign a DISA Class of Service to DISA users in Program 25-09. Assign tie line Classes of Service in 34-02. Up to 15 DISA/E&M Classes of Service can be defined.

 **Analog trunk-to-analog trunk and ISDN trunk-to-ISDN trunk calls are supported by this program. However, analog trunk-to-ISDN trunk and ISDN trunk-to-analog trunk calls are NOT supported by this program.**

### Input Data

Class of Service Number	01~15	
-------------------------	-------	--

Item No.	Item	Input Data	Default	
			COS 01~14	COS 15
01	<b>First Digit Absorbtion (Delete First Digit Dialed)</b> For tie lines, enable or disable the ability to absorb (ignore) the first incoming digit. Use this to make the tie trunk compatible with 3- and 4-digit tie line service. This option does not apply to DISA.	0 = Off 1 = On	0	0
02	<b>Trunk Group Routing/ARS Access</b> This option enables or disables a DISA or tie trunk caller ability to dial 9 for Trunk Group Routing or Automatic Route Selection (ARS).	0 = Off 1 = On	0	0
03	<b>Trunk Group Access</b> This option enables or disables a DISA or tie trunk caller ability to access trunk groups for outside calls (Service Code 704).	0 = Off 1 = On	0	0
04	<b>Outgoing System Speed Dial</b> This option enables or disables a DISA or tie trunk caller ability to use the System Speed Dialing.	0 = Off 1 = On	0	0
05	<b>Operator Calling</b> This option enables or disables a DISA or tie trunk caller ability to dial 0 for the telephone system operator.	0 = Off 1 = On	0	0

Item No.	Item	Input Data	Default	
			COS 01~14	COS 15
06	<b>Internal Paging</b> This option enables or disables a DISA or tie trunk caller ability to use the telephone system Internal Paging.	0 = Off 1 = On	0	0
07	<b>External Paging</b> This option enables or disables a DISA or tie trunk caller ability to use the telephone system External Paging.	0 = Off 1 = On	0	0
08	<b>Direct Trunk Access</b> This option enables or disables a DISA or tie trunk caller ability to use Direct Trunk Access (Service Code #9).	0 = Off 1 = On	0	0
09	<b>Forced Trunk Disconnect &lt;Not for ISDN T-point&gt;</b> This option enables or disables a tie trunk caller ability to use Forced Trunk Disconnect (Service Code *3). This option is not available to DISA callers.	0 = Off 1 = On	0	0
10	<b>Call Forward Setting by Remote via DISA</b> Enable or disable a DISA caller ability to use the Call Forward service codes (Programs 11-11-01 ~ 11-11-05).	0 = Off 1 = On	0	0
11	<b>DISA/Tie Trunk Barge-In</b> This option enables or disables a DISA or tie trunk caller ability to use the Barge-In feature.	0 = Off 1 = On	0	0
12	<b>Retrieve Park Hold</b> This option enables or disables a DISA or tie trunk caller ability to retrieve a Park Held call.	0 = Off 1 = On	0	0

## Program 20 : System Option Setup

### 20-16 : Selectable Display Messages

**Level:**  
SA

#### Description

Use **Program 20-16 : Selectable Display Messages** to enter the Selectable Display Messages. There are 20 alphanumeric messages, with up to 24 characters. Use the following chart when programming messages.

Use this keypad digit . . .	When you want to . . .
1	Enter characters: 1 @ [ ¥ ] ^ _ ` {   } → ← Á À Â Ã Ç É Ê ï ó
2	Enter characters: A-C, a-c, 2.
3	Enter characters: D-F, d-f, 3.
4	Enter characters: G-I, g-i, 4.
5	Enter characters: J-L, j-l, 5.
6	Enter characters: M-O, m-o, 6.
7	Enter characters: P-S, p-s, 7.
8	Enter characters: T-V, t-v, 8.
9	Enter characters: W-Z, w-z, 9.
0	Enter characters: 0 ! " # \$ % & ' ( ) ô õ ú ä ö ü α ε θ
*	Enter characters: * + , - . / : ; < = > ? π Σ σ Ω ∞ φ £
#	# = Accepts an entry (only required if two letters on the same key are needed – ex: TOM). Pressing # again = Space. (In system programming mode, use the right arrow soft key instead to accept and/or add a space.)
CONF	Clear the character entry one character at a time.
HOLD	Clear all the entries from the point of the flashing cursor and to the right.

When using DTP or DTU style telephones on the UNIVERGE SV8100 system, not all the same characters are available.

**Input Data**

Selectable Display Message Number	01~20

### Description

Use Program **20-17 : Operator Extension** to designate an operator. When an extension user dials 0 or 9 (defined by Program 11-01 Type 5), calls go to the operator selected in this program.

If you do not assign an extension in Program 90-11-01, system alarms appear on the extension assigned in this option.

### Input Data

Operator Number	1~8
-----------------	-----

Item No.	Item	Input Data	Default	Related Program
01	<b>Operator's Extension Number</b> Define the extension numbers which are to be used by operators.	Up to eight digits	101	11-01 20-01-01

## 20-18 : Service Tone Timers

**Level:**  
IN

### Description

Use **Program 20-18 : Service Tone Timer** to set the values for the system service tone timers. Refer to the following chart for a description of each option, its range and default setting.

### Input Data

Item No.	Item	Input Data	Default	Description	Related Program
01	<b>Extension Dial Tone Time</b>	0~64800 seconds	30	After getting Intercom dial tone, a telephone user has this time to dial the first digit of the Intercom call.	
02	<b>Busy Tone Timer</b>	0~64800 seconds	15		
03	<b>Congestion Tone</b>	0~64800 seconds	10	A Busy Tone when system resources run short. (such as DTMF receiver resources).	
04	<b>Call Waiting Tone Timer</b>	0~64800 seconds	10	This option sets the time between Call Waiting tones. This timer also sets the time between Off-Hook Signaling alerts.	
05	<b>Multiline Confirmation Tone</b>	0~64800 seconds	10		
06	<b>Interval of Call Waiting Tone</b>	0~64800 seconds	10		
07	<b>Intrusion Tone Repeat Time</b>	0~64800 seconds	0	After a call is interrupted (such as Barge-In, Voice Mail Conversation Recording, or Voice Over), the system repeats the Intrusion Tone after this time. Normally, you should enter 0 to disable this time.	
08	<b>Conference Tone Interval</b>	0~64800 seconds	0		
09	<b>Warning Beep Tone Signaling Interval</b>	0~64800 seconds	60		14-01-18

# Program 20 : System Option Setup

## 20-21 : System Options for Long Conversation

Level:  
IN

### Description

Use **Program 20-21 : System Options for Long Conversation** to define the system options for the Long Conversation feature.

### Input Data

Item No.	Item	Input Data	Default	Related Program
01	<b>Long Conversation Alarm 1</b> The warning tone for long toll calls sounds after this time.	0~64800 (sec)	170	14-01-15
02	<b>Long Conversation Alarm 2</b> After the initial long toll call warning tone, additional warning tones sound after this time.	0~64800 (sec)	180	14-01-15
03	<b>Long Conversation Cutoff for Incoming Call</b> This timer determines how long the system waits before disconnecting an incoming call.	0~64800 (sec)	0	14-01-14
04	<b>Long Conversation Cutoff for Outgoing Call</b> This timer determines how long the system waits before disconnecting an outgoing call.	0~64800 (sec)	0	14-01-14

### Conditions

None

### Feature Cross Reference

- Long Conversation Cutoff

## Program 20 : System Option Setup

### 20-22 : System Options for Wireless – DECT Service

Level:

IN

---

#### Description

Use **Program 20-22 : System Options for Wireless – DECT Service** to define the time the system waits before determining the Wireless – DECT phone is out of range. For incoming calls, the timer begins when the call is received. If the time defined here expires before the Wireless – DECT phone starts to ring, the system determines the phone is out of range and provides the out-of-range services (indicates out-of range, transfers the call to voice mail or to another extension).

#### Input Data

Item No.	Item	Input Data	Default
05	<b>Out of Area Judging Time</b> Determines how long the system searches to find the Wireless- DECT before considering it "Out of Area".	0~64800 (sec)	8
06	<b>Out of Area Message Number ???</b>	0~100	0

#### Conditions

None

---

#### Feature Cross Reference

- Wireless - DECT

# Program 20 : System Option Setup

## 20-31 : Timer Class Timer Assignment

**Level:**

IN

### Description

Use **Program 20-31 : Timer Class Timer Assignment** to assign values to the timers on a class of service basis.

#### Input Data

Item No.	Item	Input Data	Default	Related Programming
01	<b>Trunk Queuing Callback Duration Time</b> Trunk Queuing Callback rings an extension for this amount of time	0~64800 seconds	15 seconds	20-01-08
02	<b>Callback / Trunk Queuing Cancel Time</b> The system cancels an extension Callback or Trunk Queueing request after this amount of time.	0~64800 seconds	64800 seconds	20-01-09
03	<b>CAR/SIE/Virtual Extension Delay Interval</b> CAR Keys/SIE Keys/Virtual Extensions set for Delayed Ringing (refer to <a href="#">15-11 : Virtual Extension Delayed Ring Assignment</a> ) ring the extension after this interval.	0~64800 seconds	10 seconds	20-04-03
04	<b>Intercom Interdigits Time (Intercom I/D Timer)</b> When placing Intercom calls, extension users must dial each digit in this time.	0~64800 seconds	10 seconds	21-01-02
05	<b>Trunk Interdigits Time (Trunk I/D Timer)</b> The system waits for this time to expire before placing the call in a talk state (Call Timer starts after time expires, Voice Over and Barge-In are not allowed until after time expires).	0~64800 seconds	5 seconds	21-01-03
06	<b>Hotline Time Start Time (Hotline Start)</b> A Ringdown extension automatically calls its programmed destination after this time.	0~64800 seconds	5 seconds	21-01-09
07	<b>Ring No Answer Alarm Time</b> If a trunk rings a multiline telephone longer than this interval, the system changes the ring cadence. This indicates to the user that the call has been ringing too long.	0~64800 seconds	60 seconds	22-01-03

**Input Data**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>	<b>Related Programming</b>
08	<b>DIL/Incoming Ring Group No Answer Time</b> A DIL that rings its programmed destination longer than this interval diverts to the DIL No Answer Ring Group (set in Program 22-08).	0~64800 seconds	0 seconds	22-01-04
09	<b>DID Ring-No-Answer Time</b> In systems with DID Ring-No-Answer Intercept, this interval sets the Ring-No-Answer time. This interval is how long a DID call rings the destination extension before rerouting to the intercept ring group.	0~64800 seconds	20 seconds	22-01-06
10	<b>Hold Recall Time (Non Exclusive Hold)</b> A call on Hold recalls the extension that placed it on Hold after this time. This time works with the Hold Recall Callback Time (Program 24-01-02 ).	0~64800 seconds	90 seconds	24-01-01
11	<b>Hold Recall CallBack Time (Non Exclusive Hold)</b> A trunk recalling from Hold or Park rings an extension for this time. This time works with Hold Recall Time or Park Hold Time. After this time, the system invokes the Hold Recall Time again. Cycling between time Program 24-01-01 and 24-01-02 and Program 24-01-06 and 24-01-07 continues until a user answers the call.	0~64800 seconds	30 seconds	24-01-02
12	<b>Exclusive Hold Recall Time</b> A call left on Exclusive Hold recalls the extension that placed it on Hold after this time.	0~64800 seconds	90 seconds	24-01-03
13	<b>Exclusive Hold Recall Callback Time</b> An Exclusive Hold Recall rings an extension for this time. If not picked up, the call goes back on System Hold.	0~64800 seconds	30 seconds	24-01-04
14	<b>Park Hold Time – Normal</b> A call left parked longer than this time interval recalls the extension that initially parked it.	0~64800 seconds	90 seconds	24-01-06
15	<b>Delayed Call Forwarding Time (Call Forward No Answer)</b> If activated at an extension, Delayed Call Forwarding occurs after this time. This also sets how long a Transferred call waits at an extension forwarded to Voice Mail before routing to the called extension mailbox.	0~64800 seconds	10 seconds	24-02-03
16	<b>Transfer Recall Time</b> An unanswered transferred call recalls after this time to the extension that initially transferred it.	0~64800 seconds	30 seconds	24-02-04

**Input Data**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>	<b>Related Programming</b>
17	<b>DID/DISA No Answer Time (Disconnect or IRG or VM)</b>  A VRS/DISA caller can ring an extension for this time before the system sets the call as a Ring No Answer. After this time expires, the call follows the programmed Ring No Answer routing (set in Program 25-03 and 25-04).	0~64800 seconds	0 seconds	25-07-02
18	<b>Disconnect after Re-transfer to IRG</b>	0~64800 seconds	60 seconds	25-07-03
19	<b>Long Conversation Warning Tone Time (Trunk to Trunk)</b>  Determine the time a DISA caller or any trunk-to-trunk (such as Tandem Trunking) conversation can last before the Long Conversation tone is heard	0~64800 seconds	180 seconds	25-07-07
20	<b>Long Conversation Disconnect (Trunk to Trunk)</b>  This time determines how long the system waits before disconnecting a DISA caller or any trunk-to-trunk (such as Tandem Trunking) conversation call after the Long Conversation tone is heard.	0~64800 seconds	10 seconds	25-07-08
21	<b>DISA Internal Paging Time</b>  This is the maximum length of an Internal Page placed by a DISA caller. If the Page continues longer than this time, the system terminates the DISA call.	0~64800 seconds	30 seconds	25-07-09
22	<b>DISA External Paging Time</b>  This is the maximum length of an External Page placed by a DISA caller. If the Page continues longer than this time, the system terminates the DISA call.	0~64800 seconds	30 seconds	25-07-10
23	<b>Page Announcement Duration</b>  This timer sets the maximum length of Page announcements. (Affects External Paging only)	0~64800 seconds	1200 seconds	31-01-02

**Conditions**

- These timers are used when an extension or trunk is assigned to a class from 1 to 16 in 20-29-01 or 20-30-01. When the timer class is set to 0, the system-wide timer is used.
- All defaults are the same as the system-wide timers.

## 21-01 : System Options for Outgoing Calls

Level:

IN

### Description

Use **Program 21-01 : System Options for Outgoing Calls** to set the system options for Outgoing Call Service.

### Input Data

Item No.	Item	Input Data	Default	Related Program
01	<b>Seizure Trunk Line Mode</b> Select the trunk based off the Trunk Route Priority (0) or based off the trunk that has not been used in the longest time (1).	0 = Priority Route 1 = Circular Route	0	14-05 14-06
02	<b>Intercom Interdigit Time</b> When placing Intercom calls, extension users must dial each digit in this time.	0~64800 (sec)	10	
03	<b>Trunk Interdigit Time (External)</b> The system waits for this time to expire before placing the call in a talk state (Call Timer starts after time expires, Voice Over and Barge-In are not allowed until after time expires).	0~64800 (sec)	5	14-02-08
04	<b>Dial Tone Detection Time</b> If dial tone detection is enabled, the system waits this time for the Telco to return dial tone. When the time expires, the system assumes dial tone is not present. To disable this time (and have the system wait continuously), enter 0.	0~64800 (sec)	5	14-02-05

Program

21

**Input Data**

Item No.	Item	Input Data	Default	Related Program
05	<b>Disconnect Time when Dial Tone not Detected</b>  If 14-02-11 is enabled, the system skips over a trunk if dial tone is not detected. This option pertains to calls placed using Speed Dial, ARS, Last Number Redial or Save Number dialed. It does not pertain to line key or Direct Trunk Access calls.	0~64800 (sec)	3	
06	<b>Dial Pause at First Digit</b>	0~64800 (sec)	1	
07	<b>Toll Restriction Override Time</b>  After dialing the Toll Restriction Override codes, the system removes Toll Restriction from the extension for this time.	0~64800 (sec)	10	20-08-06 21-07
08	<b>Preset Dial Display Hold Time</b>	0~64800 (sec)	10	
09	<b>Ringdown Extension Timer (Hotline Start)</b>  A Ringdown extension automatically calls its programmed destination after this time.	0~64800 (sec)	5	20-08-09 21-11
10	<b>Dial Digits for Toll Restriction Path</b>  If this option is programmed with an entry other than 0, a call does not have a talk path unless the user dials at least the number of digits entered in this option when placing an outgoing call.  This means that an entry of 4 or higher in this program causes a problem when dialing 911. Since it is only a 3-digit number, the call does not have a talk path, preventing the emergency dispatcher from hearing the caller. This option should be kept at its default setting of 0 to prevent any problems with dialing 911.	0~24	0	
11	<b>Inter-Digit Time for Toll Restriction Path Control</b>	0~60	0	
12	<b>Dial E911 Routing Without Trunk Access</b>  If enabled (1), an extension user can dial 911 without first dialing a trunk access code or pressing a line key. If disabled (0), an extension user must dial a trunk access code (e.g., 9) or press a line key before dialing 911.	0 = Trunk Access Code Required 1 = Trunk Access Code Not Required	1	

**Input Data**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>	<b>Related Program</b>
13	<b>Alarm Ring Timer (E911)</b> Use this option to set the duration of the E911 Alarm Ring Time. If set for 0, the E911 Alarm does not ring.	0, 1~64800 (sec) (0 = Off)	0	11-12-56 20-08-16
14	<b>Forced Account Code Inter-digit Timer</b> The system waits this time for a user to enter a Forced Account code.	0~64800 (sec)	3	
15	<b>Outgoing Disable on Incoming Line (Toll Restriction)</b> Enable or disable the Outgoing Disable on Incoming Line feature.	0 = Disable (Off) 1 = Enable (On)	0	15-01-05 21-01-16 21-01-17
16	<b>Supervise Dial Detection Timer</b> With the Outgoing Disable on Incoming Line feature, if dial tone is not detected after the extension answers an incoming line, the system determines the call is unable to complete and releases the DTMF receiver.	0~64800 (sec)	20	15-01-05 21-01-16 21-01-17
17	<b>Restriction Digit in Outgoing Disable on Incoming Line</b> With the Outgoing Disable on Incoming Line feature, determine the number of digits to be dialed before the call should be disconnected.	Digits 0~9	4	15-01-05 21-01-15 21-01-16
18	<b>Reset Dial After Failure of Trunk Access</b> Enable (1) or Disable (0) the ability to continue to dial codes or extensions after receiving Trunk Busy. This needs to be set to Enabled (1) for the Forced Trunk Disconnect feature to work. <b>(Requires V1500 or higher)</b>	0 = Disable (Off) 1 = Enable (On)	1	99-01-01
19	<b>Do Not Call</b>	0 = No Service (Off) 1 = Extended Common Restriction (On)	0	15-01-07

#### Input Data

Toll Restriction Class Number	1~15
-------------------------------	------

Item No.	Item	Input Data	Default	Description	Related Program
01	<b>International Call Restriction Table</b>	0 = Unassigned (No) 1 = Assigned (Yes)	1, 6~15 = 0 2~5 = 1	This option assigns/unassigns the International Call Restrict Table for the Toll Restriction Class you are programming. Enter International Call Restrict Table data in Program 21-06-01.	21-06-01
02	<b>International Call Permit Code Table</b>	0 = Unassigned (No) 1 = Assigned (Yes)	1, 3~15 = 0 2 = 1	This option assigns/unassigns the International Call Permit Table for the Toll Restriction Class you are programming. Enter International Call Permit Table data in Program 21-06-02.	21-06-02
03	<b>--- Not Used ---</b>				
04	<b>Maximum Number of Digits Table Assignment</b>	1~4 = Table 0 = Disable (None)	0	Select the table (defined in 21-06-03) to be used to determine the maximum number of digits allowed for outgoing calls.	21-06-03
05	<b>Common Permit Code Table</b>	0 = Unassigned (No) 1 = Assigned (Yes)	0	It chooses whether the table set up by 21-06-04 is referred to, or not referred to.	21-06-04
06	<b>Common Restriction Table</b>	0 = Unassigned (No) 1 = Assigned (Yes)	0	It chooses whether the table set up by 21-06-05 is referred to, or not referred to.	21-06-05
07	<b>Permit Code Table</b>	1~4 = Table 0 = Disable (None)	0	Set the tables 1~4 when referring to the table set up by 21-06-06.	21-06-06

Item No.	Item	Input Data	Default	Description	Related Program
08	<b>Restriction Table</b>	1~4 = Table 0 = Disable (None)	0	Set the tables 1~4 when referring to the table set up by 21-06-07.	21-06-07
09	<b>Restriction for Common Speed Dials</b>	0 = Does Not Restrict 1 = Following Restriction Check	0	Use this option to enable/disable Toll Restriction for Common Speed Dialing numbers. If enabled, System Speed Dialing numbers have the same restrictions as manually dialed numbers.	
10	<b>Restriction for Group Speed Dials</b>	0 = Does Not Restrict 1 = Following Restriction Check	0	Use this option to enable/disable Toll Restriction for Group Speed Dialing numbers. If enabled, Group Speed Dialing numbers have the same restrictions as manually dialed numbers.	
11	<b>Intercom Call Restriction</b>	0 = Disable (No) 1 = Enable (Yes)	0	Determines if incoming and outgoing intercom calls are allowed.	
12	<b>PBX Call Restriction</b>	0 = Disable (No) 1 = Enable (Yes)	0	Use this option to set how the system Toll Restricts calls over PBX trunks. If you enable PBX Toll Restriction, the system begins Toll Restriction after the PBX access code. The user cannot dial a PBX extension. If you disable PBX Toll Restriction, the system only restricts calls that contain the PBX access code. The system does not restrict calls to PBX extensions. Refer to the PBX compatibility feature. Make sure Program 21-05-04 (Maximum Number of Digits Table Assignment) allows for PBX Toll Call Dialing (normally 12 digits).	
13	<b>Restriction of Tie Line Calls</b>	0 = Disable (No) 1 = Enable (Yes)	0	It chooses whether the toll restriction of the dial set up by 34-08 is enabled or disabled.	34-08
14	<b>Trunk Transfer Restriction on Incomplete Dial</b>	0 = Not allow 1 = Allow	0 (Not allow)	If this program is set to 1, you can transfer the outgoing trunk which you dialed incompletely.	
15	<b>Common Hold Restriction on Incomplete Dial</b>	0 = Not allow 1 = Allow	0 (Not allow)	If this program is set to 1, you can hold the outgoing trunk which you dialed in restriction check.

# Program 21 : Outgoing Call Setup

## *21-06 : Toll Restriction Table Data Setup*

**Level:**  
IN

### Description

Use **Program 21-06 : Toll Restriction Table Data Setup** to set the system Toll Restriction data. Dial 1-9, 0, \*, # can be entered in each table.

#### Input Data

Item No.	Item	Table	Input Data	Default	Description
01	<b>International Call Restriction Table</b>	1~10	Dial (Up to four digits)	Tables 1~10 = No Setting	This option lets you program the Restrict Table for international calls. The system has 10 International Call Restrict Tables. Each entry can have up to four digits.
02	<b>International Call Permit Code Table</b>	1~20	Dial (Up to six digits)	No Setting	This option lets you program the Permit Table for international calls. The system has 20 International Call Permit Table. Each entry can have up to six digits.
03	<b>Maximum Number Digits Table Assignment</b>	1~4	4-30	Tables 1~4 = 30	This option selects the maximum number of digits allowed in outgoing calls for each table.
04	<b>Common Permit Code Table</b>	1~10	Dial (Up to four digits)	Table 1 = 911 Table 2 = 1800 Table 3 = 1888 Table 4 = 1822 Table 5 = 1833 Table 6 = 1844 Table 7 = 1855 Table 8 = 1866 Table 9 = 1877 Table 10 = No Setting	This option lets you program the Common Permit Code Table. This table contains up to 10 codes you commonly allow users to dial.
05	<b>Common Restriction Table</b>	1~10	Dial (Up to 12 digits)	Table 1 = 900 Table 2 = 1900 Table 3 = 976 Tables 4 ~ 10 = No Setting	This option lets you program the Common Restrict Code Table. This table contains up to 10 codes you commonly prevent users from dialing.

**Input Data**

<b>Item No.</b>	<b>Item</b>	<b>Table</b>	<b>Input Data</b>	<b>Default</b>	<b>Description</b>
06	<b>Permit Code Table</b>	1~4 (table) 001~200 (Entry)	Dial (Up to 12 digits)	Table 1~4 = No Setting	This option lets you program the Permit Code Tables. If the system has Toll Restriction enabled, users can dial numbers only if permitted by these tables and the Common Permit Table (21-06-04). There are four Permit Code Tables, with up to 200 entries in each table. The system permits calls exactly as you enter the code.
07	<b>Deny Restriction Table</b>	1~4 (table) 1~60 (Entry)	Dial (Up to 12 digits)	Table 1~4 = No Setting	This option lets you program the Restrict Code Tables. If the system has Toll Restriction enabled, users cannot dial numbers listed in these tables. There are four Restrict Code Tables, with up to 200 entries in each table. The system restricts calls exactly as you enter the code.
08	<b>PBX Access Code</b>	1~4	Dial (Up to two digits)	Table 1~4 = No Setting	Use this option to enter the PBX Access Code. When the system is behind a PBX, this is the code users dial to access a PBX trunk. Toll Restriction begins after the PBX access code. For PBX trunks (Program 14-04) the system only Toll Restricts calls that contain the access code. Always program this option when the system is behind a PBX, even if you don't want to use Toll Restriction. PBX Access Codes can have up to two digits, using 0-9, #, * and LINE KEY 1 (don't care). When using Account Codes, do not use an asterisk in a PBX access code. Otherwise, after the *, the trunk stops sending digits to the central office. Entries 1~4 correspond to the 4 PBX Access Codes. Each code can have up to two digits.
09	<b>Specific Dial Outgoing Code</b>	1~20	Dial (Up to eight digits)	No Setting	
10	<b>Outgoing Call Code Setup</b>	1~20	Dial (Up to four digits)	No Setting

## 21-07 : Toll Restriction Override Password Setup

Level:

SA

---

### Description

Use **Program 21-07 : Toll Restriction Override Password Setup** to assign Toll Restriction Override codes to extension ports. Each code must have four digits, using any combination of 0~9, # and \*. Each extension can have a separate code, or many extensions can share the same override code.

### Input Data

Extension Number	Maximum 8 digits
------------------	------------------

Item No.	Password	Default	Related Program
01	Four Digits (Fixed)	No Setting	21-01-07 20-08-06

### Conditions

None

---

### Feature Cross Reference

None

# Program 21 : Outgoing Call Setup

## 21-08 : Repeat Dial Setup

Level:  
IN

### Description

Use **Program 21-08 : Repeat Dial Setup** to define the automatic Repeat Dial data.

#### Input Data

Item No.	Item	Input Data	Default
01	<b>Repeat Redial Count</b> Sets how many times a Repeat Redial automatically repeats if the call does not go through.	0~255	3
02	<b>Repeat Redial Interval Time</b> This time sets the interval between Repeat Redial attempts.	0~64800 (sec)	60
03	<b>Repeat Dial Calling Timer</b> After dialing the trunk call, Repeat Redial maintains the call after this time. After this time, the system terminates the call, waits the Repeat Redial Time (Timer 02) and tries again.	0~64800 (sec)	30
04	<b>Time for Send Busy Tone for ISDN Trunk</b> Sets the time (sec) to send out Busy Tone with an ISDN line, when called party is busy.	0~64800 (sec)	0

#### Conditions

None

### Feature Cross Reference

None

# Program 21 : Outgoing Call Setup

## 21-09 : Dial Block Setup

Level:

IN

---

### Description

Use **Program 21-09 : Dial Block Setup** to define the Dial Blocking Toll Restriction Class and Dial Block Password to be used by the Supervisor extension.

#### Input Data

Item No.	Item	Input Data	Default
01	<b>Toll Restriction Class With Dial Block</b> Assign a Toll Restriction Class of Service when the Dial Block feature is used.	1~15	15
02	<b>Supervisor Password</b> Assign a 4-digit password to be used by the supervisor to enable or disable Dial Block for other extensions.	0~9, *, # (4-digit fixed)	No Setting

#### Conditions

- This function works by password and Class of Service control (the supervisor is not an assigned extension). If Dial Block is available for all Classes of Service, everyone may become a supervisor if they know the Dial Block password.

---

### Feature Cross Reference

None

# Program 21 : Outgoing Call Setup

## 21-10 : Dial Block Restriction Class Per Extension

Level:  
IN

### Description

Use **Program 21-10 : Dial Block Restriction Class Per Extension** to define the Toll Restriction Class to each extension when the extension is set for Dial Block Restriction. If this data is 0, Toll Restriction Class follows Program 21-09-01.

### Input Data

Extension Number	Maximum eight digit
------------------	---------------------

Item No.	Toll Restriction Class	Default
01	0, 1~15 (0 = No Setting)	0 (No Setting)

### Conditions

None

### Feature Cross Reference

None

# Program 21 : Outgoing Call Setup

## 21-11 : Extension Ringdown (Hotline) Assignment

Level:

IN

---

### Description

Use **Program 21-11 : Extension Ringdown (Hotline) Assignment** to define the Hotline destination number for each extension number.

#### Input Data

Extension Number	Maximum 8 digits
------------------	------------------

Item No.	Hotline Destination Number	Default	Related Program
01	0, *, #, Pause, Hook Flash, @ (Code to wait for answer supervision) (maximum 24 digits)	No Setting	20-08-09 21-01-09

#### Conditions

- The @ code is used to make an outbound call automatically to a DISA Trunk or to VM Auto Attendant. This code can only be used on ISDN outbound calls. Internal calls and analog outbound calls are not supported.

---

### Feature Cross Reference

- Ringdown Extension, Internal/External

# Program 21 : Outgoing Call Setup

## 21-12 : ISDN Calling Party Number Setup for Trunks

Level:

IN

### Description

Use **Program 21-12 : ISDN Calling Party Number Setup for Trunks** to assign Calling Party Numbers for each trunk (maximum 16 digits per entry). When a call is made by an extension which does not have an Extension Calling Number assigned (Program 21-13), the system sends the calling number for the ISDN trunk defined in 21-12.

 **If the Calling Party Number is assigned in both Programs 21-12 and 21-13, the system sends the data in Program 21-13.**

### Input Data

Trunk Port Number	001~200
-------------------	---------

Item No.	Calling Party Number Data	Default
01	1~0, *, # (maximum 16 digits)	No Setting

### Conditions

None

### Feature Cross Reference

- ISDN Compatibility

## Program 21 : Outgoing Call Setup

### **21-13 : ISDN Calling Party Number Setup for Extensions**

Level:

IN

---

#### Description

Use **Program 21-13 : ISDN Calling Party Number Setup for Extensions** to assign each extension a Calling Party Number (maximum 16 digits per entry). The calling number is the subscriber number of the dial-in number. When a call is made by an extension which does not have an Extension Calling Number assigned (Program 21-13), the system sends the calling number for the ISDN trunk defined in Program 21-12.

 **If a Calling Party Number is assigned in both Programs 21-12 and 21-13, the system sends the data in Program 21-13.**

#### Input Data

Extension Number	Maximum 8 digits
------------------	------------------

Item No.	Calling Party Number Data	Default
01	0~9, *, # (Max. 16 digits)	No setting

#### Conditions

None

## 21-14 : Walking Toll Restriction Password Setup

Level:  
SA

### Description

Use **Program 21-14 : Walking Toll Restriction Password Setup** to assign the password and Toll Restriction Class for Walking Toll Restriction. Each code is six digits long, using any combination of 0~9, # and \*.

### Input Data

ID Table Number	1~500
-----------------	-------

Item No.	Item	Input Data	Default
01	User ID	Dial (Six digits)	No Setting
02	Walking Toll Restriction Class Number	1~15	1

### Conditions

None

### Feature Cross Reference

- Toll Restriction

# Program 21 : Outgoing Call Setup

## 21-15 : Individual Trunk Group Routing for Extensions

Level:

IN

---

### Description

Use **Program 21-15 : Individual Trunk Group Routing for Extensions** to designate the alternate trunk access route accessed when a user dials the Alternate Trunk Route Access Code. Refer to Program [11-09 : Trunk Access Code](#) when setting up alternate trunk codes. Refer to [14-06 : Trunk Group Routing](#) to set up the trunk routes. When entering data for this option, enter the route number or 0 to prevent routing.

### Input Data

Extension Number	Maximum 8 digits
------------------	------------------

Item No.	Day/Night Mode	Route Table Number	Default
01	1~8	0~100 (0 = No Setting)	0

### Conditions

None

# Program 22 : Incoming Call Setup

## 22-01 : System Options for Incoming Calls

Level:  
IN

### Description

Use **Program 22-01 : System Options for Incoming Calls** to define the system options for incoming calls.

#### Input Data

Item No.	Item	Input Data	Default	Description	Related Program
01	<b>Incoming Call Priority</b>	0 = Intercom Call Priority 1 = Trunk Call Priority	1	Use this option to determine if Intercom calls or trunk calls have answer priority when both are ringing simultaneously.	15-02-22
02	<b>Incoming Call Ring No Answer Alarm</b>	0 = Disable (Off) 1 = Enable (On)	0	If enabled, an incoming call that rings longer than the Ring No Answer Alarm interval (22-01-03), changes to a unique ring cadence to indicate that the call has been ringing too long. If disabled, this does not occur.	22-01-03 22-01-04
03	<b>Ring No Answer Alarm Time</b>	0~64800 (sec.)	60	If a trunk rings a multiline telephone longer than this interval, the system changes the ring cadence. This indicates to the user that the call has been ringing too long.	22-01-02
04	<b>DIL No Answer Recall Time</b>	0~64800 (sec.)	0	A DIL that rings its programmed destination longer than this interval diverts to the DIL No Answer Ring Group (set in Program 22-08).	
05	<b>--- Not Used ---</b>				
06	<b>DID Ring-No-Answer Time</b>	0~64800 (sec.)	20	In systems with DID Ring-No-Answer Intercept, this interval sets the Ring-No-Answer time. This interval is how long a DID call rings the destination extension before rerouting to the intercept ring group.	22-12
07	<b>DID Incoming Ring Group No Answer Time</b>	0~64800 (sec.)	20		

Program

22

**Input Data**

Item No.	Item	Input Data	Default	Description	Related Program
08	DID Pilot Call No Answer Time	0~64800 (sec.)	60		
09	DID to Trunk to Trunk no answer timer	0~64800 (sec.)	20		
10	VRS Waiting Message Operation	0 = Enable Always 1 = Change by Manual Operation	0	This program sets up the operation mode for Auto Attendant and Queuing Message.	22-14 22-15 22-08 22-04 22-01-04 20-15-11 15-07
11	VRS Waiting Message Interval Time	0~64800 (sec.)	20	Setup the sending duration time of the Auto – Attendant & Queuing. The message is repeatedly sent out within the specified time.	22-14-06 22-15-06 41-11-06

# Program 22 : Incoming Call Setup

## 22-02 : Incoming Call Trunk Setup

**Level:**  
IN

### Description

Use **Program 22-02 : Incoming Call Trunk Setup** to assign the incoming trunk type for each trunk. There is one item for each Night Service Mode.

#### Input Data

Trunk Port Number	001~200
-------------------	---------

Item No.	Day/Night Mode	Incoming Type	Default	Description	Related Program
01	1~8	0 = Normal 1 = VRS (second dial tone if no VRS installed) 2 = DISA 3 = DID 4 = DIL 5 = E&M Tie line 6 = Delayed VRS 7 = ANI/DNIS 8 = DID(DDI) Mode Switching	0	Use this option to set the feature type for the trunk you are programming.	14-04

#### Conditions

- When connecting to T1 trunks, after changing Program 22-02-01 to match the Telco connected T1 service type, the T1 cable or the T1 blade must be unplugged and then reconnected in order for the T1 blade to sync.
- When the trunk type is set to 3 (DID), the DID Transfer to Destination in 22-11-04 for each DID feature is not supported. This feature is supported only for DID trunks when assigned as VRS.
- When the trunk type is set to 3 (DID), the DID Intercept Destination feature for each DID is not supported. This feature is supported only for DID trunks assigned as VRS.

## 22-07 : DIL Assignment

Level:

IN

### Description

Use **Program 22-07 : DIL Assignment** to assign the destination extension or Department Calling Group for each DIL Incoming trunk. A DIL rings an extension directly, without any other Access Map or Ring Group programming. If an extension has a line key, the DIL rings the line key. If the extension does not have a line key, the DIL rings CAP keys. Use Program 22-02 to designate a trunk as a DIL. You can make eight DIL assignments, one for each Night Service mode.

### Input Data

Trunk Port Number	001~200
-------------------	---------

Item No.	Day/Night Mode	Number of Transferring Destination	Default
01	1~8	Extension Number (maximum eight digits) Pilot Number	No Setting

### Conditions

- Program 22-02 must be set to four for the trunk.

### Feature Cross Reference

- Direct Inward Line (DIL)

# Program 22 : Incoming Call Setup

## 22-08 : DIL/IRG No Answer Destination

Level:  
IN

### Description

For DIL Delayed Ringing, use **Program 22-08 : DIL/IRG No Answer Destination** to assign the DIL No Answer Ring Group. An unanswered DIL rings this group after the DIL No Answer Time expires (Program 22-01-04). DIL Delayed Ringing can also reroute outside calls ringing a Ring Group.

Make eight assignments, one for each Night Service mode.

### Input Data

Trunk Port Number	001~200
-------------------	---------

Item No.	Day/Night Mode	Incoming Group Number	Default
01	1~8	0 (No Setting) 001~100 (Incoming Ring Group) 102 (In-Skin/External Voice Mail or VM8000 InMail)	1

### Conditions

None

### Feature Cross Reference

- Direct Inward Line (DIL)
- Ring Group

# Program 22 : Incoming Call Setup

## 22-09 : DID Basic Data Setup

**Level:**

IN

### Description

Use **Program 22-09 : DID Basic Data Setup** to define the basic setting of Dial-In incoming calls for each trunk group.

#### Input Data

Trunk Group Number	001~100
--------------------	---------

Item No.	Item	Input Data	Default
01	<b>Expected Number of Digits</b> Enter the number of digits the table expects to receive from the telco. Use this program to make the system compatible with 3- and 4-digit DID service.	1~8	4
02	<b>Received Vacant Number Operation</b> Use this option to enable or disable Vacant Number Intercept.	0 = Disconnect (Cut) 1 = Transfer (Refer to <a href="#">Program 22-12 : DID Intercept Ring Group on page 2-306.</a> )	0
03	<b>Sub-Addressing Mode</b>	0 = Extension # Specify (Intercom) 1 = DID Conversion Table	0
04	<b>DID Receiving Mode for ISDN</b>	0 = Enbloc Receiving 1 = Overlap Receiving	0
05	<b>Local Code Digits</b> (Only Overlap Receiving Mode)	0~15 (0 = No Local Code)	0
06	<b>Local Code</b> (Only Overlap Receiving Mode)	Dial (maximum 16 digits)	No Setting
07	<b>Pilot Code</b> (Only Overlap Receiving Mode)	Dial (1 digit: 0~9)	No Setting
08	<b>T302 Time-out Operation</b> (Only Overlap Receiving Mode)	0 = Disconnect (Cut) 1 = Transfer (Refer to <a href="#">Program 22-12 : DID Intercept Ring Group on page 2-306.</a> )	0

**Conditions**

None

# Program 22 : Incoming Call Setup

## 22-11 : DID Translation Number Conversion

**Level:**

SA

### Description

Use **Program 22-11 : DID Translation Table Number Conversion** to specify for each Translation Table entry (2000).

- The digits received by the system (eight maximum)
- The extension the system dials after translation (24 digits maximum)
- The name that should show on the dialed extension display when it rings (12 characters maximum)
- The Transfer Target – 1 and 2
  - ☞ If the Transfer Targets are busy or receive no answer, those calls are transferred to the final transfer destination (Program 22-10).
- Operation Mode

Use the following chart when entering and editing text for names. Press the key once for the first character, twice for the second character, etc. For example, to enter a C, press 2 three times.

<b>Key for Entering Names</b>	
<b>When entering names in the procedures below, refer to this chart. Names can have up to 12 digits.</b>	
<b>Use this keypad digit . . .</b>	<b>When you want to . . .</b>
1	Enter characters: 1 @ [ ¥ ] ^ _ ` {   } → ← Á À Â Ã Ç É Ê ì ó
2	Enter characters: <b>A-C, a-c, 2.</b>
3	Enter characters: <b>D-F, d-f, 3.</b>
4	Enter characters: <b>G-I, g-i, 4.</b>
5	Enter characters: <b>J-L, j-l, 5.</b>
6	Enter characters: <b>M-O, m-o, 6.</b>
7	Enter characters: <b>P-S, p-s, 7.</b>
8	Enter characters: <b>T-V, t-v, 8.</b>
9	Enter characters: <b>W-Z, w-z, 9.</b>

Key for Entering Names	
When entering names in the procedures below, refer to this chart. Names can have up to 12 digits.	
Use this keypad digit . . .	When you want to . . .
0	Enter characters: 0 ! " # \$ % & ' ( ) ô õ ú ä ö ü α ε θ
*	Enter characters: * + , - . / : ; < = > ? π Σ σ Ω ∞ ¢ £
#	# = Accepts an entry (only required if two letters on the same key are needed - ex: TOM). Pressing # again = Space. (In system programming mode, use the right arrow soft key instead to accept and/or add a space.)
CONF	Clear the character entry one character at a time.
HOLD	Clear all the entries from the point of the flashing cursor and to the right.

### Input Data

Conversion Table Number	1~2000
-------------------------	--------

Item No.	Item	Input Data	Default
01	<b>Received Number</b> This is the received DID digits.	Maximum 8 digits	No Setting
02	<b>Target Number</b> Enter the destination number the DID number is to sent to.	Maximum 24 digits	No Setting
03	<b>DID Name</b> This is the name that is assigned to the DID digits when it rings the extension.	Maximum 12 characters	No Setting
04	<b>Transfer Operation Mode</b>	0 = No Transfer 1 = Busy 2 = No Answer 3 = Busy/No Answer	0

Item No.	Item	Input Data	Default
05	<b>Transfer Destination Number 1</b>	0 = No Setting 1~100 = Incoming Group 102 = In-Skin/External Voice Mail or VM8000 InMail 201~264 = Extension Group 400 = Valid Extension Number 401 = DISA 501~599 = DISA/VRS Message 601~699 = DSPDB-VM (VM Box No.) 1000~1999 = Speed Dial Number (000~999)	0
06	<b>Transfer Destination Number 2</b>  400 = Allows the outside party to dial a different extension number in the translation table (for example, ring no answer to a dialed number, the caller then hears a dial tone, allowing them to enter another Valid Extension Number).  401 = Provides the caller with DISA dialing options (requires using the DISA password).  Note: This applies to 22-11-05 and 22-11-06.		0
07	<b>Call Waiting</b>  PRG 20-09-07 overrides this setting.	0 = Disable (No) 1 = Enable (Yes)	0
08	<b>Maximum Number of DID Calls</b>	0~200 (0 = No Limit)	0
09	<b>Music on Hold Source</b>	0 = IC/MOH Port 1 = BGM Port 2 = ACI Port	0
10	<b>ACI Music Source Port</b>	When a sound source type is 2 in above : (0~96)	0
11	<b>Ring Group Transfer</b>  Enable (1) or disable (0) each conversation tables ability to follow the Ring Group programming defined in Program 22-12-01 : DID Intercept Ring Group.  If Program 22-11-05 : DID Translation Number Conversion, Transfer Destination Number 1 and Program 22-11-06 : DID Translation Number Conversion, Transfer Destination Number 2 are set, the priority of transferring is in this order: Program 22-11-05 then Program 22-11-06 then if Program 22-11-11 is enabled, Program 22-12-01.	0 = Disable (Caller will hear Ringback) 1 = Enabled (Go to normal ring)	1

**Conditions**

- When the trunk type is set to 3 (DID) in 22-02-01, the DID Transfer Destination for each DID feature is not supported. This feature is supported only for DID trunks when assigned as VRS.
- 

**Feature Cross Reference**

- Direct Inward Dialing (DID)

# Program 22 : Incoming Call Setup

## 22-12 : DID Intercept Ring Group

**Level:**

IN

### Description

For each DID Translation Table, use **Program 22-12 : DID Intercept Ring Group** to define the first destination group for DID calls.

Depending on the entry in Program 22-09-02 and 22-11-04, the incoming calls route to the first destination group by the following:

- Vacant number intercept (vacant number means that no phone is connected, no station blade is installed, or the extension number is not defined in Program 11-02)
- Busy intercept
- Ring-no-answer intercept

If the destination is 0, the calls are forwarded to the trunk ring group defined in Program 22-11 based on the table assigned to the DID trunk.

 **If Programs 22-11-05 and 22-11-06 are set, the priority of transferring is in this order:**  
**Program 22-11-05 + Program 22-11-06 + Program 22-12.**

**For busy and no-answer calls, if the first and third destinations are programmed, but the second destination is not, the incoming call goes to the third destination after the first destination. If the first and second destinations are not defined, but the third destination is, the call goes directly to the third destination.**

Conversion Table Area Number	01~20
------------------------------	-------

Item No.	Day/Night Mode	Incoming Group Number	Default
01	1~8	0 (No Setting) 1~100 (Incoming Ring Group) 102 (In-Skin/External Voice Mail or VM8000 InMail)	1

**Conditions**

None

## 22-14 : VRS Delayed Message for IRG

**Level:**  
IN

### Description

Use **Program 22-14 : VRS Delayed Message for IRG** (Incoming Group Ring) to define for each incoming ring group the timers, VRS message number and type of tone for VRS Waiting Message.

#### Input Data

Incoming Ring Group Number	1~100
----------------------------	-------

Item No.	Item	Input Data	Default
01	<b>1<sup>st</sup> Delayed Message Start Time</b> Time before the VRS Delay Message is played for IRG.	0~64800 (sec)	0
02	<b>1<sup>st</sup> Delayed Message Number</b> VRS message that is used for the 1 <sup>st</sup> Delayed Message.	0~101 0 = No Message 101 = Fixed Message	0
03	<b>1<sup>st</sup> Delayed Message Sending Count</b> This is the number of times the 1 <sup>st</sup> Delay Message is played. If set to 0, the 1 <sup>st</sup> Delay Message is not played.	0~255 (time)	0
04	<b>2<sup>nd</sup> Delayed Message Number</b> VRS message that is used for the 2 <sup>nd</sup> Delayed Message.	0~101 0 = No Message 101 = Fixed Message	0
05	<b>2<sup>nd</sup> Delayed Message Sending Count</b> This is the number of times the 2 <sup>nd</sup> Delay Message is played. If set to 0, the 2 <sup>nd</sup> Delay Message is not played.	0~255 (time)	0
06	<b>Tone Kind at Message Interval</b> What is heard between the Delay Message.	0 = Ring Back Tone 1 = MOH Tone 2 = BGM Source	0
07	<b>Disconnect Time After the End of VRS Delayed Message</b> Time, after all 2 <sup>nd</sup> Delay Messages are played, before the caller is disconnected.	0 = No Disconnect 1~64800 Seconds	60

## Program 23 : Answer Features Setup

### 23-03 : Universal Answer/Auto Answer

Level:

IN

---

#### Description

Use **Program 23-03 : Universal Answer/Auto Answer** to assign trunk routes (set in Program 14-06) to extensions for Universal Answer. If the call ringing the paging system is in an extension assigned route, the user can dial the Universal Answer code (#0) to pick up the call.

You can also use this program to let an extension user automatically answer trunk calls that ring other extensions (not their own). When the user lifts the handset, they automatically answer the ringing calls based on Trunk Group Routing programming (defined in Program 14-06). The extension user ringing calls, however, always have priority over calls ringing other co-worker extensions. Refer to the Line Preference feature in the Univerge UNIVERGE SV8100 Features and Specifications Manual for more information.

Make one entry for each Night Service mode.

#### Input Data

Extension Number	Maximum 8 digits
------------------	------------------

Item No.	Day/Night Mode	Route Table Number	Default	Description	Related Program
01	1~8	0~100	0	Use this program to let an extension user automatically answer trunk calls that ring other extensions. When the user lifts the handset, they automatically answer the ringing calls based on Trunk Group Routing programming (defined in Program 14-06).	14-06

## 24-02 : System Options for Transfer

**Level:**  
IN

### Description

Use **Program 24-02 : System Options for Transfer** to define the system options for the Transfer feature.

#### Input Data

Item No.	Item	Input Data	Default	Related Program
01	<b>Busy Transfer</b>  Use this option to prevent or allow extensions to Transfer calls to busy extensions. If disabled, calls transferred to busy extensions recall immediately.	0 = Disable (No) 1 = Enable (Yes)	1	
02	<b>MOH or Ringback on Transferred Calls</b>  Use this option to enable or disable MOH on Transfer. If enabled (0), a transferred caller hears MOH while their call rings the destination extension. If disabled (1), a transferred caller hears ringback while their call rings the destination extension.	0 = Hold Tone 1 = Ring Back Tone	0	20-03-02
03	<b>Delayed Call Forwarding Time</b>  If activated at an extension, Delayed Call Forwarding occurs after this time. This also sets how long a Transferred call waits at an extension forwarded to Voice Mail before routing to the called extension mailbox.	0~64800 (sec)	10	
04	<b>Transfer Recall Time</b>  An unanswered transferred call recalls to the extension that initially transferred it after this time.	0~64800 (sec)	30	
05	<b>Message Wait Ring Interval Time</b>  For Single Line Telephones (SLTs) without message waiting lamps, this is the time between intermittent ringing. If this value is set to 0, the system rings once.	0~64800 (sec)	30	

**Input Data**

Item No.	Item	Input Data	Default	Related Program
07	<b>Trunk-to-Trunk Transfer Release Warning Tone</b>  Time starts when a trunk begins talking with another trunk (for example: trunk-to-trunk transfer, outgoing from trunk, Tandem Trunking).  When this time expires, a warning tone is heard. If Program 24-02-10 is set, the conversation disconnects after time expires. This time is set again when the external digit timer expires. One of the trunks used must be an analog trunk (or leased line).	0~64800 (sec)	1800	14-01-25 20-28-01 20-28-02 20-28-03 24-02-10
08	<b>Delayed Transfer Time for all Department Groups</b>	0~64800 (sec)	10	11-11-28 11-11-29 15-07-59
09	<b>Two B-Channel Transfer Retry Timer</b>	0~64800 (sec)	10	10-03-16 (PRI)
10	<b>Disconnect Trunk-to-Trunk</b>	0~64800 (sec)	0	14-01-25 20-28-01 20-28-02 20-28-03 24-02-07
11	<b>No Answer Step Transfer</b>	0~64800 (sec)	10	14-01-26
12	<b>No Answer Trunk-to-Trunk Transfer</b>	0~64800 (sec)	0	14-01-26
13	<b>Hook Flash Sending Timer When the System Answers Automatically</b>  Time before sending the hook flash for Call Forward Centrex.	0~64800 (sec)	2

# Program 24 : Hold/Transfer Setup

## 24-09 : Call Forward Split Settings

**Level:**  
IN

### Description

Use **Program 24-09 : Call Forward Split Settings** to assign Call Forwarding Type and the destination numbers for each extension/virtual extension. The destination can be up to 24 digits long, using 0~9, \*, #, and @. Be sure to include the trunk access code (e.g., 9) in the number if the destination is off-premise.

☞ Only ISDN uses the @ symbol.

#### Input Data

Extension Number	Maximum 8 digits
------------------	------------------

Item No.	Input Data	Default
01	<b>Call Forwarding Type:</b> 0 = Call Forwarding Off 1 = Call Forwarding with both ring 2 = Call Forwarding when no answer 3 = Call Forwarding all calls 4 = Call Forwarding busy or no answer 5 = Call Forwarding when busy	0
02	<b>CO Call Forwarding Destination for Both Ring, All Call, No Answer:</b> 1~9, 0, #, *, R, @ (Up to 24 digits)  ☞ Only ISDN uses the @ symbol	No Setting
03	<b>Intercom Call Forwarding Destination for Both ring, All Call, No Answer:</b> 1~9, 0, #, *, R, @ (Up to 24 digits)	No Setting
04	<b>CO Call Forwarding Busy Destination:</b> 1~9, 0, #, *, R, @ (Up to 24 digits)	No Setting
05	<b>Intercom Call Forwarding Busy Destination:</b> 1~9, 0, #, *, R, @ (Up to 24 digits)	No Setting

Item No.	Input Data	Default
06	<b>Call Forwarding Destination for CTX/PBX for All Call, No Answer:</b> 0~9, #, *, R, @ (Up to 24 digits)	None
07	<b>Call Forwarding Destination for CTX/PBX for Busy:</b> 0~9, #, *, R, @ (Up to 24 digits)	None

## Program 25 : VRS/DISA Setup

### 25-03 : VRS/DISA Transfer Ring Group With Incorrect Dialing

Level:

IN

#### Description

Use **Program 25-03 : VRS/DISA Transfer Ring Group With Incorrect Dialing** to set what happens to a call when the DISA or Automated Attendant caller dials incorrectly or waits too long to dial. The call can either disconnect (0) or Transfer to an alternate destination (a ring group or voice mail). When setting the DISA and DID Operating Mode, make an entry for each Night Service mode.

#### Input Data

Trunk Port Number	001~200
-------------------	---------

Item No.	Day/Night Mode	Incoming Group Number	Default	Related Program
01	1~8	0 (Disconnect) 1~100 (Incoming Ring Group) 102 (In-Skin/External Voice Mail or VM8000 InMail)	0	22-04

#### Conditions

None

#### Feature Cross Reference

- Direct Inward System Access (DISA)

## Program 25 : VRS/DISA Setup

### 25-04 : VRS/DISA Transfer Ring Group With No Answer/Busy

Level:

IN

#### Description

Use **Program 25-04 : VRS/DISA Transfer Ring Group With No Answer/Busy** to set the operating mode of each DISA trunk. This sets what happens to the call when the DISA or Automated Attendant caller calls a busy or unanswered extension. The call can either disconnect (0) or Transfer to an alternate destination (a ring group or voice mail). When setting the DISA and DID Operating Mode, make an entry for each Night Service mode.

#### Input Data

Trunk Port Number	001~200
-------------------	---------

Item No.	Day/Night Mode	Incoming Group Number	Default	Related Program
01	1~8	0 (Disconnect) 1~100 (Incoming Ring Group) 102 (In-Skin/External Voice Mail or VM8000 InMail)	0	22-04

#### Conditions

None

#### Feature Cross Reference

- Direct Inward System Access (DISA)

## Program 25 : VRS/DISA Setup

### 25-05 : VRS/DISA Error Message Assignment

Level:  
IN

#### Description

Use **Program 25-05 : VRS/DISA Error Message Assignment** to assign the VRS message number to be used as the Automated Attendant error message. For each VRS/DISA trunk that the VRS answers, enter the VRS message (1~100) the outside caller hears if they dial incorrectly. If you enter 0 (i.e., no error message), the call reroutes according to Program 25-03 and 25-04.

For each trunk, make a separate entry for each Night Service mode.

#### Input Data

Trunk Port Number	001~200
-------------------	---------

Item No.	Day/Night Mode	VRS Message Number	Default
01	1~8	0~100 (0 = No Setting)	0

#### Conditions

None

#### Feature Cross Reference

- Direct Inward System Access (DISA)

# Program 25 : VRS/DISA Setup

## 25-06 : VRS/DISA One-Digit Code Attendant Setup

**Level:**

IN

### Description

Use **Program 25-06 : VRS/DISA One-Digit Code Attendant Setup** to set up single digit dialing through the VRS. This gives VRS callers single key access to extensions, the company operator, Department Calling Groups and Voice Mail. For each VRS message set to answer outside calls (refer to Program 25-04 and 25-05), you specify:

- The digit the VRS caller dials (0~9, \*, #). Keep in mind that if you assign destinations to digits, outside callers cannot dial system extensions.
- The destination reached (eight digits max.) when the caller dials the specified digit.

The destination can be an extension, a Department Calling pilot number or the Voice Mail master number. A one-digit code can be assigned for each Automated Attendant message.

Example:

Message Number=01, Destination=2, Next Message Number=0, Dial=399

In this example, when 2 is dialed by an outside caller, the system transfers the call to 399. This means that extension 200~299 cannot receive calls from VRS/DISA users during/after VRS Message 01.

### Input Data

Attendant Message Number	01~100
Received Dial	1~9,0,*,#

Item No.	Item	Input Data	Default
01	<b>Next Attendant Message Number</b>	0~100 (0 = No Setting) 101 = Voice Mail answers 104 = Refer to <a href="#">25-04 : VRS/DISA Transfer Ring Group With No Answer/Busy</a> 105 = Dial the other extension	0
02	<b>Destination Number</b>	Up to eight digits	No Setting

**Conditions**

- Outside caller may not be able to dial individual extensions or lines if the same first digit is defined here.
- 

**Feature Cross Reference**

- Direct Inward System Access (DISA)
- Voice Response System (VRS)

# Program 25 : VRS/DISA Setup

## 25-07 : System Timers for VRS/DISA

**Level:**

IN

### Description

Use **Program 25-07 : System Timers for VRS/DISA** to set the value for the system timers which affect DID and DISA. Refer to the following chart for a description of each option, its range and default setting.

### Input Data

Item No.	Item	Input Data	Default	Related Program
01	<b>VRS/DISA Dial Tone Time</b> After answering a DISA trunk, the system waits this time for the caller to dial the first digit of the DISA password. If the caller fails to dial during this time, the system drops the call.	0~64800 (sec)	10	25-04
02	<b>VRS/DISA No Answer Time</b> A VRS/DISA caller can ring an extension for this time before the system sets the call as a Ring No Answer. After this time expires, the call follows the programmed Ring No Answer routing (set in Program 25-03 and 25-04).	0~64800 (sec)	0	25-04
03	<b>Disconnect after VRS/DISA retransfer to IRG</b> <b>???</b>	0~64800 (sec)	60	
04	<b>Calling Time to Automatic Answering Telephone Set</b> Set the answering waiting time of the automatic answering extension when an incoming DID trunk call is received.	0~64800 (sec)	10	
05	<b>Duration Time for Guidance Message by Automatic Answering Telephone Set</b> Set the announcement time of the automatic answering extension after which an incoming DID trunk caller is disconnected.	0~64800 (sec)	10	
06	<b>Duration Time for Guidance Message by ACI</b> Set the announcement time by the ACI after which an incoming DID trunk caller is disconnected.	0~64800 (sec)	10	

### Input Data

Item No.	Item	Input Data	Default	Related Program
07	<b>Long Conversation Warning Tone Time</b> Determine the time a DISA caller or any trunk-to-trunk (such as Tandem Trunking) conversation can talk before the Long Conversation tone is heard.	0~64800 (sec)	3600	14-01-25 20-28-01 20-28-02 20-28-03
08	<b>Long Conversation Disconnect Time</b> This time determines how long the system waits before disconnecting a DISA caller or any trunk-to-trunk (such as Tandem Trunking) conversation call after the Long Conversation tone is heard.	0~64800 (sec)	10	14-01-25 20-28-01 20-28-02 20-28-03
09	<b>DISA Internal Paging Time</b> This is the maximum length of an Internal Page placed by a DISA caller. If the Page continues longer than this time, the system terminates the DISA call.	0~64800 (sec)	30	
10	<b>DISA External Paging Time</b> This is the maximum length of an External Page placed by a DISA caller. If the Page continues longer than this time, the system terminates the DISA call.	0~64800 (sec)	30	
11	<b>VRS/DISA Answer Delay Time</b> Sets up the time the system waits after receiving an incoming VRS/DISA call before the system automatically answers the call.	0~64800 (sec)	0	
13	<b>VRS/DISA Busy Tone Interval</b> If a DISA caller dials a busy extension (and Program 25-04 = 0), the system plays busy tone for this interval before disconnecting.	0~64800 (sec)	5	
14	<b>Delayed VRS Answer Time</b> Assign the delay time from switching from a normal incoming status to DID mode. If this time is set to 0, the call switches to DID mode immediately.	0~64800 (sec)	10	

### Conditions

### Feature Cross Reference

- Direct Inward System Access (DISA)

## Program 25 : VRS/DISA Setup

### 25-08 : DISA User ID Setup

Level:

SA

---

#### Description

Use **Program 25-08 : DISA User ID Setup** to set the 6-digit DISA password for each user. There are 15 users each with one 6-digit password.

#### Input Data

DISA User Number	1~15
------------------	------

Item No.	Password	Default	Related PRG
01	Dial (Fixed – six digits) 0~9, *, #	No Setting	49-10-11

#### Conditions

None

---

#### Feature Cross Reference

- Direct Inward System Access (DISA)

# Program 25 : VRS/DISA Setup

## 25-09 : Class of Service for DISA Users

Level:

IN

### Description

Use **Program 25-09 : Class of Service for DISA Users** to set the DISA Class of Service for each user. When a DISA caller enters a password (defined in Program 25-08), the system identifies the user and associates the appropriate DISA Class of Service with the call. Assign the DISA Class of Service options in Program 20-14. When programming DISA Class of Service, make one entry for each Night Service mode.

### Input Data

DISA User Number	1~15
------------------	------

Item No.	Day/Night Mode	Function Class	Default
01	1~8	1~15	1

### Conditions

- DISA Class of Service cannot be 0.
- Program 20-06 cannot be used to assign Class of Service to DISA trunks.

### Feature Cross Reference

- Direct Inward System Access (DISA)

## Program 25 : VRS/DISA Setup

### 25-10 : Trunk Group Routing for DISA

Level:

IN

---

#### Description

Use **Program 25-10 : Trunk Group Routing for DISA** to assign the Trunk Group route chosen when a user places a DISA call to the system and dials 9. Set Trunk Group Routing in Program 14-06. Enable or disable the DISA caller ability to dial 9 in Program 20-14-02. Assign a route to each DISA Class of Service (1~15). The system assigns a DISA Class of Service to a call based on the password the DISA caller dials.

When programming, make a separate entry for each Night Service Mode.

#### Input Data

DISA User Number	1~15
------------------	------

Item No.	Day/Night Mode	Route Table Number	Default
01	1~8	0~100 (0 = No Setting)	1

#### Conditions

None

---

#### Feature Cross Reference

- Direct Inward System Access (DISA)

## Program 25 : VRS/DISA Setup

### 25-11 : DISA Toll Restriction Class

Level:

IN

#### Description

For systems that use Toll Restriction, use **Program 25-11 : DISA Toll Restriction Class** to assign a Toll Restriction Class (1-15) to each DISA user (1~15). The system uses the Toll Restriction Class you enter in Program 21-05 and 21-06. The Toll Restriction Class assigned to a DISA call is based on the DISA Class of Service and user, which is determined by the password the caller dials.

When programming, make a separate entry for each Night Service mode.

#### Input Data

DISA User Number	1~15
------------------	------

Item No.	Day/Night Mode	Toll Restriction Class	Default
01	1~8	1~15	2

#### Conditions

- Program 21-05 cannot be used to assign Toll Restriction to DISA trunks.

#### Feature Cross Reference

- Direct Inward System Access (DISA)

# Program 25 : VRS/DISA Setup

## 25-12 : Alternate Trunk Group Routing for DISA

Level:

IN

### Description

Use **Program 25-12 : Alternate Trunk Group Routing for DISA** to define the trunk route selected when a DISA caller dials the Alternate Trunk Access Code. The route selected is based on the DISA caller Class of Service, which in turn is determined by the password the caller dials. When programming, make a separate entry for each Night Service Mode.

Use Program 11-09-02 to set the Alternate Trunk Access Code. Use Program 14-06 to set trunk routes.

### Input Data

DISA User Number	1~15
------------------	------

Item No.	Day/Night Mode	Route Table Number	Default
01	1~8	0~100 (0 = No Setting)	1

### Conditions

- You cannot use Program 21-15 to assign alternate trunk routing to DISA trunks.

### Feature Cross Reference

- Direct Inward System Access (DISA)
- Trunk Group Routing

**Conditions**

None

---

**Feature Cross Reference**

- Automatic Route Selection

## Program 26 : ARS Service

### 26-03 : ARS Dial Treatments

Level:

IN

#### Description

Use **Program 26-03 : ARS Dial Treatments** to assign the 15 Dial Treatments for automatic ARS dialing translation. Assign Dial Treatments to Service Numbers (Trunk Groups) in Program 26-02. The ARS Dial Treatment options are:

- 3** – Delete the NPA if dialed as part of the initial call.
  - ☞ Requires at least 11 digits in the ARS table (Program 26-02-01).
- 2** – Delete the leading digit if dialed as part of the initial call.
  - ☞ Requires at least eight digits in the ARS table (Program 26-02-01).
- 1** – Add a leading 1 if not dialed as part of the initial call.
  - ☞ Requires at least eight digits in the ARS table (Program 26-02-01).
- INPA** – Insert the NPA specified by NPA.
- An** – For Alternate Carrier Access (n = 1~4). The numeric digit instructs the system to insert a Transit Network Selection information element in the SETUP message and also identifies which code in Program 26-11 will be included in the information element. This function is valid only for outbound calls by ISDN trunks.
- DNN** – Outdial the NN number of digits or execute the code that follows. For example, D041234 outdials 1234. Valid entries are 0~9, #, \*, Wnn (wait nn seconds) and P (pause). Each digits code counts as a digit. So, for example, if a P was added for a pause, the entry would look like: **D05P1234**.
- Wnn** – Wait nn seconds.
- P** – Pause in analog trunk.
- R** – Redial the initially dialed number, including any modifications.
- E** – End of Dial Treatment. All Dial Treatments must end with the E code.
- X** – When ARS is enabled, X must be entered in the Dial Treatment for the system to output the extension number of the call originator to the black box for the E911 feature.

**30**

# Program 30 : DSS/DLS Console Setup

## 30-02 : DSS Console Extension Assignment

Level:

IN

### Description

Use **Program 30-02 : DSS Console Extension Assignment** to identify which extensions have DSS Consoles connected.

- Up to 32 different extensions with DSS Consoles can be set up. A single extension can have up to four 60-button DSS Consoles (32 is the maximum allowed per system).

When programming, each extension/DSS Console(s) combination is called a Console Number. There are 32 Console Numbers (1~32). Console Numbers can be assigned to extensions. When entering data, the assignment for Console Number 1 is normally made first.

### Input Data

60-button DSS Console Number	01~32
------------------------------	-------

Item No.	Item	Description	Default
01	<b>Extension Number</b>	The extension number for the multiline terminal connected with the DSS console (up to eight digits)	No Setting

### Conditions

None

### Feature Cross Reference

- Direct Station Selection (DSS) Console

# Program 30 : DSS/DLS Console Setup

## 30-03 : DSS Console Key Assignment

Level:

SA

### Description

Use **Program 30-03 : DSS Console Key Assignments** to customize the key assignments for 60-button DSS Consoles. A DSS Console key can have any function with up to four digits (e.g., extension number or Service Code).

To prevent lamp problems when reassigning DSS Console keys, clearing an extension programmed key before reassigning it is recommended [Enter key to be cleared + 00 or \*00 (If using WebPro or PC Programming, delete the key assignments and upload the change to the system before proceeding.)] Without clearing an extension key first, the DSS Console may not show the correct lamp display, although the DSS function works correctly.

If you are programming the system from the extension to which the DSS Console is connected, either by phone or using the WebPro or PC Program, you may need to unplug the DSS and plug it back in to reset the console lamping.

### Input Data

#### Index 1

DSS Console Number	01~32
--------------------	-------

#### Index 2

Item No.	Key Number	Function Number	Additional Data
01	001~500	0~99 (General Functional Level) 97 = Door Box Access key (additional data: 1~8 Door Box No.) *00 ~ *99 (Appearance Functional Level)	Refer to <a href="#">Function Number List</a> on the following pages.

**Function Number List**

## 31-01 : System Options for Internal/External Paging

Level:  
IN

### Description

Use **Program 31-01 : System Options for Internal/External Paging** to define the system options for Internal/External Paging.

The system shows the name you program on the telephone display. Use the following chart when entering and editing text. When using the keypad digits, press the key once for the first character, twice for the second character, etc. For example, to enter C, press 2 three times. Press 2 six times to display the lower case letter.

Key for Entering Names	
When entering names in the procedures below, refer to this chart. Names can have up to 12 digits.	
Use this keypad digit ...	When you want to...
1	Enter characters: 1 @ [ ¥ ] ^ _ ` {   } → ← Á À Â Ã Ç É Ê ì ó
2	Enter characters: <b>A-C, a-c, 2.</b>
3	Enter characters: <b>D-F, d-f, 3.</b>
4	Enter characters: <b>G-I, g-i, 4.</b>
5	Enter characters: <b>J-L, j-l, 5.</b>
6	Enter characters: <b>M-O, m-o, 6.</b>
7	Enter characters: <b>P-S, p-s, 7.</b>
8	Enter characters: <b>T-V, t-v, 8.</b>
9	Enter characters: <b>W-Z, w-z, 9.</b>
0	Enter characters: 0 ! " # \$ % & ' ( ) ô õ ú ä ö ü α ε θ

Program

31

Key for Entering Names (Continued)	
When entering names in the procedures below, refer to this chart. Names can have up to 12 digits.	
Use this keypad digit . . .	When you want to . . .
*	Enter characters: * + , - . / : ; < = > ? π Σ σ Ω ∞ ¢ £
#	# = Accepts an entry (only required if two letters on the same key are needed - ex: TOM). Pressing # again = Space. (In system programming mode, use the right arrow soft key instead to accept and/or add a space.)
Conf	Clear the character entry one character at a time.
Hold	Clear all the entries from the point of the flashing cursor and to the right.

### Input Data

Item No.	Item	Input Data	Default	Description	Related Program
01	All Call Paging Zone Name	Up to 12 Characters	Group All	Assign a name to each All Call Internal Paging zone. The name shows on the display of the telephone making the announcement.	11-12-19 31-02-02
02	Page Announcement Duration  (Affects External Paging only)	0~64800 sec	1200	This timer sets the maximum length of Page announcements.	
04	Privacy Release Time	0~64800 sec	90	Once the user initiates a Meet-Me Conference or Voice Call Conference, the system waits this time for the Paged party to join the call.

# Program 31 : Paging Setup

## ***31-02 : Internal Paging Group Assignment***

**Level:**  
IN

### Description

Use **Program 31-02 : Internal Paging Group Assignment** to assign extensions to Internal Paging Groups (i.e., Page Zones). The setting in this program also determines if the Internal Page Group can receive Internal All Call Paging. The system can have up to 64 paging groups. An extension can be in only one Internal Paging Group.

### Input Data

Extension Number	Maximum 8 digits
------------------	------------------

Item No.	Item	Input Data	Default
01	<b>Internal Paging Group Number</b> Assign extensions to Internal Paging Groups (i.e., Page Zones). The system allows up to 64 Internal Paging Groups. An extension can be in only one Internal Paging Group.	0~64 (0 = No Setting)	0 for IP Station 1 for TDM Station
02	<b>Internal All Call Paging Receiving</b> Allow or prevent All Call Internal Paging for each extension. If allowed, extension can place and receive All Call Internal Paging announcements. If prevented, extensions can only make (not receive) All Call Internal Paging announcements. If combined, Paging zones should be restricted as well, change the internal page zone group in Program 31-07-01 to 0.	0 = Off 1 = On	0

# Program 31 : Paging Setup

## 31-04 : External Paging Zone Group

Level:  
IN

### Description

Use **Program 31-04 : External Paging Zone Group** to assign each External Paging zone to an External Paging group. Users call the External Paging group when broadcasting announcements to the external zone. When programming, the zones on the PGD(2)-U10 ADP are numbers 1~8. On the UNIVERGE SV8100 system, the CD-CP00-US zone is number 9.

To simplify programming and troubleshooting, always make the External Paging Zone Group the same number as the External Paging zone (i.e., 1 = 1, 2 = 2, etc.).

### Input Data

External Speaker Number	1~9
-------------------------	-----

Item No.	Paging Group Number	Default
01	0~8 (0 = No Setting)	Speaker 1 [PGD(2)-U10 ADP] = 1 (Group 1) Speaker 2 [PGD(2)-U10 ADP] = 2 (Group 2) Speaker 3 [PGD(2)-U10 ADP] = 3 (Group 3) Speaker 4 [PGD(2)-U10 ADP] = 4 (Group 4) Speaker 5 [PGD(2)-U10 ADP] = 5 (Group 5) Speaker 6 [PGD(2)-U10 ADP] = 6 (Group 6) Speaker 7 [PGD(2)-U10 ADP] = 7 (Group 7) Speaker 8 [PGD(2)-U10 ADP] = 8 (Group 8) Speaker 9 (CD-CP00-US) = 1 (Group 1)

# Program 31 : Paging Setup

## 31-06 : External Speaker Control

**Level:**  
IN

### Description

Use **Program 31-06 : External Speaker Control** to define the settings for the external speaker using an amplifier.

#### Input Data

External Speaker Number	1~9
-------------------------	-----

Item No.	Item	Input Data	Default
01	<b>Broadcast Splash Tone Before Paging (Paging Start Tone)</b>  Use this option to enable or disable splash tone before Paging over an external zone. If enabled, the system broadcasts a splash tone before the External Paging announcement.	0 = No Tone (None) 1 = Splash Tone 2 = Chime Tone	2
02	<b>Broadcast Splash Tone After Paging (Paging End Time)</b>  Use this option to enable or disable splash tone after Paging over an external zone. If enabled, the system broadcasts a splash tone at the end of an External Paging announcement.	0 = No Tone (None) 1 = Splash Tone 2 = Chime Tone	2
03	<b>Speech Path</b>  Determine if the external speaker will be used for talkback (As this option is not available with the CD-CP00-US external page zone, speaker 9 should be left at 1).	0 = Both Way (Duplex) 1 = One Way (PGD(2)-U10 ADP → SPK) (Simplex)	1
04	<b>CODEC Transmit Gain Setup</b>	1~63 (-15.5 ~ +15.5dB)	32
05	<b>CODEC Receive Gain Setup</b>	1~63 (-15.5 ~ +15.5dB)	32

# Program 32 : Door Box and Sensor Setup

## 32-01 : Door Box Timers Setup

Level:  
IN

### Description

Use **Program 32-01 : Door Box Timers Setup** to assign the timers used for the Door Box.

 *The Door Box feature is called Door Phone when programming via WebPro and using a Multiline Terminal.*

### Input Data

Item No.	Item	Input Data	Default
01	<b>Door Box Answer Time</b> A multiline user must answer Door Box chimes during this time.	0~64800 (sec.)	30
02	<b>Door Lock Cancel Time</b> When a single line (2500 type) telephone user hook flashes or a multiline user presses the Recall key while talking to a Door Box, the strike stays open for this time.	0~64800 (sec.)	10
03	<b>Off-Premise Call Forward by Door Box Disconnect Timer</b> Define the conversation period for an Off-Premise Call Forward by Door Box call. When this timer expires, the caller hears busy tone for three seconds (fixed time), and the call is then disconnected.	0~64800 (sec.)	60

# Program 33 : CTA and ACI Setup

## 33-02 : ACI Department Calling Group

Level:

IN

### Description

Use **Program 33-02 : ACI Department Calling Group** to assign ACI ports to Department Groups. An ACI port can be in only one group.

Also use this program to set the ACI port priority. When a call comes into the ACI Department Group, it connects to the ACI port in order of its priority. A higher priority port (e.g., 1) receives calls before a lower priority port (e.g., 6). There are 96 ACI ports and 16 ACI Department Groups available.

### Input Data

ACI Port Number	01~96
-----------------	-------

Item No.	Group Number	Priority
01	01~16	1~96

### Default

ACI Port	Group	Priority
01	1	1
02	1	2
:	:	:
96	1	96

### Conditions

None

### Feature Cross Reference

# Program 34 : Tie Line Setup

## 34-01 : E&M Tie Line Basic Setup

Level:

IN

### Description

Use Program 34-01 : E&M Tie Line Basic Setup to define the basic settings for each E&M Tie line.

#### Input Data

Trunk Port Number	001~200
-------------------	---------

Program

34

Item No.	Item	Input Data	Default	Description	Related Program
01	DID/E&M Start Signaling	0 = 2 <sup>nd</sup> Dial Tone 1 = Wink 2 = Immediate 3 = Delay	1	Set the start signaling mode for DID and Tie trunks. DID and tie trunks can use either immediate start or wink start signaling.	22-02
02	Receive Dial Type for E&M Tie Line	0 = DP 1 = DTMF	1		10-09
03	E&M Dial-In Mode	0 = Specify Extension Number (Intercom) 1 = Use Conversion Table (NTT)	0	Determine if the incoming Tie Line call should be directed as an intercom call or if it should follow the DID Translation Table in Program 22-11.	22-11
04	E&M Line Dial Tone	0 = Disable (No) 1 = Enable (Yes)	1	Enter 1 if the Tie Line should send dial tone to the calling system after the call is set up. Enter 0 if the Tie Line should not send dial tone.	
05	System Toll Restriction	0 = No (Off) 1 = Yes (On)	0	Determine if an incoming Tie Line call should be subject to Toll Restriction.	21-05

**Conditions**

None

---

## Feature Cross Reference

## Program 34 : Tie Line Setup

### 34-02 : E&M Tie Line Class of Service

Level:  
IN

#### Description

Use **Program 34-02 : E&M Tie Line Class of Service** to assign a Class of Service to a Tie line (there are 15 Tie line Classes of Service). The Class of Service options are defined in Program 20-14. For each Tie line, make a separate entry for each Night Service mode.

#### Input Data

Trunk Port Number	1~200
-------------------	-------

Item No.	Day/Night Mode	Class	Default	Related Program
01	1~8	1~15	1	20-14

#### Conditions

- Program 20-06 cannot be used to assign Class of Service to Tie lines.

#### Feature Cross Reference

- Tie Lines

## Program 34 : Tie Line Setup

### *34-03 : Trunk Group Routing for E&M Tie Lines*

Level:

IN

---

#### Description

Use **Program 34-03 : Trunk Group Routing for E&M Tie Lines** to assign the trunk group route 1~8 or 1~100) chosen when a user seizes a Tie Line and dials 9. (Set Trunk Group Routing in Program 14-07.) If the system has Automatic Route Selection, dialing 9 accesses ARS. Make a separate entry for each Tie Line – for each Night Service Mode.

#### Input Data

Trunk Port Number	001~200
-------------------	---------

Item No.	Day/Night Mode	Route Table Number	Default
01	1~8	0~100 (0 = No Setting)	1

#### Conditions

None

---

#### Feature Cross Reference

- Tie Lines

## Program 34 : Tie Line Setup

### **34-04 : E&M Tie Line Toll Restriction Class**

**Level:**  
IN

#### Description

Use **Program 34-04 : E&M Tie Line Toll Restriction Class** to enter a Toll Restriction Class for each Tie Line. There are 15 Toll Restriction Classes which are defined in Programs 21-05 and 21-06. For each Tie Line, you make a separate Toll Restriction Class entry for each Night Service mode.

#### Input Data

Trunk Port Number	001~200
-------------------	---------

Item No.	Day/Night Mode	Toll Restriction Class	Default	Related Program
01	1~8	1~15	2	21-05 14-01-08

#### Conditions

- Program 20-06 cannot be used to assign Toll Restriction to Tie Lines.

#### Feature Cross Reference

- Tie Lines

## Program 34 : Tie Line Setup

### 34-05 : Tie Line Outgoing Call Restriction

Level:

IN

---

#### Description

Use **Program 34-05 : Tie Line Outgoing Call Restriction** to build a restriction matrix for outgoing trunk calls placed from an inbound trunk (e.g., dialed from a Tie Line). For each inbound trunk group, enable or disable access to each CO trunk group.

#### Input Data

Incoming Trunk Group Number	001~100
-----------------------------	---------

Outgoing Trunk Group Number	Input Data	Default
1~100	0 = Enable (Y-Tandem) 1 = Disable (N-Tandem)	0

#### Conditions

None

---

#### Feature Cross Reference

- Tie Lines

# Program 34 : Tie Line Setup

## 34-06 : Add/Delete Digit for E&M Tie Line

Level:  
IN

### Description

Use **Program 34-06 : Add/Delete Digit for E&M Tie Line** to set digits that the system should add or delete for Tie Lines.

**Delete Digit**

Some Tie Line networks pass the location number and extension number to the remote side. This program allows the system to ignore such numbers for a call.

If individual extension users do not want to receive an incoming call, they could delete all digits including the extension number.

**Add Digit**

If a Tie Line network requires additional digits to reroute the call to a location, the digits for the location can be added to the received digits.

### Input Data

Incoming Trunk Group Number	001~100
-----------------------------	---------

Item No.	Item	Input Data	Default
01	Delete Digit	0~255 (255 = delete all digits)	0
02	Additional Dial Digits	Up to four digits (0~9, *, #)	No Setting

### Conditions

None

### Feature Cross Reference

Tie Lines

# Program 34 : Tie Line Setup

## 34-07 : E&M Tie Line Timer

Level:

IN

---

### Description

Use **Program 34-07 : E&M Tie Line Timer** to define the system service tone timers.

#### Input Data

Item No.	Item	Input Data	Default
01	First Digit Pause (E&M Immediate Start)	0~64800	3
02	First Digit Pause (E&M Wink Start)	0~64800	0
03	First Digit Pause (LD Trunk)	0~64800	3
04	LD Trunk Guard Time	0~64800	0
05	Trunk Answer Detect Timer for E&M	0~64800	30

#### Conditions

- If PRG 34-07-05 is left at default (30) the transferred call recalls to the station that performed the transfer when not answered.

---

### Feature Cross Reference

- Tie Lines

### 34-08 : Toll Restriction Data for E&M Tie Lines

Level:  
IN

#### Description

Use **Program 34-08 : Toll Restriction Data for E&M Tie Lines** to define the toll restriction data for E&M Tie Lines. This data should be defined if Tie Line Toll Restriction is enabled in Program 21-05-13.

#### Input Data

Class of Service	01~15
------------------	-------

Item No.	Table No.	Dial Data	Default	Related Program
01	01~20	Up to 10 Digits (0~9, *, #)	No Setting	21-05-13

#### Conditions

None

#### Feature Cross Reference

- Tie Lines

# Program 34 : Tie Line Setup

## 34-09 : ANI/DNIS Service Options

**Level:**

IN

### Description

Use **Program 34-09 : ANI/DNIS Service Options** to define the ANI//DNIS service option setup for E&M Class of Service.

#### Input Data

Class of Service	01~15
------------------	-------

Item No.	Name	Input Data	Default		Related Program
			COS 01~14	COS 15	
01	<b>Receive Format</b>  Use this option to specify the format of the ANI/DNIS data received from the telco. Make sure your entry is compatible with the service the telco provides. The character * indicates a delimiter.  <i>If PRG34-01-02 is selected to 2 (DTMF), this PRG works only as 4 =*ANI*DNIS*.</i>	0 = Address 1 = *ANI* 2 = *DNIS* 3 = *ANI*Address* 4 = *ANI*DNIS* 5 = *DNIS*ANI* (* = Delimiter Code)	0	0	34-01-02 34-09-02
02	<b>Delimiter Dial Code</b>  This option defines the character Telco uses as a delimiter (see entries 1~5 in Item 1 above). Valid entries are 0~9, #, and *.	1~9, 0, #, *	*	*	34-09-01
03	<b>Route Setup of Receive Dial</b>  This option specifies the source of the data the system uses to route incoming ANI/DNIS calls. If option 2 is selected, refer to Program 34-09-04.	0 = Fixed Route (Item 08) (No Routing)  1 = Routes on Received DNIS or Address Data  2 = Routes on Received ANI Data	0	0	22-09-01 22-11-01 34-09-04 34-09-08

Item No.	Name	Input Data	Default		Related Program
			COS 01~14	COS 15	
04	<b>Route Table Setup of Target Dial</b>  The option sets how the system uses the route data (gathered in Item 3) to route incoming ANI/DNIS calls.  If option 2 is selected, and the call is to be routed using the DID table (1), up to 8 digits can be matched. The number of expected digits set in Program 22-09-01 must match the ANI digits defined in Program 22-11-01. For example, if an ANI/DNIS number received was *2035551234*3001* and Program 22-09-01=4, the entry in 22-11-01 must be 1234 with the defined target extension.  If the call is to be routed using the ABB table (0), up to 24 digits can be matched. Define the range of the ABB table to be used in Program 34-09-06. The data is compared to the entries in Program 13-04-01 and then routed according to Program 13-04-03.	0 = SPD Table (Program 13-03) 1 = DID Table (Program 22-11)	0	0	13-04-01 13-04-03 22-09-01 22-11 34-09-05 34-09-06
05	<b>ANI/DNIS Display as Target Dial Name</b>  Use this option to set whether or not ANI data should appear on telephone displays as part of Caller ID display.	0 = Display Off 1 = Display On	1	0	13-04 20-09-02 22-11-03 23-09-04
06	<b>Routing SPD Table Setup</b>  Use this option to define which part of the ABB Table set up in Program 13-04 the system uses for ANI/DNIS Caller ID look-ups and ANI/DNIS routing.  This is required if Items 4 and 5 above are 1 (Caller ID on). When you specify a starting and end address, the system uses the part of the table for look-ups.  When you specify a starting address and length, the system uses that part of the table for routing. If the incoming ANI/DNIS number data matches the Number entry in the table, the system routes according to the associated Name data. That data can be an extension, Department Group pilot number, the voice mail master number or a trunk ring group.	Start = 0, 100~1900 End = 0, 99~1999	Start = 1000 End = 1199	Start = 0 End = 0	13-04
07	<b>Routing on ANI/DNIS Error</b>  This option lets you determine how the system handles an ANI/DNIS call if a data error is detected in the incoming data string.	0 = Play Busy Tone to Caller 1 = Route Caller to Ring Group Specified in Program 25-03 (Transfer)	1	0	25-03

Item No.	Name	Input Data	Default		Related Program
			COS 01~14	COS 15	
08	<b>Routing When Destination Busy or No Answer</b>  This option lets you determine how the system handles an ANI/DNIS call if destination is busy or does not answer.	0 = Play Busy or Ringback Tone to Caller (Busy/NoAns) 1 = Route Caller to Ring Group Specified in Program 25-04 (Transfer)	0	0	25-04
09	<b>Calling Number Address Length</b>  When Item 1=0 (ANI/DNIS receive format is the address), use this option to specify the address length. The choices are from 1~8 digits.	1~8	7	7	34-09-01

# Program 35 : SMDR Account Code Setup

## 35-01 : SMDR Options

Level:  
IN

### Description

Use **Program 35-01 : SMDR Options** to set the SMDR (Station Message Detail Recording) options for each of the eight SMDR ports. Refer to the following chart for a description of each option, its range and default setting.

### Input Data

SMDR Port Number	1~8
------------------	-----

Item No.	Item	Input Data	Default
01	<b>Output Port Type</b> This option specifies the type of connection used for SMDR. The baud rate for the COM port should be set in Program 10-21-02 or 15-02-19.	0 = None 3 = LAN 4 = CTA/CTU	0
02	<b>Output Destination Number</b> This option specifies the SMDR printer output extension (CTA/CTU extension number).	Up to 8 digits	No Setting
03	<b>Header Language</b> Specify the language in which the SMDR header should be printed.	0 = English 1 = German 2 = French 3 = Italian 4 = Spanish	0
04	<b>Omit Digits</b> The number of digits entered in this option do not print on the SMDR report. For example, if the entry is 10, the first 10 digits a user dials do not appear on the SMDR report.	0~24 (0 = Not applied)	0
05	<b>Minimum Digits</b> Outgoing calls must be at least this number of digits for inclusion in the SMDR report.	0~24 (0 = Not Applied)	0

Item No.	Item	Input Data	Default
06	<b>Minimum Call Duration</b> The duration of the call must be at least this time to be included on the SMDR report.	0~65535 (sec) (0 = All)	0
07	<b>Minimum Ring Time (For Incoming Calls)</b> A call must ring for at least this time to be included on the SMDR report.	0~65535 (sec) (0 = All)	0
08	<b>Format Selection</b>	0 = NA Type (North America) 1 = G/J Type (Overseas/ Japan)	0

**Conditions**

None

---

# Program 35 : SMDR Account Code Setup

## 35-02 : SMDR Output Options

**Level:**  
IN

### Description

Use **Program 35-02 : SMDR Output Options** to set the SMDR (Station Message Detail Recording) output options for each of the eight SMDR ports. Refer to the following chart for a description of each option, its range and default setting.

#### Input Data

SMDR Port Number	1~8
------------------	-----

Item No.	Item	Input Data	Default
01	<b>Toll Restricted Call</b>  SMDR can include or exclude calls blocked by Toll Restriction.	0 = Not Displayed 1 = Displayed	1
02	<b>PBX Calls</b>  When the system is behind a PBX, SMDR can include all calls or just calls dialed using the PBX trunk access code.	0 = Not Displayed 1 = Displayed	1
03	<b>Trunk Number or Name</b>  Select whether the system should display the trunk name (0) or the number (1) on SMDR reports.  ☞ If this option is set to 1, Program 35-02-14 must be set to 0.	0 = Name 1 = Number	1
04	<b>Summary (Daily)</b>  Set this option to (1) to have the SMDR report provide a daily summary (at midnight every night).	0 = Not Displayed 1 = Displayed	1
05	<b>Summary (Weekly)</b>  Set this option to (1) to have the SMDR report provide a weekly summary (every Saturday at midnight).	0 = Not Displayed 1 = Displayed	1
06	<b>Summary (Monthly)</b>  Set this option to (1) to have the SMDR report provide a monthly summary (at midnight on the last day of the month).	0 = Not Displayed 1 = Displayed	1

Item No.	Item	Input Data	Default
07	<b>Toll Charge Cost</b> Set this option to (1) have the SMDR report include toll charges.	0 = Not Displayed 1 = Displayed	1
08	<b>Incoming Call</b> Enable this option (1) to have the SMDR report include incoming calls. If you disable this option (0), incoming calls do not print.	0 = Not Displayed 1 = Displayed	1
09	<b>Extension Number or Name</b> Set this option (1) to have the SMDR report include extension numbers. Set this option (0) to have the SMDR report include extension names.	0 = Name 1 = Number	1
10	<b>All Lines Busy (ALB) Output</b> Determine if the All Lines Busy (ALB) indication should be displayed.	0 = Not Displayed 1 = Displayed	0
11	<b>--- Not Used ---</b>		
12	<b>DID Table Name Output</b> Determine if the DID table name should be displayed.	0 = Not Displayed 1 = Displayed	0
13	<b>CLI Output When DID to Trunk</b> Determine if the CLI output should be displayed for DID.	0 = Not Displayed 1=Displayed	0
14	<b>Date</b> Determine whether the date should be displayed on SMDR reports.   <i>This option must be set to 0 if the trunk name is set to be displayed in Program 35-02-03.</i>	0 = Not Displayed 1 = Displayed	0
15	<b>CLI/DID Number Switching</b> Determine whether or not the CLI/DID Number Switching should be displayed.	0 = CLI (CLIP) 1 = DID Calling Number	0
16	<b>Trunk Name or Received Dialed Number</b> Determine how the SMDR should print incoming calls on ANI/DNIS or DID trunks. If set to (1), ANI/DNIS trunks can print DNIS digits. If set to (0) trunk names are printed instead.	0 = Trunk Port Name 1 = Received Dialed Number	0
17	<b>Print Account Code or Caller Name of Incoming Call</b> Determine if SMDR should print Account Code or Caller Name of Incoming Call.	0 = ACC 1 = CNAME	0
18	<b>Print Mode for Caller Name of Incoming Call</b> Determine how SMDR should print Caller Name of Incoming Call.	0 = Normal 1 = Line Feed	0

## *41-02 : ACD Group and Agent Assignments*

Level:

SA

### Description

In **Program 41-02 : ACD Group and Agent Assignments**, for each ACD extension number, assign an ACD Group (1~64). An ACD Group number is assigned to each Work Period number (1~8).

The assigned extension will work as an ACD agent extension in the following cases:

- The trunk belonging to an ACD group receives an incoming call while an ACD agent is logged in.
- An extension transfers a call to an ACD group using the ACD group pilot number.
- An incoming call is received with a DID/DISA number which is assigned as an ACD pilot number.

### Input Data

Extension Number	Up to 8 digits
------------------	----------------

Item No.	ACD Work Period Mode Number	ACD Group No.	Default
01	1~8	0~64 (0 = No setting)	0

### Conditions

None

### Feature Cross Reference

## ***41-03 : Incoming Ring Group Assignment for ACD Group***

**Level:**  
SA

### Description

In **Program 41-03 : Incoming Ring Group Assignment for ACD Group**, for each incoming trunk group set up in Program 22-05, designate which ACD Group (1~64) the trunks should ring for each of the eight Work Periods. Also use this program to assign an Incoming Trunk Ring Group as priority or normal. Use Program 41-06 to set up the Work Schedules and Work Periods for trunks. Use Program 41-07 to assign the Work Schedules to the days of the week.

### Input Data

Incoming Ring Group Number	1~100
ACD Work Period Mode Number	1~8

Item No.	Item	Input Data	Default
01	<b>ACD Group Number</b>	0~64 (0 = No setting)	0
02	<b>Night Announcement Service</b>	0 = No 1 = Yes	0
03	<b>Priority Data</b> Determine whether an incoming call to a trunk ring group should follow a priority assignment. 0 = No Priority 1~7: 1 = Highest Priority 7 = Lowest Priority	0, 1~7 (0 = No Priority) (1 = Highest Priority) (7 = Lowest Priority)	0

**Conditions**

None

# Program 41 : ACD Setup

## 41-04 : ACD Group Supervisor

**Level:**  
SA

### Description

For each ACD Group (1~64), use **Program 41-04 : ACD Group Supervisor** to assign the group supervisor extension and operating mode. Operating modes are:

- 0 = Supervisor extension does not receive ACD Group calls.
- 1 = Supervisor extension receives ACD Group overflow calls only.
- 2 = Supervisor extension receives ACD Group calls just like all other agents.

An ACD Group can have only one supervisor. In addition, an extension can be a supervisor for only one ACD Group.

### Input Data

ACD Group No.	01~64
---------------	-------

Item No.	Item	Input Data	Default
01	<b>Group Supervisor Extension</b>	Extension Number (Up to eight digits)	No Setting
02	<b>Operation Type</b>	0 = Do not receive any ACD incoming calls (No) 1 = Receive ACD incoming calls in case of overflow (Busy) 2 = Receive ACD incoming calls all the time (Yes)	0

### Conditions

- If you assign an extension as a ACD Group Supervisor in this program, you cannot program the same extension as a System Supervisor in Program 41-01-01.

### Feature Cross Reference

- Automatic Call Distribution (ACD)

# Program 41 : ACD Setup

## 41-05 : ACD Agent Work Schedules

Level:

SA

### Description

Use **Program 41-05 : ACD Agent Work Schedules** to set up the Work Schedules for ACD Agents and Groups. For each ACD Work Schedule (1~4), designate the start and stop times for each of the eight Work Periods. After you set up the schedules in this program, assign them to days of the week in Program 41-07. (This is the same program used by the Trunk Work Schedules.)

ACD extensions can log in only during their work period. ACD extensions receive the following calls when they are logged in.

- ACD Call on a Trunk  
When the incoming ring group is assigned in the operating time (Program 41-03 and 41-06).
- ACD Pilot Number Call  
Any time – if ACD extensions are available.

### Input Data

ACD Work Schedule Time Pattern	1~4
--------------------------------	-----

Item No.	Work Period Mode Number	Start Time	End Time	Default
01	1~8	0000~2359	0000~2359	(Start) 0000 (End) 0000

### Conditions

None

### Feature Cross Reference

## *41-08 : ACD Overflow Options*

**Level:**  
SA

### Description

For each ACD Group (1~64), use **Program 41-08 : ACD Overflow Options** to assign the overflow mode (0~9), destination and announcement message types. Delay Announcement functions are not available for ACD pilot number calls. Each ACD Group can have unique overflow options. The table below outlines the entry options.

#### **Input Data**

ACD Group No.	01~64
---------------	-------

Item No.	Item	Input Data	Default
01	<b>Overflow Operation Mode</b>	0 = No Overflow (None) 1 = Overflow with No Announcement 2 = No Overflow with First Announcement Only 3 = No Overflow with First & Second Announcements 4 = Overflow with First Announcement Only 5 = Overflow with First & Second Announcement 6 = --- Not Used --- 7 = --- Not Used --- 8 = No Overflow with Second Announcement Only 9 = Overflow with Second Announcement Only	0
02	<b>ACD Overflow Destination</b>	0 = No Setting 1~64 = ACD Group 65 = Overflow Table (Program 41-09) 66 = Voice Mail Integration 67 = System Speed (Program 41-08-05) 68 = Incoming Ring Group (Program 41-08-06)	0
03	<b>Delay Announcement Source Type</b>	0 = ACI 1 = VRS 2 = VM8000 InMail	0
04	<b>ACD Overflow Transfer Time</b>	0~64800 (sec)	30
05	<b>System Speed Dial Bin</b>	0~1999 (Used when 41-08-02 is set to 67)	1999

Item No.	Item	Input Data	Default
06	<b>Incoming Ring Group when Overflow</b>	1~100 (Used when 41-08-02 is set to 68)	1

**Conditions**

None

---

**Feature Cross Reference**

- Automatic Call Distribution (ACD)

## 41-10 : ACI Delay Announcement

Level:

SA

### Description

Use Program 41-10 : ACI Delay Announcement to define the ACI port number to be used for the delay announcement.

This program is activated when the delay announcement source and options are assigned as ACI in Program 41-08-03.

### Input Data

ACD Group No	01~64
--------------	-------

Item No.	Item	Input Data	Default
01	<b>1st Delay Announcement ACI Port Number</b>	0~96 0 = No Setting	0
02	<b>2nd Delay Announcement ACI Port Number</b>	0~96 0 = No Setting	0
03	<b>1st Delay Announcement Connection Timer</b> Set the time before the 1st Delay Announcement is played.	0~64800 (sec)	4
04	<b>2nd Delay Announcement Connection Timer</b> Set the time the 1st Delay Announcement plays before the 2nd Delay Announcement starts to play.	0~64800 (sec)	60
05	<b>2nd Delay Announcement Sending Duration</b> Set the timer for how long the 2nd Delay Announcement plays. After this timer expires, the call disconnects. To keep the call in queue, set this timer to 0.	0~64800 (sec)	0

### Conditions

# Program 41 : ACD Setup

## **41-11 : VRS Delay Announcement**

**Level:**  
SA

### Description

Use **Program 41-11 : VRS Delay Announcement** to assign the VRS message number to be used as the message source for the 1st and 2nd Delay Announcement Messages. Refer to Program 41-08 for more on setting up the ACD overflow options.

This program is activated when the delay announcement source and options are assigned as VRS in Program 41-08-03.

### Input Data

ACD Group No.	01~64
---------------	-------

Item No.	Item	Input Data	Default
01	<b>Delay Message Start Timer</b> Input the time before the 1st Delay Message Starts.	0~64800 (sec)	0
02	<b>1st Delay Message Number</b> Input the VRS Message to be played as the 1st Delay Message.	0~49 0 = No Message 49 = Fixed Message	0
03	<b>1st Delay Message Sending Count</b> Input the number of times the 1st Delay Message is sent. If set to 0, the message is not played.	0~255	0
04	<b>2nd Delay Message Number</b> Input the VRS Message to be played as the 2nd Delay Message.	0~49 0 = No Message 49 = Fixed Message	0
05	<b>2nd Waiting Message Sending Count</b> Input the number of times the 2nd Delay Message is sent. If set to 0, the message is not played.	0~255	0
06	<b>Tone Kind at Message Interval</b> Input what is heard between the Delay messages.	0 = Ring Back Tone 1 = MOH Tone 2 = BGM Source	0

07	<b>ACD Forced Disconnect Time after the 2nd Delay Message</b> Set the time, after the last 2nd Delay Message is played, before the call is disconnected.	0~64800 (sec)	60
08	<b>Queue Depth Announcement</b> Input when the Queue Depth Announcement will be played.	0 = Disable 1 = After 1st (1st) 2 = After 2nd (2nd) 3 = After 1st and 2nd (1st and 2nd)	0

**Conditions**

None

---

**Feature Cross Reference**

## 41-12 : Night Announcement Setup

Level:  
SA

### Description

Use **Program 41-12 : Night Announcement Setup** to define the night announce voice resource and sending time for each ACD group. Night announcement availability depends on the setting in Program 41-03-02. The night announcement function is not available for ACD pilot number calls.

### Input Data

ACD Group Number	01~64
------------------	-------

Item No.	Item	Input Data	Default
01	<b>Night Announcement Source Type</b>	0 = ACI 1 = VRS	0
02	<b>Night Announcement ACI Port Number</b> Only used when PRG 41-12-01 is set to 0.	0~96 0 = No Setting	0
03	<b>ACD Night Announce Sending Time</b> Only used when PRG 41-12-01 is set to 0.	0~64800 (sec)	30

### Conditions

- The Night Announcement function is not available for ACD pilot number call.

### Feature Cross Reference

- Automatic Call Distribution (ACD)

# Program 41 : ACD Setup

## 41-13 : VRS Message Number for Night Announcement

Level:

SA

### Description

Use **Program 41-13 : VRS Message Number for Night Announcement** to define the VRS message number to be used as the night announcement. This program is activated when the night announcement source is assigned as VRS in Program 41-12-01.

### Input Data

ACD Group No.	01~64
---------------	-------

Item No.	Item	Input Data	Default
01	<b>VRS Message Number</b> Input the VRS Message to be used for the Night Announcement.	0~100 0 = No Message	0
02	<b>Tone Kind at Message Interval</b> Input what is heard between the Night Announcements.	0 = Ring Back Tone 1 = MOH Tone 2 = BGM Source	0

## *41-14 : ACD Options Setup*

**Level:**  
SA

### Description

Use **Program 41-14 : ACD Options Setup** to set various options for ACD Groups. When you set an option for an ACD Group, the setting is in force (if applicable) for all agents in the group. The chart below shows each of the ACD options, the entries available, and the default entry.

#### **Input Data**

ACD Group No	01~64
--------------	-------

Item No.	Item	Input Data	Default
01	<b>Emergency Call Operation Mode</b>  The supervisor must be logged in and have an Emergency Key programmed for this feature. By pressing the key once, the supervisor monitors the call – pressing twice barges in on the call.	0 = Call to system supervisory extension when group supervisory extension is busy. 1 = No calls to system supervisory extension when group supervisory extension is busy.	0
02	<b>Automatic Wrap Up Mode</b>  Enable/disable Automatic Wrap Up mode.	0 = After wrap up the mode key is pressed. (Manual) 1 = After call is finished automatically. (Auto)	0
03	<b>ACD Priority for Overflow Calls</b>  Determine whether the ACD group should use its own priority assignment or if it should follow the priority assigned in Program 41-03-03.	0 = Own group priority 1 = Priority order by Program 41-03-03	0
04	<b>Automatic Answer at Headset</b>  Enable/disable Automatic Answer for agents using headsets.	0 = Off 1 = On	0
06	<b>Call Queuing after 2nd Announcement</b>  Use this option to determine whether the caller should hear the 2nd Delay Announcement and then taken out of queue (1), or place back into queue (0).	0 = Enable (Yes) 1 = Disable (No)	0

Item No.	Item	Input Data	Default
07	<b>Automatic Off Duty for SLT</b> Enable/disable Automatic Off Duty (rest) mode for agents with SLT.	0 = No change to Off Duty mode 1 = Change to Off Duty mode automatically (Skip)	0
08	<b>ACD Off Duty Mode</b> Enable (1) or Disable (0) the ability to receive internal calls when in Off Duty Mode.	0 = Cannot receive internal call 1 = Can receive internal call	0
09	<b>Automatic Wrap Up End Time</b> Input the time the agent will be in Wrap mode when Wrap key is pressed, or automatically put into Wrap mode.	0~64800 (sec)	0
10	<b>ACD No Answer Skip Time</b> Set how long a call to the ACD Group rings an idle extension before routing to the next agent.	0~64800 (sec)	10
12	<b>Start Headset Ear Piece Ringing (for SLT)</b>	0~64800 (sec)	0
13	<b>1st Data – ACD Queue 1-Digit Assignment</b>	1st Data – Up to one Digit (0, 1~9, #, *)	Blank
	<b>2nd Data – Destination Number Type</b>	2nd Data – 0 = None 1 = Extension or Voice Mail 2 = Incoming Ring Group 3 = Speed Dial Areas 4 = ACD Group	0
	<b>3rd Data – Destination Number</b>	3rd Data – Up to eight digits (0, 1~9, #, *)	Blank
14	<b>DTMF Detection Assignment during Delay Announcement</b> Is the DTMF Detection for Dial Out during (1) or after (0) the message is played.	0 = Does not detect during message 1 = Detect during message	1
15	<b>DTMF Detect Time after Delay Announcement Message</b> How long is the DTMF Detection after the Delay Announcement Message.	0~64800 (sec)	0

**Conditions**

None

## *41-15 : ACD Queue Alarm Information*

**Level:**  
SA

### Description

Use **Program 41-15 : ACD Queue Alarm Information** to assign the options for Audible Indication for Log Out/Off Duty mode for each ACD group.

These program settings provide an alarm to the agents, but no Queue Status Display is indicated. ***Do not use these programs*** if the alarm options are defined in Program 41-20-01 through 41-20-05.

Feature	Available in Program 41-15	Available in Program 41-20
Queue Status Display	---	Yes
Queue Status Display Time	---	Yes
Alarm	Yes	Yes
Alarm Send Time	Program 41-15-02 determines the length/interval of the alarm.	Yes
Interval Time of Queue Status Display		Yes
Class of Service	---	Yes
Timing of Alarm and Display Queue Status	Alarm triggered after the number of calls in Program 41-15-01 is exceeded.	Alarm triggered after the number of calls in Program 41-20-01 is exceeded. Then follows Program 41-20-03 time for displaying status.

### Input Data

ACD Group No.	01~64
---------------	-------

Item No.	Item	Input Data	Default
01	<b>Number of Calls in ACD Queue to Activate Alarm Information</b>	0~200 (0 = No Alarm)	0
02	<b>Interval Time of Alarm Information</b>  Input the alarm sound time.	0~64800 (sec)	0

**Conditions**

## ***41-19 : ACD Voice Mail Delay Announcement***

**Level:**  
SA

### Description

Use **Program 41-19 : ACD Voice Mail Delay Announcement** to assign VM8000 InMail Master Mailboxes (PRG 47-03) as ACD Delay “Announcement” Mailboxes.

#### **Input Data**

ACD Group Number	1 ~ 64
------------------	--------

Item No.	Item	Input Data	Default
01	<b>Delay Message Start Timer</b> Determines how long the system waits before playing the Delay Message.	0 ~ 64800 (sec.)	0
02	<b>Mailbox Number for 1st Announcement Message</b> Assigns the Voice Mail ACD Announcement Mailbox as the message source for the 1st Announcement Message.	Dial (up to eight digits)	No Setting
03	<b>1st Delay Message Sending Count</b> Determines the 1st Delay Message Sending Count. This entry must be set to 1 or higher for the message to play.	0 = No message is played. 1 ~ 255	0
04	<b>Mailbox Number for 2nd Announcement Message</b> Assigns the Voice Mail ACD Announcement Mailboxes as the message source for the 2nd Announcement Message.	Dial (up to eight digits)	No Setting
05	<b>2nd Delay Message Sending Count</b> Determines the 2nd Delay Message Sending Count. This entry must be set to 1 or higher for the message to play.	0 = No message is played. 1 ~ 255	0
06	<b>Wait Tone Type at Message Interval</b> Determines what the caller hears between the messages.	0 = Ring Back Tone 1 = Music On Hold Tone 2 = Background Music Source	0
07	<b>ACD Forced Disconnect Time after 2nd Announcement</b> Assigns how long the system should wait after the end of the ACD Delay Message before disconnecting.	0 ~ 64800 (sec.)	0

Item No.	Item	Input Data	Default
08	<b>Delay Message Interval Time</b> Sets the timer for the interval between the Delay Messages.	0 ~ 64800 (sec.)	20

**Conditions**

# Program 41 : ACD Setup

## 41-20 : ACD Queue Display Settings

Level:  
SA

### Description

Use **Program 41-20 : ACD Queue Display Settings** to assign the options for the ACD Queue Status Display feature. This program allows the Queue Status Display, and causes an alarm to sound, when the parameters in this program are met.

Program 41-15 can also provide a queue alarm to the agents. The options in Program 41-20 should not be used if 41-15 is set.

Feature	Available in Program 41-15	Available in Program 41-20
Queue Status Display	---	Yes
Queue Status Display Time	---	Yes
Alarm	Yes	Yes
Alarm Send Time	Program 41-15-02 determines the length/interval of the alarm.	Yes
Interval Time of Queue Status Display		Yes
Class of Service	---	Yes
Timing of Alarm and Display Queue Status	Alarm triggered after the number of calls in Program 41-15-01 is exceeded.	Alarm triggered after the number of calls in Program 41-20-01 is exceeded. Then follows Program 41-20-03 time for displaying status.

**Input Data**

ACD Group No.	01~64
---------------	-------

Item No.	Item	Input Data	Default
01	<b>Number of Calls in Queue</b> Set the number of calls that can accumulate in the ACD queue before the Queue Status Display (and optional queue alarm) occurs.	0 = No Display, 1~200	0
02	<b>Queue Status Display Time</b> Set how long the Queue Status display remains on the telephone display.	0~64800 (sec)	5 (sec)
03	<b>Queue Status Display Interval</b> Set the interval that refreshes the Queue Status Alarm time in queue display and causes the optional queue alarm to occur on phones active on a call, logged out, or in wrap-up.	0~64800 (sec)	60 (sec)
04	<b>ACD Call Waiting Alarm</b> Enable or disable the queue alarm.	0 = Disable (Off) 1 = Enable (On)	0
05	<b>ACD Call Waiting Alarm Hold Time</b> Set how long the Call Waiting Alarm should sound.	0~64800 (sec)	0

**Conditions**

## Program 42 : Hotel Setup

### *42-02 : Hotel/Motel Telephone Setup*

Level:

IN

---

#### Description

Use **Program 42-02 : Hotel/Motel Telephone Setup** to define the basic operation of the Hotel/Motel extensions.

#### Input Data

Extension Number	Up to eight digits
------------------	--------------------

Item No.	Item	Input Data	Default
01	<b>Hotel Mode</b> If you want an extension to operate in the Hotel/Motel mode, enter 1. If you want the telephone to operate in the business mode, enter 0.	0 = Normal 1 = Hotel	0
02	<b>Toll Restriction Class When Check In</b> Assign an extension Toll Restriction Class when it is checked in. The system has 15 Toll Restriction Classes (1~15). The entry you make in this option affects the telephone in all Night Service modes. (Refer to Programs 21-05 and 21-06 to set up the Toll Restriction dialing options.) When the extension is checked out, it uses the Toll Restriction Class set in Program 21-04.	1~15	1

## **42-03 : Class of Service Options (Hotel/Motel)**

**Level:**  
IN

### Description

Use **Program 42-03 : Class of Service Options (Hotel/Motel)** to set the Hotel/Motel Class of Service (COS) options. Assign Class of Service to extensions in **Program 42-02 : Hotel/Motel Telephone Setup**. There are 15 Classes of Service. Refer to the following chart for a description of each COS option, its range and default setting. For additional Class of Service options, refer to Programs 20-06 ~ 20-14.

### Input Data

Class of Service Number	01~15	
-------------------------	-------	--

Item No.	Item	Input Data	Default	
			Class 01	Class 02~15
01	<b>Check-In Operation</b>	0 = Off 1 = On	0	0
02	<b>Check-Out Operation</b>	0 = Off 1 = On	0	0
03	<b>Room Status Output</b>	0 = Off 1 = On	0	0
04	<b>DND Setting for Other Extension</b>	0 = Off 1 = On	0	0
05	<b>Wake up Call Setting for Other Extension</b>	0 = Off 1 = On	0	0
06	<b>Room Status Change for Other Extension</b>	0 = Off 1 = On	0	0
07	<b>Restriction Class Changing for Other Extension</b>	0 = Off 1 = On	0	0
08	<b>Room to Room Call Restriction</b>	0 = Off 1 = On	0	0
09	<b>DND Setting for Own Extension</b>	0 = Off 1 = On	0	0

Item No.	Item	Input Data	Default	
			Class 01	Class 02~15
10	<b>Wake Up Call Setting for Own Extension</b>	0 = Off 1 = On	0	0
11	<b>Change Room Status for Own Extension</b>	0 = Off 1 = On	0	0
12	<b>SLT Room Monitor</b> Enable (1) or disable (0) a single line telephone ability to use Room Monitor.	0 = Off 1 = On	0	0

## Program 42 : Hotel Setup

### **42-04 : Hotel Mode One-Digit Service Codes**

**Level:**

IN

#### Description

Use **Program 42-04 : Hotel Mode One-Digit Service Codes** to set up the Hotel Mode one-digit service codes which are assigned in 42-02-01. For each Department Calling Group (1~64), you enter the destination for each single digit code (1~9, 0, \*, #). The destination can be any code with up to four digits, such as an extension number or access code.

#### Input Data

Department (Extension) Group Number	01~64
-------------------------------------	-------

Item No.	Received Dial	Destination Number	Default
01	1~9,0,*,#	Up to eight digits	No Setting

#### Conditions

- The one-digit service codes you assign in this program wait until the interdigit time expires before executing.

#### Feature Cross Reference

- Hotel/Motel

# Program 42 : Hotel Setup

## 42-05 : Hotel Room Status Printer

**Level:**

IN

### Description

Use **Program 42-05 : Hotel Room Status Printer** to set the CTA port to output the Hotel Data (Check-Out sheet, Room Status, etc.) and the output options for the Hotel/Motel feature.

#### Input Data

Item No.	Item	Input Data	Default
01	<b>Output Port Type</b>	0 = No Setting 1 = CTA	0
02	<b>Output Destination Number</b>	Up to eight digits (Extension number which CTA/CTU is equipped)	No Setting
03	<b>Wake Up Call No Answer Data</b>	0 = Not Output 1 = Output	0
04	<b>Check-Out Sheet</b>	0 = Not Output 1 = Output	0

#### Conditions

- Room Status Reports output via a CTA or CTU adapter require a DTH terminal and a compatible external device.
- Room Status Reports can be output via LAN port , or when using DTH terminals, a CTA or CTU adapter and a compatible external device.

## 44-03 : Dial Analysis Extension Table

Level:

IN

### Description

When Program 44-02-02 is set to type 3, use **Program 44-03 : Dial Analysis Extension Table** to set the dial extension analysis table. These tables are used when the analyzed digits must be more than eight digits. If the received digits do not match the digits set in tables 1~250, table number 252 is used to refer to the next Extension Table Area (1~4) to be searched. If the received digits are not identified in tables 1~250, the F-Route selection table number defined in table 251 is used.

### Input Data

Extension Table Area Number	1~4
Dial Analysis Table Number	1~252

### Dial Analysis Table Number : 1~250

Item No.	Item	Input Data	Default
01	<b>Dial</b>	Up to 24 digits Digits = 1~9, 0, *, #, @ (Press Line Key 1 for wild character @)	No Setting
02	<b>ARS/F-Route Select Table Number</b>	0~500 (ARS/F-Route Table Number) With Program 44-01 set to 0, Program 44-05 is checked. With Program 44-01 set to 1, Program 44-04 is checked.	0

**Dial Analysis Table Number : 251**

Item No.	Item	Input Data	Default
03	<b>ARS/F-Route Select Table Number</b>	0~500 (ARS/F-Route Table Number) With Program 44-01 set to 0, Program 44-05 is checked. With Program 44-01 set to 1, Program 44-04 is checked.	0

# Program 44 : ARS/F-Route Setup

## 44-05 : ARS/F-Route Table

**Level:**  
IN

### Description

Use **Program 44-05 : ARS/F-Route Table** to set the ARS/F-Route table. There are four kinds of order. If the higher priority trunk groups are busy, the next order group is used. If a lower priority route is selected, the caller may be notified with a beep tone.

#### Input Data

ARS/F-Route Table Number	1~500
Priority Number	1~4

Item No.	Item	Input Data	Default
01	<b>Trunk Group Number</b> Select the trunk group number to be used for the outgoing ARS call.	0~100, 255 0 = No Setting 255 = Extension Call	0
02	<b>Delete Digits</b> Enter the number of digits to be deleted from the dialed number.	0~255 (255 = Delete All)	0
03	<b>Additional Dial Number Table</b> Enter the table number (defined in Program 44-06) for additional digits to be dialed.	0~1000	0
04	<b>Beep Tone</b> Select whether or not a beep is heard if a lower priority trunk group is used to dial out.	0 = Off 1 = On	0
05	<b>Gain Table Number for Internal Calls</b> Select the gain table number to be used for the internal call (defined in Program 44-07).	0~500 0 = No Setting	0
06	<b>Gain Table Number for Tandem Connections</b> Select the gain table number to be used for the tandem call (defined in Program 44-07).	0~500 0 = No Setting	0
07	<b>ARS Class of Service</b> Select the ARS Class of Service to be used for the table. An extension ARS COS is determined in Program 26-04-01.	0~16	0

Item No.	Item	Input Data	Default
08	<b>Dial Treatment</b> Select the Dial Treatment to be used for the table. If a Dial Treatment is selected, Programs 44-05-02 and 44-05-03 are ignored and the Dial Treatment defined in Program 26-03-01 is used instead.	0~15	0
09	<b>Maximum Digit</b> Input the maximum number of digits to send when using the F-Route.	0~24	0
10	<b>CCIS over IP Destination Point Code</b> Input the Destination Point Code to send when using this F-Route.	0~16367	0
11	<b>Network Specified Parameter Table</b>	0~16	0

## 44-07 : Gain Table for ARS/F-Route Access

Level:

IN

### Description

Use **Program 44-07 : Gain Table for ARS/F-Route Access** to set the gain/PAD table. If an extension dials ARS/F-Route number:

- The Extension Dial Gain Table, assigned in Program 44-05, is activated.
- The Extension Dial Gain Table follows Outgoing transmit and Outgoing receive settings.

If the incoming call is transferred to another line using ARS/F-Route:

- The Tandem Gain Table, assigned in Program 44-05, is activated.
  - The Tandem Gain Table follows the Incoming transmit and Incoming receive settings for incoming line, and Outgoing transmit and Outgoing receive settings for the outgoing line.
-  **For ARS/F-Route calls, the CODEC gains defined in Program 14-01-02 and 14-01-03 are not activated.**

### Input Data

Gain Table Number	1~500
-------------------	-------

Item No.	Item	Input Data	Default
01	Incoming Transmit	1~63 (-15.5 ~ +15.5dB)	32
02	Incoming Receive	1~63 (-15.5 ~ +15.5dB)	32
03	Outgoing Transmit	1~63 (-15.5 ~ +15.5dB)	32

### Description

Use Program 45-01 : Voice Mail Integration Options to customize certain voice mail integration options.

### Input Data

Item No.	Item	Input Data	Default
01	<b>Voice Mail Department Group Number</b> Assign which Extension (Department) Group number is to be assigned as the voice mail group.	0~64 0 = No Voice Mail	0
02	<b>Voice Mail Master Name</b> Enter the Voice Mail master name.	Up to 12 Characters	Voice Mail
04	<b>Park and Page</b> Enable/disable the system ability to process the Voice Mail Park and Page (*) commands. You should normally <b>enable</b> this option.	0 = Off 1 = On	1
05	<b>Message Wait</b> Enable/disable the system ability to process the Voice Mail Message Wait (#) commands. You should normally <b>enable</b> this option. If enabled, be sure that the programmed Message Notification strings don't contain the code for trunk access.	0 = Off 1 = On	1
06	<b>Record Alert Tone Interval Time</b> This time sets the interval between Voice Mail Conversation Record alerts	0~64800 (sec)	30
07	<b>Centralized Voice Mail Pilot Number</b> This number is the same as the extension number or pilot number.	Dial (up to eight digits)	No Setting

**Input Data (Continued)**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>
08	<b>Centralized Voice Mail Department Group Number</b>  Assigns which Extension (Department) Group Number is to be assigned as the Centralized Voice Mail group.	0~64	0
09	<b>Centralized Voice Mail Master Name</b>  Assigns the Centralized Voice Mail Master Name.	Up to 12 characters	"C.V.M."
10	<b>New NSL Protocol support</b>	0 = Off 1 = On	0
11	<b>Prefix for Call Screeening</b>	Dial (One digit)	1
12	<b>Prefix for Park and Page</b>	Dial (One digit)	*
13	<b>Prefix for Message Wait</b>	Dial (One digit)	#
14	<b>CCIS Centralized Voice Mail Number</b>  Assign the pilot number to Centralized Voice Mail over CCIS Link. This is assigned only in the remote switches.	Dial (up to eight digits)	No Setting
15	<b>Analog Voice Mail Protocol Selection</b>  Assigns whether fixed codes are used or the codes used in PRG 45-04 are used for analog voice mail protocol.	0: Fixed 1: Program	0
16	<b>Voice Mail Fax Digit Add Assignment</b>  Assign up to four digits in front of the station number sent to the SLT port when a call is forwarded.	Up to four digits	None
17	<b>Reply Mailbox Number</b>  Whether or not to include the mailbox number in the analog voice mail protocol.	0: No 1: Yes	1
18	<b>Trunk Number Mapping</b>  Assign the digits of trunk number mapping.	2~3	2

# Program 47 : InMail

## 47-01 : VM8000 InMail System Options

Level:

IN

### Description

Use Program 47-01 : VM8000 InMail System Options to set up the VM8000 InMail system-wide options.

### Input Data

Item No.	Item	Input Data	Default
02	<b>VM8000 InMail Master Name</b> (MasterName) The CD-CP00-US must be reset for a change to this program to take effect. Use this option to modify the name for all UNIVERGE SV8100 In-Mail ports. The system briefly displays this name when a display multiline terminal user calls a Voice Mail port (either by pressing <b>Message</b> , their voice mail key, or by dialing the master number). You should always end the name with the <b>##</b> characters. The system substitutes the port number for the last #. Using the default name <b>InMail ##</b> , for example, the telephone display shows <b>VM8000 InMail #1</b> when calling port 1.	Up to 12 characters	InMail ## (The system substitutes the port number for the # when calling the port).

Program

47

**Input Data**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>
03	<p><b>Subscriber Message Length</b> (Subs Msg Length)</p> <p>Use this option to set the maximum length of recorded messages for:</p> <ul style="list-style-type: none"> <li>○ Subscriber Mailbox users dialing <b>RS</b> to record and send a message.</li> <li>○ Extension users leaving a message in a Subscriber Mailbox.</li> <li>○ Outside Automated Attendant callers accessing a mailbox via a GOTO command and then dialing <b>RS</b> to record and send a message.</li> <li>○ Subscriber Mailbox Greetings.</li> <li>○ Announcement Messages.</li> <li>○ Call Routing Mailbox Instruction Menus.</li> </ul> <p> <i>The length of a Conversation Record is 10 times the Subscriber Message Length. Since the Conversation Record time cannot exceed 4095 seconds, any setting in Subscriber Message Length larger than 409 has no effect on the length of recorded conversations.</i></p>	1~4095 (sec)	120
04	<p><b>Non-Subscriber Message Length</b> (Mbox Msg Length)</p> <p>Use this option to set the maximum length of recorded messages for:</p> <ul style="list-style-type: none"> <li>○ Automated Attendant callers leaving a message or Quick Message in a Subscriber Mailbox.</li> <li>○ Outside callers transferred by an extension user to a Subscriber Mailbox.</li> </ul>	1~4095 (sec)	120

**Input Data**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>
05	<b>Message Backup/Go Ahead Time</b> (Msg Bkup/Adv Time) Use this option to set the backup/go ahead interval. This time sets how far VM8000 InMail backs up when a user dials <b>B</b> while listening to a message. This interval also sets how far VM8000 InMail jumps ahead when a user dials <b>G</b> while listening to a message.	1~60 (sec)	5
07	<b>Digital Pager Callback Number</b> (Pager CBack) Use this option to set the <i>Digital Pager Callback Number</i> portion of the Message Notification callout number for a digital pager. This is the portion of the callout number that is appended to the pager service telephone number. Normally, this option should be <b>X*M#</b> , where: <ul style="list-style-type: none"> <li>○ <b>X</b> is the number of the extension that generated the notification.</li> <li>○ <b>*</b> is a visual delimiter (to make the pager display easier to read).</li> <li>○ <b>M</b> is the number of new messages in the extension mailbox.</li> <li>○ <b>#</b> is the digit normally used by the pager service for positive disconnect.</li> </ul>	<b>Digits</b> (12 maximum, using 0~9, # and *) <b>M</b> (Number of messages – entered by pressing <b>LK1</b> ) <b>No entry</b> (Entered by pressing <b>HOLD</b> ). <b>X</b> (Extension number – entered by pressing <b>LK2</b> ) VM8000 InMail automatically replaces the X command with the number of the extension that initially received the message.	X*M#

**Input Data**

Item No.	Item	Input Data	Default
08	<p><b>Delay in Dialing Digital Pager Callback Number</b>  (Pager Dial Delay)</p> <p>Use this option to set the delay (0~99 seconds) that occurs just before VM8000 InMail dials the Digital Pager Callback Number portion of the Message Notification callout number for a digital pager. Set this delay so the pager service has enough time to connect to the digital pager before sending the callback number. Your pager service may be able to help you determine the best value for this option (0~99 seconds). By default, this option is 9 seconds. When placing a digital pager notification, the system:</p> <p>Seizes the trunk specified.</p> <p>Dials the user-entered notification number (in <b>Message + OP + N</b>).</p> <p>Waits the <b>47-01-08: Delay in Dialing Digital Pager Callback Number</b> interval.</p> <p>Dials the number entered in <b>47-01-07: Digital Pager Callback Number</b>.</p> <p>The system assumes that the notification number completes dialing approximately 4 seconds after trunk seizure. This means that, by default, the Digital Pager Callback Number is dialed into the pager service about 13 seconds after trunk seizure.</p>	0~99 (sec)	9

**Input Data**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>
09	<p><b>Wait Between Digital Pager Callout Attempts</b>            (Notify Pager Intvl)            Use this option to set the minimum time (1~255 minutes) between unacknowledged or unanswered digital pager Message Notification callouts. (A subscriber acknowledges a digital pager notification by logging onto their mailbox.) After this interval expires, VM8000 InMail tries the callout again (for up to the number of times set in <b>47-01-14: Number of Callout Attempts</b>).            If the system dials the callout number and the pager service is busy, it retries the number in one minute.</p>	1~255 (min)	15
10	<p><b>Wait Between Non-Pager Callout Attempts</b>            (Notify N-Pgr Intvl)            Use this option to set the minimum time (1~255 minutes) between non-pager Message Notification callouts in which the destination answers, says Hello, dials 1 to acknowledge and then enters the wrong security code.</p>	1~255 (min)	20
11	<p><b>Wait Between Busy Non-Pager Callout Attempts</b>            (Notify Busy Intvl)            Use this option to set how long VM8000 InMail waits (1~255 minutes), after it dials a busy non-pager callout destination, before retrying the callout number.</p>	1~255 (min)	15

**Input Data**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>
12	<p><b>Wait Between RNA Non-Pager Callout Attempts</b>            (Notify RNA Intvl)            Use this option to set how long VM8000 InMail waits (1~255 minutes), after it dials an unanswered non-pager callout destination, before retrying the callout number.            There are 3 types of unanswered non-pager callouts:</p> <ul style="list-style-type: none"> <li><input type="radio"/> If the callout rings the destination longer than the 47-01-13: Wait for Answer Non-Pager Callout Attempts option.</li> <li><input type="radio"/> If the destination answers, says Hello (or the system detects answer supervision) and then hangs up without dialing 1 to log onto their mailbox. This typically happens if someone unfamiliar with notification answers the callout, or if the callout is picked up by an answering machine.</li> <li><input type="radio"/> If the destination answers and then hangs up without saying Hello. This typically happens if someone unfamiliar with the notification answers the callout (like the above example), or if the call is picked up by an answering machine with insufficient outgoing message volume.</li> </ul>	1~255 (min)	30
13	<p><b>Wait for Answer Non-Pager Callout Attempts</b>            (Notify RNA Rings)            If a non-pager callout rings the destination longer than this interval (1-99 rings), VM8000 InMail marks the call as unanswered (Ring No Answer) and hangs up.</p>	1~99 (rings)	5

**Input Data**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>
14	<b>Number of Callout Attempts</b> (Notify Call Attemp) Use this option to set how many times (1~99 attempts) VM8000 InMail retries an incomplete Message Notification callout. This total includes unacknowledged callouts, callouts to a busy destination, and callouts to an unanswered destination. This option applies to pager and non-pager callouts.	1~99 (attempts)	5
15	<b>Send Pager Callout Until Acknowledged</b> (Retry Until Ack) When this option is enabled (1), VM8000 InMail continues to retry a digital pager Message Notification callout until the notification is acknowledged. If this option is disabled (0), VM8000 InMail retries a digital pager Message Notification the number of times specified in <b>47-01-14 Number of Callout Attempts</b> . This option does not apply to Message Notification callouts to telephone numbers. A digital pager notification is considered acknowledged when the recipient logs onto the mailbox.	0 = No (Disabled) 1 = Yes (Enabled)	0
16	<b>Name Format</b> Specify if names are displayed in First Last format or Last First.	0 = 1st Last 1 = Last 1st	0
17	<b>InMail Port</b> Specify the port number of the first InMail Port.	0~497 The first port of InMail must start with one of the following ports: 1, 5, 9, 12, 16, .....237, 241, 245, 249 and uses the first port assigned + next three consecutive ports.	0
18	<b>Play PAD Control</b>	1~63 (-15dBm~ +15dBm)	32

**Input Data**

Item No.	Item	Input Data	Default
19	Record PAD Control (for Networking)	1~63 (-15dBm~ +15dBm)	32

**Conditions**

- When changing 47-01-01 or 47-01-02, a system reset is required for the new setting to take effect.
- 

**Feature Cross Reference**

None

# Program 47 : InMail

## 47-02 : VM8000 InMail Station Mailbox Options

**Level:**  
IN

### Description

Use **47-02 : VM8000 InMail Station Mailbox Options** to set up a station/extension mailbox. Station mailboxes are automatically assigned as Subscriber Mailboxes. Normally, VM8000 InMail Station Mailbox numbers 1~26 should correspond to extensions 101~126.

 **Station Mailboxes are one of three mailbox categories: Station, Routing, or Master. You can also set up Master Mailboxes as Subscriber Mailboxes.**

### Input Data

Station Mailbox Number	1~512
------------------------	-------

### Input Data

Item No.	Item	Input Data	Default
01	<b>Mailbox Type</b> Use this option to enable or disable the mailbox. An extension mailbox is not accessible when it is disabled (even though its stored messages and configuration are retained in memory.) If disabled, a user pressing <b>Message</b> initiates a remote logon and is asked to enter their mailbox number. A voice prompt then announces: <i>"That mailbox does not exist."</i> To make programming easier, consider associating a mailbox number with a station port. For example, mailbox 1 could correspond to port 1, which in turn corresponds to extension 101.	0 = None 1 = Personal 2 = Group	1
02	<b>Mailbox Number</b> Use this option to select the extension number associated with the mailbox you are programming. Normally, mailbox 1 should use Mailbox Number 101, mailbox 2 should use Mailbox Number 102, etc. To make programming easier, consider associating a mailbox number with a station port. For example, mailbox 1 could correspond to port 1, which in turn corresponds to extension 101.	Digits (8 maximum, using 0~9)	Mailbox 1 = 101 Mailboxes 2~64 = 102~164 Mailboxes 65~512 = No entry

**Input Data**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>
03	<b>Number of Messages</b>  Use this option to set the maximum number of messages that can be left in the Subscriber Mailbox. If a caller tries to leave a message after this limit is reached, they hear: "That mailbox is full." VM8000 InMail then hangs up.	0~99 messages  To conserve storage space, enter 0 for all unused mailboxes.	99 for mailbox 1 20 for all other mailboxes
04	<b>Message Playback Order</b>  Use this option to set the Subscriber Mailbox message playback order. When a subscriber listens to their messages, VM8000 InMail can play the oldest messages first (first-in/first-out, or FIFO), or the newest messages first (last-in/first-out, or LIFO).	0 (FIFO = first-in/first-out, or oldest messages first).  1 (LIFO = last-in/first-out, or newest messages first)	0
05	<b>Auto Erase/Save of Messages</b>  Use this option to determine what happens when a Subscriber Mailbox user completely listens to a new message and then exits the mailbox without either saving ( <b>SA</b> ) or erasing ( <b>E</b> ) the message. Depending on the setting of this option, VM8000 InMail either automatically saves or erases the message. If the mailbox user hangs up before listening to the <i>entire</i> new message, VM8000 InMail retains the message as a new message.	0 (Erase)  After the subscriber listens to the entire new message and hangs up, VM8000 InMail erases the message.  1 (Save)  After the subscriber listens to the entire new message and hangs up, VM8000 InMail saves the message.	1
06	<b>Message Retention</b>  Use this option to determine how long a Subscriber Mailbox retains held and saved messages. If a message is left in a Subscriber Mailbox longer than this interval, VM8000 InMail deletes it.	1~99 Days  0 (Indefinite)	0

**Input Data**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>
07	<p><b>Recording Conversation Beep</b> (Rec Conv Beep)</p> <p>Use this option to enable or disable the Conversation Record beep. If enabled, all parties on a call hear the voice prompt “<i>Recording</i>”, followed by a single beep when the extension user initiates Conversation Record. If disabled, the voice prompt and beep do not occur. When you disable the Conversation Record beep, the following voice prompts do not occur while VM8000 InMail records the conversation:</p> <p><i>Recording</i> (followed by a beep)</p> <p><i>That mailbox is full</i> (if the mailbox message storage capacity is reached)</p> <p><i>You have reached the recording limit</i> (if the recorded message is too long)</p> <p>The UNIVERGE SV8100 telephone system software provides an additional Conversation Record beep. This beep repeats according to the setting of <b>Program 45-01-06: Voice Mail Integration Options: Record Alert Tone Interval Time</b> (0~64800 seconds). To disable the UNIVERGE SV8100 telephone system Conversation Record beep, enter 0 for this option.</p>	0 = No (Disabled) 1 = Yes (Enabled)	1
08	<p><b>Message Waiting Lamp</b> (Update MW Lamp)</p> <p>Use this option to enable or disable Message Waiting lamping at the extension associated with the Subscriber mailbox. For Subscriber Mailboxes, you should leave this option enabled. For Guest Mailboxes, you should leave this option disabled.</p>	0 = No (Disabled) 1 = Yes (Enabled)	1
09	<p><b>Auto Attendant Do Not Disturb</b> (Auto-ATT DND)</p> <p>Use this option to enable or disable Auto Attendant Do Not Disturb. When a subscriber enables Auto Attendant Do Not Disturb, an Automated Attendant caller routes directly to the mailbox, hears the greeting, and is asked to leave a message. A subscriber can also enable Auto Attendant Do Not Disturb while recording their mailbox greeting.</p>	0 = No (Disabled) 1 = Yes (Enabled)	0

**Input Data**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>
10	<b>Forced Unscreened Transfer</b> (Forced UTRF) Use this option to enable or disable Automated Attendant Forced Unscreened Transfer for the Subscriber Mailbox. If enabled, each Screened Transfer (TRF) to the extension is converted to an Unscreened Transfer (UTRF). If disabled, Screened Transfers from the Automated Attendant occur normally.	0 = No (Disabled) 1 = Yes (Enabled)	0
11	<b>Auto Time Stamp</b> Use this option to enable or disable Auto Time Stamp for the Subscriber Mailbox. If enabled, after the subscriber listens to a message VM8000 InMail announces the time and date the message was left. Auto Time Stamp also announces the message sender (if known). A subscriber can also enable Auto Time Stamp from their mailbox.	0 = No (Disabled) 1 = Yes (Enabled)	0
12	<b>System Administrator</b> Use this option to designate the Subscriber Mailbox as a System Administrator. This allows the subscriber to use the <b>SA</b> options after logging onto their mailbox.	0 = No (Disabled) 1 = Yes (Enabled)	Mailbox 1 (101)=1 Other mailboxes=0
13	<b>Dialing Option</b> Dialing Option provides additional dialing options for Next Call Routing Mailbox calls (see <i>Next Call Routing Mailbox</i> below). If enabled, a caller who accesses the Subscriber Mailbox to leave a message can dial any of the options in the Next Call Routing Mailbox Dial Action Table. If disabled, the caller can dial only 0 (to use the Next Call Routing Mailbox 0 action).	0 = No (Disabled) 1 = Yes (Enabled)	0
14	<b>Next Call Routing Mailbox</b> (Next CR Mbox) Use this option to assign a Next Call Routing Mailbox to the Subscriber Mailbox. This provides callers with additional dialing options while listening to a Subscriber Mailbox recorded or default greeting. The digits the caller can dial depends on the setting of the Next Call Routing Mailbox and Alternate Next Call Routing Mailbox options.	Call Routing Mailbox Number (1~3 digits, 01~032) No entry (Entered by pressing CLEAR)	1 (Call Routing Mailbox 01) By default, Call Routing Mailbox numbers are 01~08.
15	<b>Directory List</b>	0 = None 1~8 = List Number * = All	0
16	<b>Voice Prompt Language</b>	Refer to <a href="#">Table 2-9 47-02-16 Default Table</a>	1

**Input Data**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>
17	<b>Enable Paging</b>	0 = No (Disabled) 1 = Yes (Enabled)	0
18	<b>Paging Option</b>	0 = RNA 1 = Immediately	0
19	<b>Telephone User Interface Type</b>	0 = Numeric 1 = Mnemonic	0
20	<b>Enable E-mail Notification</b>	0 = No 1 = Yes	0
21	<b>E-mail Address</b>	Up to 48 characters	No Setting
22	<b>Include Message as Attachment</b>	0 = No 1 = Yes	1

## Program 47 : InMail

### **47-03 : VM8000 InMail Group Mailbox Options**

**Level:**  
IN

#### Description

Use **47-03 : VM8000 InMail Group Mailbox Options** to set up the 32 Group Mailboxes (01~32). A Group Mailbox is used for Department Group overflow and can be a Subscriber or Call Routing.

#### Input Data

Group Mailbox Number	1~32
----------------------	------

#### Input Data

Item No.	Item	Input Data	Default
01	<b>Master Mailbox Active</b> (Mailbox Active) Use this option to enable or disable the Master Mailbox. A Master Mailbox is not accessible when it is disabled.	0 = No (Disabled) 1 = Yes (Enabled)	0
02	<b>Master Mailbox Number</b> (Mailbox Number) The Master Mailbox Number is the same as the Department Group master (pilot) number. Use this option to select the Department Group master (pilot) number associated with the Master Mailbox you are programming.	Digits (eight maximum, using 0~9) No Setting (entered by pressing <b>Hold</b> )	No Setting
03	<b>Master Mailbox Type</b> (Mailbox Type) Use this option to set the Master Mailbox type. There are two types of VM8000 InMail mailboxes: Subscriber (1) and Routing (2).	0 = None 1 = Subscriber 2 = Routing	1

**Conditions**

## Program 47 : InMail

### 47-06 : Group Mailbox Subscriber Options

**Level:**  
IN

#### Description

Use **47-06 : Group Mailbox Subscriber Options** to set up a Master Mailbox assigned as a Subscriber Mailbox in **47-03-03: Master Mailbox Type**.

#### Input Data

Item No.	Item	Input Data	Default
01	<b>Number of Messages</b>  Use this option to set the maximum number of messages that can be left in the Subscriber Mailbox. If a caller tries to leave a message after this limit is reached, they hear, " <i>That mailbox is full.</i> " VM8000 InMail then hangs up.	0~99 messages  To conserve storage space, enter 0 for all unused mailboxes.	20
02	<b>Message Playback Order</b>  Use this option to set the Subscriber Mailbox message playback order. When a subscriber listens to their messages, VM8000 InMail can play the oldest messages first (first-in/first-out, or FIFO), or the newest messages first (last-in/first-out, or LIFO).	0 (FIFO = first-in/first-out, or oldest messages first).  1 (LIFO = last-in/first-out, or newest messages first).	0
03	<b>Auto Erase/Save of Messages</b>  Use this option to determine what happens when a Subscriber Mailbox user completely listens to a new message and then exits the mailbox without either saving ( <b>SA</b> ) or erasing ( <b>E</b> ) the message. Depending on the setting of this option, VM8000 InMail either automatically saves or erases the message. If the mailbox user hangs up before listening to the <i>entire</i> new message, VM8000 InMail retains the message as a new message.	0 (Erase)  After the subscriber listens to the entire new message and hangs up, VM8000 InMail erases the message.  1 (Save)  After the subscriber listens to the entire new message and hangs up, VM8000 InMail saves the message.	1
04	<b>Message Retention</b>  Use this option to determine how long a Subscriber Mailbox retains held and saved messages. If a message is left in a Subscriber Mailbox longer than this interval, VM8000 InMail deletes it.	1~90 days 0 (Indefinite)	0

**Input Data**

Item No.	Item	Input Data	Default
05	<p><b>Recording Conversation Beep</b> (Rec Conv Beep)</p> <p>Use this option to enable or disable the Conversation Record beep. If enabled, all parties on a call hear the voice prompt “Recording”, followed by a single beep when the extension user initiates Conversation Record. If disabled, the voice prompt and beep do not occur. When you disable the Conversation Record beep, the following voice prompts do not occur while VM8000 InMail records the conversation:</p> <p><i>Recording (followed by a beep)</i></p> <p><i>That mailbox is full (if the mailbox message storage capacity is reached)</i></p> <p><i>You have reached the recording limit (if the recorded message is too long)</i></p> <p>The UNIVERGE SV8100 telephone system software provides an additional Conversation Record beep. This beep repeats according to the setting of Program 45-01-06: Voice Mail Integration Options: Record Alert Tone Interval Time (0~64800 seconds). To disable the UNIVERGE SV8100 telephone system Conversation Record beep, enter 0 for this option.</p>	0 = No (Disabled) 1 = Yes (Enabled)	1
06	<p><b>Message Waiting Lamp</b> (Update MW Lamp)</p> <p>Use this option to enable or disable Message Waiting light at the extension associated with the Subscriber mailbox. For Subscriber Mailboxes, you should leave this option enabled. For Guest Mailboxes, you should leave this option disabled.</p>	0 = No (Disabled) 1 = Yes (Enabled)	1
07	<p><b>Auto Attendant Direct to VoiceMail</b></p> <p>Use this option to enable or disable Auto Attendant Direct to VM. When a subscriber enables Auto Attendant Direct to VM, an Automated Attendant caller routes directly to the mailbox, hears the greeting, and is asked to leave a message. A subscriber can also enable Auto Attendant Direct to VM while recording their mailbox greeting.</p>	0 = No (Disabled) 1 = Yes (Enabled)	0

**Input Data**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>
08	<b>Forced Unscreened Transfer</b> (Forced UTRF)  Use this option to enable or disable Automated Attendant Forced Unscreened Transfer for the Subscriber Mailbox. If enabled, each Screened Transfer (TRF) to the extension is converted to an Unscreened Transfer (UTRF). If disabled, Screened Transfers from the Automated Attendant occur normally.	0 = No (Disabled) 1 = Yes (Enabled)	0
09	<b>Auto Time Stamp</b>  Use this option to enable or disable Auto Time Stamp for the Subscriber Mailbox. If enabled, after the subscriber listens to a message VM8000 InMail announces the time and date the message was left. Auto Time Stamp also announces the message sender (if known).  A subscriber can also enable Auto Time Stamp from their mailbox.	0 = No (Disabled) 1 = Yes (Enabled)	0
10	<b>System Administrator</b> (System Admin)  Use this option to designate the Subscriber Mailbox as a System Administrator. This allows the subscriber to use the options after logging onto their mailbox.	0 = No (Disabled) 1 = Yes (Enabled)	0
11	<b>Dialing Option</b>  Dialing Option provides additional dialing options for Next Call Routing Mailbox calls (see <i>Next Call Routing Mailbox</i> below). If enabled, a caller who accesses the Subscriber Mailbox to leave a message can dial any option in the Next Call Routing Mailbox Dial Action Table. If disabled, the caller can dial only 0 (to use the Next Call Routing Mailbox 0 action).	0 = No (Disabled) 1 = Yes (Enabled)	0
12	<b>Next Call Routing Mailbox</b> (Next CR Mbox)  Use this option to assign a Next Call Routing Mailbox to the Subscriber Mailbox. This provides callers with additional dialing options while listening to a Subscriber Mailbox recorded or default greeting. The digits the caller can dial depends on the setting of the Next Call Routing Mailbox and Alternate Next Call Routing Mailbox options.	Call Routing Mailbox Number (0~32)  No entry (entered by pressing <b>CLEAR</b> )	1 (Call Routing Mailbox 01)  By default, Call Routing Mailbox numbers are 01=16.
13	<b>Directory List Number</b>  Specify the Directory List number to which the Group Mailbox belongs.	0 = None 1~8 = List Number * = All	0

**Input Data**

Item No.	Item	Input Data	Default
14	<b>Voice Prompt Language</b>	Refer to <a href="#">Table 2-10 47-06-14 Default Table</a>	1

## Program 47 : InMail

### **47-07 : VM8000 InMail Routing Mailbox Options**

**Level:**

**IN**

#### Description

Use **47-07 : VM8000 InMail Routing Mailbox Options** to set up the 32 Routing Mailboxes. Routing Mailboxes can be either Announcement or Call Routing Mailboxes.

#### Input Data

Routing Mailbox Number	1~32
------------------------	------

#### Input Data

Item No.	Item	Input Data	Default
01	<b>Routing Mailbox Active</b> (Mailbox Active) Use this option to enable or disable the mailbox. A Routing Mailbox is not accessible when it is disabled.	0 = No (Disabled) 1 = Yes (Enabled)	1
02	<b>Routing Mailbox Type</b> (Mailbox Type) Use this option to set the Routing Mailbox type.	0 = None 1 = Call Routing 2 = Announcement 3 = Directory 4 = Distribution	Mailboxes 01~08 = 1 (Call Routing) Mailboxes 09~32 = 2 (Announcement)
03	<b>Prompt Language</b>	Refer to <a href="#">Table 2-11 47-07-03 Default Table</a>	1
04	<b>Telephone User Interface</b>	0 = Numeric interface 1 = Mnemonic interface 2 = Octel (future)	0

???Ask  
Martin???

**Table 2-11 47-07-03 Default Table**

Item	Name	Input Data
47-07-03	Voice Prompt Language	01 = US English
		02 = UK English
		03 = Australian English
		04 = French Canadian
		05 = Dutch
		06 = Mexican Spanish
		07 = Latin American Spanish
		08 = Italian
		09 = German
		10 = Madrid Spanish
		11 = Norwegian
		12 = Parisian French
		13 = Brazilian Portuguese

## Program 47 : InMail

### 47-08 : Call Routing Mailbox Options

**Level:**

IN

#### Description

Use **47-08 : Call Routing Mailbox Options** to set the options for mailboxes assigned as Call Routing Mailboxes in **47-07-02: Routing Mailbox Type**.

#### Input Data

Routing Mailbox Number	1~32
------------------------	------

#### Input Data

Item No.	Item	Input Data	Default
01	<b>Dial Action Table</b> Use this option to assign the Dial Action Table to the Call Routing Mailbox. The Dial Action Table defines the dialing options for the call Routing Mailbox.	1~16 (Dial Action Table 1~16)	1 (Dial Action Table 1)
02	<b>Screened Transfer Timeout</b> (Scrn Trf Timeout) Use this option to set how long a Screened Transfer (TRF) from the Automated Attendant rings an unanswered extension before recalling. This option has a similar function as Customize: Mailbox Options: Call Routing: [Call Handling] Options: Delay Rings Before Redirect Transfer in VM8000 InMail.	0~255 (sec) Entering 0 causes immediate recall.	15
03	<b>Time Limit for Dialing Commands</b> (Dialing Timeout) This option determines how long VM8000 InMail waits for an Automated Attendant caller to dial before routing the call to the Timeout destination. <i>Be sure your Dial Action Tables have a Timeout action programmed.</i> If the caller waits too long to dial: <i>When the associated Dial Action Table has a Timeout action programmed, the caller routes to that destination.</i> <i>When the associated Dial Action Table does not have a Timeout action programmed, the Instruction Menu repeats three times and then VM8000 InMail hangs up.</i>	0~99 (sec) Entering 0 causes the Automated Attendant to immediately route callers to the Timeout destination programmed in the active Dial Action Table.	5

**Input Data**

Item No.	Item	Input Data	Default
04	<b>Fax Detection</b> Use this option to enable or disable Fax Detection for the Call Routing Mailbox. If enabled, the VM8000 InMail Automated Attendant (when using this Call Routing Mailbox) detects incoming fax CNG tone. The fax call then routes to the company fax machine according to the setting of 47-01-06 : <i>Fax Extension</i> . If disabled, the Automated Attendant does not detect incoming fax calls.	0 = No (Disabled) 1 = Yes (Enabled)	0
05	<b>Fax Extension</b>	Up to eight digits	No entry

**Conditions**

None

---

**Feature Cross Reference**

None

## Program 47 : InMail

### **47-09 : Announcement Mailbox Options**

**Level:**

IN

#### Description

Use **47-09 : Announcement Mailbox Options** to set the options for mailboxes assigned as Announcement Mailboxes in **47-07-02 : Routing Mailbox Type**.

#### Input Data

Routing Mailbox Number	1~32
------------------------	------

#### Input Data

Item No.	Item	Input Data	Default
01	<b>Next Call Routing Mailbox</b> (Next CR Mbox) If you set up an Announcement Mailbox to answer Automated Attendant calls, use this option to provide additional routing options to the Automated Attendant callers. This option interacts with <i>Repeat Count</i> and <i>Hang Up After</i> below. For more detail on this interaction, refer to Direct Announcement Mailbox Routing and Routed Announcement Mailbox Routing in the VM8000 InMail System Guide.	Call Routing Mailbox Number (1~32) 0 = Undefined	0
02	<b>Repeat Count</b> Enter the number of times you want the Announcement Mailbox message to repeat to callers. After an Announcement Mailbox caller initially listens to the message, it repeats the number of times specified in this option. This option interacts with <i>Next Call Routing Mailbox</i> and <i>Hang Up After</i> when providing routing options. For more detail on this interaction, refer to Direct Announcement Mailbox Routing and Routed Announcement Mailbox Routing in the VM8000 InMail System Guide.	0 (No Repeats) 1~10 (Announcement repeats 1~10 times)	0

**Input Data**

Item No.	Item	Input Data	Default
03	<b>Hang Up After</b> (HangUp) Use this option along with <i>Next Call Routing Mailbox</i> and <i>Repeat Count</i> above to provide additional routing options to Automated Attendant callers. For more detail on this interaction, refer to Direct Announcement Mailbox Routing and Routed Announcement Mailbox Routing in the VM8000 InMail System Guide.	0 = None 1 = Goodbye 2 = Silent	0

## Program 47 : InMail

### **47-11 : VM8000 InMail Answer Table Options**

**Level:**

IN

---

#### Description

Use **47-11 : VM8000 InMail Answer Table Options** to set options for the Answer Tables. VM8000 InMail provides eight Answer Tables (1~8). To set up the schedules for each Answer Table, go to **47-12 : VM8000 InMail Answer Table Schedule**.

#### Input Data

Answer Table Number	1~8
---------------------	-----

#### Input Data

Item No.	Item	Input Data	Default
01	<b>Answer Schedule Override</b> (Schedule Override)  Use this option to enable or disable Answer Schedule Override for the selected Answer Table. If enabled (and you make an entry for <i>Override Mailbox</i> below), the active Answer Table routes calls to the Override Mailbox.	0 = No (Disabled) 1 = Yes (Enabled)	0

### Input Data (Continued)

Item No.	Item	Input Data	Default
02	<p><b>Override Mailbox Category</b> (Override MB Ctg)</p> <p>Use this option to specify the category of the mailbox where Automated Attendant calls should route when you enable Answer Schedule Override. VM8000 InMail mailbox categories are Subscriber Mailbox, Master Mailbox, and Routing Mailbox.</p> <p>VM8000 InMail handles the routing according to the type of mailbox (Subscriber, Call Routing, or Announcement) within the specified category:</p> <ul style="list-style-type: none"> <li>○ If the Override Mailbox is a Subscriber Mailbox, the outside caller hears the mailbox greeting (if recorded) and can leave a message.</li> <li>○ If the Override Mailbox is an Announcement Mailbox, the outside caller hears the recorded announcement. Depending on how the Announcement Mailbox is programmed, VM8000 InMail then hangs up, reroutes the call, or provides additional dialing options.</li> <li>○ If the Override Mailbox is a Call Routing Mailbox, the outside caller hears the instruction menu and can dial any option allowed by the associated Dial Action Table.</li> </ul> <p> If any of the Input Data values are entered, the terminal displays the <b>Override Mailbox Number</b> selection (below).</p>	0 (Undefined) 1 (Subscriber Mailbox – STA) 2 (Group Mailbox) 3 (Routing Mailbox)	0
	<p><b>Override Mailbox Number</b> (Override MB Num)</p> <p>Use this option to specify the mailbox where Automated Attendant calls should route when you enable Answer Schedule Override. The mailbox number you select in this option should match the mailbox category specified in <b>47-11-02: Override Mailbox Category</b> above.</p>	Digits (three maximum, using 0~9)	No Entry

### Input Data (Continued)

Item No.	Item	Input Data	Default
03	<p><b>Default Mailbox Category</b>            (Default MB Ctg)</p> <p>Use this option to specify the category of mailbox used as the Default Mailbox. VM8000 InMail mailbox categories are Subscriber Mailbox, Master Mailbox, and Routing Mailbox. VM8000 InMail uses the Default Mailbox when an Answer Schedule is not in effect.</p> <p>VM8000 InMail handles the routing according to the type of mailbox (Subscriber, Call Routing, or Announcement) within the specified category:</p> <ul style="list-style-type: none"> <li>○ If the Default Mailbox is a Subscriber Mailbox, the outside caller hears the mailbox greeting (if recorded) and can leave a message.</li> <li>○ If the Default Mailbox is an Announcement Mailbox, the outside caller hears the recorded announcement. Depending on how the Announcement Mailbox is programmed, VM8000 InMail then hangs up, reroutes the call, or provides additional dialing options.</li> <li>○ If the Default Mailbox is a Call Routing Mailbox, the outside caller hears the instruction menu and can dial any option allowed by the associated Dial Action Table.           <ul style="list-style-type: none"> <li>☞ If any of the Input Data values are entered, the terminal displays the <b>Override Mailbox Number</b> selection (below).</li> </ul> </li> </ul>	0 (Undefined) 1 (Subscriber Mailbox - STA) 2 (Group Mailbox) 3 (Routing Mailbox)	Answer Table 1 = 3 Answer Table 2~8 = 0
	<p><b>Default Mailbox Number</b>            (Default MB Num)</p> <p>Use this option to set the Answer Table Default Mailbox number. VM8000 InMail uses the Default Mailbox when an Answer Schedule is not in effect. By default, this occurs at all times other than Monday through Friday from 8:30 AM to 5:00 PM.</p>	Digits (Three maximum, using 0~9)	Answer Table 1 = 1 Answer Table 2~8 = No Entry
04	<p><b>Next Answer Table</b></p> <p>When 10 Answer Schedules in an Answer Table are not sufficient, use this option to link two Answer Tables together. VM8000 InMail treats the two linked tables as a single 20 entry Answer Table.</p>	Answer Table (1~8) 0 = Undefined	0

**Conditions**

---

**Feature Cross Reference**

None

## Program 47 : InMail

### **47-12 : VM8000 InMail Answer Schedules**

**Level:**  
IN

#### Description

Use **47-12 : VM8000 InMail Answer Schedules** to set up the VM8000 InMail Automated Attendant Answer Schedules. There are eight Answer Tables, with up to 10 Answer Schedules in each Answer Table.

#### Input Data

Item No.	Item	Input Data	Default
01	<p><b>Schedule Type</b> (Entryxx Schedule Type)</p> <p>Use this option to assign a Schedule Type to the selected Answer Schedule. The Schedule Type determines how the Answer Schedule answers calls.</p> <p>The schedule can be one of the following types:</p> <ul style="list-style-type: none"> <li><input type="radio"/> <b>1. Day of the Week</b> A Type 1 Answer Schedule runs on a specific day of the week. For this type of schedule, you select:           <ul style="list-style-type: none"> <li>✓ The day of the week the schedule should run.</li> <li>✓ The schedule start time.</li> <li>✓ The schedule end time.</li> <li>✓ The Call Routing or Announcement Mailbox used to answer calls.</li> </ul> </li> <li><input type="radio"/> <b>2. Range of Days</b> A Type 2 Answer Schedule runs for a range of days. For this type of schedule, you select:           <ul style="list-style-type: none"> <li>✓ The day of the week the schedule should start.</li> <li>✓ The day of the week the schedule should stop.</li> <li>✓ The time on the start day the schedule should start.</li> <li>✓ The time on the stop day the schedule should stop.</li> <li>✓ The Call Routing or Announcement Mailbox used to answer the calls.</li> </ul> </li> </ul> <p><i>(continued on next page)</i></p>	0 = Undefined 1 = Day of the Week 2 = Range of Days 3 = Date	Answer Table 1/ Schedule 1 = 2 All other schedules = 0

**Input Data (Continued)**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>
01	<p>(continued from previous page)</p> <p><input type="radio"/> <b>3. Date</b> A type 3 Answer Schedule runs only on a specific day of the year. For this type of schedule, you select:</p> <ul style="list-style-type: none"> <li>✓ The specific date the schedule should run.</li> <li>✓ On the selected date, the time the schedule should start.</li> <li>✓ On the selected date, the time the schedule should stop.</li> <li>✓ The Call Routing or Announcement Mailbox used to answer the calls.</li> </ul>	0 = Undefined 1 = Day of the Week 2 = Range of Days 3 = Date	Answer Table 1/ Schedule 1 = 2 All Other Schedules = 0
02	<b>Answering Mailbox Category</b>  (Entryxx MB Ctg) Use this option to specify the category of mailbox to which Automated Attendant calls should route when the schedule is in effect. VM8000 InMail mailbox categories are Subscriber Mailbox, Master Mailbox, or Routing Mailbox.  VM8000 InMail handles the routing according to the exact type of Subscriber, Master, or Routing Mailbox specified.  If the Answering Mailbox is a Subscriber Mailbox, the outside caller hears the mailbox greeting (if recorded) and can leave a message. If the Answering Mailbox is an Announcement Mailbox, the outside caller hears the recorded announcement. Depending on how the Announcement Mailbox is programmed, VM8000 InMail then hangs up, reroutes the call, or provides additional dialing options.  If the Answering Mailbox is a Call Routing Mailbox, the outside caller hears the instruction menu and can dial any option allowed by the associated Dial Action Table.	0 = Undefined 1 = Subscriber Mailbox - STA 2 = Group Mailbox 3 = Routing Mailbox	3
	<b>Answering Mailbox Number</b>  (Entryxx MB Num) Use this option to set the number of the Answering Mailbox the Automated Attendant uses when the selected schedule is in effect. This mailbox is defined in 47-12-02: Answering Mailbox Category.	Digits (three maximum, using 0~9)	Answer Table 1/ Schedule 1 = 1 All Other Answer Schedules = No Entry

**Input Data (Continued)**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>
03	<b>Day of the Week</b> (Entryxx Day) For Day of the Week (Type 1) Answer Schedules, use this option to select the day of the week the Answer Schedule should be active.	1 = Sunday 2 = Monday 3 = Tuesday 4 = Wednesday 5 = Thursday 6 = Friday 7 = Saturday	1
04	<b>Start Day</b> (Entryxx Start Day) For Range of Days (Type 2) Answer Schedules, use this option to select the day of the week the Answer Schedule should start.	1 = Sunday 2 = Monday 3 = Tuesday 4 = Wednesday 5 = Thursday 6 = Friday 7 = Saturday	1 Answer Table 1/ Schedule 1 = 2 All Other Schedules = 1
05	<b>End Day</b> (Entryxx End Day) For Range of Days (Type 2) Answer Schedules, use this option to select the day of the week the Answer Schedule should end.	1 = Sunday 2 = Monday 3 = Tuesday 4 = Wednesday 5 = Thursday 6 = Friday 7 = Saturday	Answer Table 1/ Schedule 1 = 6 All Other Answer Schedules = 1
06	<b>Date</b> (Entryxx Date) For Date (Type 3) Answer Schedules, use this option to select the date the Answer Schedule should be active.	MMDD For example: - 0101 = January 1 - 1231 = December 31 - 0000 = No date set	0000
07	<b>Schedule Start Time</b> (Entryxx Start Time) Use this option to specify the time the Answer Schedule should start. It applies to Day of the Week (Type 1), Range of Days (Type 2), and Date (Type 3) schedules. (To make a schedule run continuously, make the same entry for 47-12-07: Schedule Start Time and 47-12-08: Schedule End Time.)	HHMM (24-hour clock) For example: - 0130 = 1:30AM - 1700 = 5:00PM	Answer Table 1/ Schedule 1 = 0830 (8:30AM) All other schedules are 0000.
08	<b>Schedule End Time</b> (Entryxx End Time) Use this option to specify the time the Answer Schedule should end. It applies to Day of the Week (Type 1), Range of Days (Type 2), and Date (Type 3) schedules. (To make a schedule run continuously, make the same entry for 47-12-07: Schedule Start Time and 47-12-08: Schedule End Time.)	HHMM (24-hour clock) For example: - 0130 = 1:30AM - 1700 = 5:00PM - 0000 = Undefined	Answer Table 1/ Schedule 1 = 1700 All Other Schedules = 0000

## Example

### **Type 1 (Day of the Week) Answer Schedule Options**

#### **Type 1 (Day of Week) Example**

In this example, Answer Table 1 routes calls as follows:

- Schedule 1 uses Routing Mailbox 2 and runs Sunday from 8:30AM to 5:00PM.
- Schedule 2 uses Subscriber Mailbox 3 and runs Wednesday from 10:30AM to 5:00PM.
- Schedule 3 uses Routing Mailbox 4 and runs Tuesday from 9:00AM to 10:00AM.
- At all other times, routing is handled by the Default Mailbox specified in 47-11-03: Default Mailbox Category and 47-11-03: Default Mailbox Number.

When setting up Answer Tables with multiple types, build the Answer Schedules in the following order:

- Range of Days
- Day of Week
- Date

<b>Type 1 (Day of Week) Example</b>	
<b>Answer Table 1</b>	
<b>Answer Schedule 1</b>	Answer Schedule 1 is a Day of Week schedule that runs Sunday from 8:30AM to 5:00PM.
	47-12-01: Entry01 Schedule Type = 1 47-12-02: Entry01 MB Ctg = 3 47-12-02: Entry01 MB Num = 2 47-12-03: Entry01 Day = 1 47-12-04: Entry01 Start Day = 1 (Entry does not matter) 47-12-05: Entry01 End Day = 1 (Entry does not matter) 47-12-06: Entry01 Date (MMDD) = 0000 (Entry does not matter) 47-12-07: Entry01 Start Time = 0830 (8:30AM) 47-12-08: Entry01 End Time = 1700 (5:00PM)
<b>Answer Schedule 2</b>	Answer Schedule 2 is a Day of Week schedule that runs Wednesday from 10:30AM to 5:00PM.
	47-12-01: Entry01 Schedule Type = 1 47-12-02: Entry01 MB Ctg = 1 47-12-02: Entry01 MB Num = 3 47-12-03: Entry01 Day = 4 47-12-04: Entry01 Start Day = 1 (Entry does not matter) 47-12-05: Entry01 End Day = 1 (Entry does not matter) 47-12-06: Entry01 Date (MMDD) = 0000 (Entry does not matter) 47-12-07: Entry01 Start Time = 1030 (10:30AM) 47-12-08: Entry01 End Time = 1700 (5:00PM)
<b>Answer Schedule 3</b>	Answer Schedule 3 is a Day of Week schedule that runs Tuesday from 9:00AM to 10:00AM.
	47-12-01: Entry01 Schedule Type = 1 47-12-02: Entry01 MB Ctg = 3 47-12-02: Entry01 MB num = 4 47-12-03: Entry01 Day = 3 47-12-04: Entry01 Start Day = 1 (Entry does not matter) 47-12-05: Entry01 End Day = 1 (Entry does not matter) 47-12-06: Entry01 Date (MMDD) = 0000 (Entry does not matter) 47-12-07: Entry01 Start Time = 0900 (9:00AM) 47-12-08: Entry01 End Time = 1000 (10:00PM)

**Type 2 (Range of Days) Answer Schedule Options****Type 2 (Range of Days) Example**

- In this example, Answer Table 1 routes calls as follows:
- Schedule 1 uses Routing Mailbox 1 and runs Sunday through Wednesday from 8:30AM to 5:00PM.
- Schedule 2 uses Routing Mailbox 2 and runs Thursday and Friday from 11:00AM to 1:00PM.
- At all other times, routing is handled by the Default Mailbox specified in 47-11-03: Default Mailbox Category and 47-11-03: Default Mailbox Number.

When setting up Answer Tables with multiple types, build the Answer Schedules in the following order:

- Range of Days
- Day of Week
- Date

<b>Type 2 (Range of Days) Example</b>	
<b>Answer Table 1</b>	
	<b>Answer Schedule 1</b> Answer Schedule 1 is a Range of Days schedule that starts schedule that runs Sunday through Wednesday from 8:30AM to 5:00PM.
	47-12-01: Entry01 Schedule Type = 2 47-12-02: Entry01 MB Ctg = 3 47-12-02: Entry01 MB Num = 1 47-12-03: Entry01 Day = 1 (Entry does not matter) 47-12-04: Entry01 Start Day = 1 (Sunday) 47-12-05: Entry01 End Day = 4 (Wednesday) 47-12-06: Entry01 Date (MMDD) = 0000 (Entry does not matter) 47-12-07: Entry01 Start Time = 0830 (8:30AM) 47-12-08: Entry01 End Time = 1700 (5:00PM)
	<b>Answer Schedule 2</b> Answer Schedule 2 is a Range of Days schedule that runs Thursday and Friday from 11:00AM to 1:00PM.
	47-12-01: Entry01 Schedule Type = 2 47-12-02: Entry01 MB Ctg = 3 47-12-02: Entry01 MB Num = 2 47-12-03: Entry01 Day = 1 (Entry does not matter) 47-12-04: Entry01 Start Day = 4 (Wednesday) 47-12-05: Entry01 End Day = 5 (Thursday) 47-12-06: Entry01 Date (MMDD) = 0000 (Entry does not matter) 47-12-07: Entry01 Start Time = 1100 (11:00AM) 47-12-08: Entry01 End Time = 1300 (1:00PM)

### Type 3 (Date) Answer Schedule Options

#### Type 3 (Date) Example

In this example, Answer Table 1 routes calls as follows:

- Schedule 1 uses Routing Mailbox 1 and runs every day from 8:30AM to 5:00PM.
- Schedule 2 uses Routing Mailbox 9 and runs only on Christmas day from 8:30AM to 5:00PM.
- At all other times, routing is handled by the Default Mailbox specified in 47-11-03: Default Mailbox Category and 47-11-03: Default Mailbox Number.

When setting up Answer Tables with multiple types, build the Answer Schedules in the following order:

- Range of Days
- Day of Week
- Date

Type 3 (Date) Example	
Answer Table 1	
	<b>Answer Schedule 1</b> Answer Schedule 1 is a Range of Days schedule that starts schedule that runs every day from 8:30AM to 5:00PM.
	47-12-01: Entry01 Schedule Type = 2 47-12-02: Entry01 MB Ctg = 3 47-12-02: Entry01 MB Num = 1 47-12-03: Entry01 Day = 1 (Entry does not matter) 47-12-04: Entry01 Start Day = 1 (Sunday) 47-12-05: Entry01 End Day = 1 (Sunday) 47-12-06: Entry01 Date (MMDD) = 0000 (Entry does not matter) 47-12-07: Entry01 Start Time = 0830 (8:30AM) 47-12-08: Entry01 End Time = 1700 (5:00PM)
	<b>Answer Schedule 2</b> Answer Schedule 2 is a Date schedule that runs only on Christmas day from 8:30AM to 5:00PM.
	47-12-01: Entry01 Schedule Type = 3 47-12-02: Entry01 MB Ctg = 3 47-12-02: Entry01 MB Num = 9 47-12-03: Entry01 Day = 1 (Entry does not matter) 47-12-04: Entry01 Start Day = 1 (Entry does not matter) 47-12-05: Entry01 End Day = 1 (Entry does not matter) 47-12-06: Entry01 Date (MMDD) = 1225 (December 25, Christmas day) 47-12-07: Entry01 Start Time = 0830 (8:30AM) 47-12-08: Entry01 End Time = 1700 (5:00PM)

# Program 47 : InMail

## 47-13 : VM8000 InMail Dial Action Tables

**Level:**  
IN

### Description

Use **47-13 : VM8000 InMail Dial Action Tables** to set up the VM8000 InMail Dial Action Tables. The Dial Action Table defines the options than an Automated Attendant caller can dial. A Dial Action Table is associated with a Call Routing Mailbox, which is in turn associated with an Answer Table. When an Answer Table is active, its associated Call Routing Mailbox selects the Dial Action Table which provides dialing options to callers. The illustration below shows how this works in a default VM8000 InMail system. There are 16 Dial Action Tables.

## Dial Action Table Actions

### TRF Action - Screened Transfer (1) (TRF)

Use this action to allow an Automated Attendant caller to place a Screened Transfer to an extension. After an Automated Attendant caller dials an extension, VM8000 InMail calls (screens) the destination to see if the transfer can go through.

If the destination is available, the Automated Attendant rings it. If the destination answers, the call goes through.

If the destination does not answer during a preset interval, is busy, or is in Do Not Disturb, the Automated Attendant does not extend the call. It then provides the caller with additional options.

#### Number Option

Normally, the corresponding Number option should be XXX. Note that the key you choose for this action is the first digit of the called extension number.

For example, to allow callers to place Screened Transfers to extensions 301~399, for key 3 enter TRF for the *Action* and XXX for the corresponding *Number*.

To have Screened Transfer call a specific extension, the corresponding Number option should be that extension number. The caller then dials that single digit to reach the extension.

For example, to have callers dial 8 to reach extension 303, for key 8 enter TRF for the *Action* and 303 for the corresponding *Number*.

### UTRF Action – Unscreened Transfer (2) (UTRF)

Use this action to allow an Automated Attendant caller to place an Unscreened Transfer to an extension. This is similar to telephone system unscreened transfers in which the transferring party immediately extends the call. After an Automated Attendant caller dials an extension, VM8000 InMail transfers the call to the destination and hangs up. Any recalls or additional routing are handled by the telephone system – just as with any other unscreened transfer.

#### Number Option

Normally, the corresponding Number option should be XXX. Note that the key you choose for this action is the first digit of the called extension number.

For example, to allow callers to place Unscreened Transfers to extensions 301~399, for key 3 enter UTRF for the *Action* and XXX for the corresponding *Number*.

To have Unscreened Transfer call a specific extension, the corresponding Number option should be that extension number. The caller then dials that single digit to reach the extension.

For example, to have callers dial 8 to reach extension 303, for key 8 enter UTRF for the *Action* and 303 for the corresponding *Number*.

**REC1 Action – Quick Message With Greeting (3) (REC1)**

Use this action to allow an Automated Attendant caller to leave a Quick Message at an extension. With this action, the caller hears the extension greeting prior to leaving the message.

Number Options

To have the caller leave a quick Message at a specific extension, the corresponding Number option should be the extension number.

To have the caller leave a Quick Message at any caller-dialed extension, the corresponding Number option should be IXXX.

To have the caller leave a Quick Message at a caller-dialed extension in a specific range, the corresponding Number option should be XXX.

For example, to allow callers to leave a Quick Message extensions 301~399, for key 3 enter REC1 for the *Action* and XXX for the corresponding *Number*.

**REC2 Action – Quick Message Without Greeting (4) (REC2)**

Use this action to allow an Automated Attendant caller to leave a Quick Message at an extension. With this action, the caller *does not* hear the extension greeting prior to leaving the message. Instead, the caller hears the voice prompt *Recording* followed by a beep.

Number Option

To have the caller leave a quick Message at a specific extension, the corresponding Number option should be the extension number.

To have the caller leave a Quick Message at any caller-dialed extension, the corresponding Number option should be IXXX.

To have the caller leave a Quick Message at a caller-dialed extension in a specific range, the corresponding Number option should be XXX.

For example, to allow callers to leave a Quick Message extensions 301~399, for key 3 enter REC2 for the *Action* and XXX for the corresponding *Number*.

**LOGON Action – Log Onto Voice Mail (5) (LOGON)**

Use this key action to allow an Automated Attendant caller to log onto Voice Mail. Depending on programming (see *Number Option* below), the caller is logged directly into a Subscriber Mailbox or is prompted to enter a Subscriber Mailbox of their own choosing. **You cannot use the LOGON option with Call Routing and Announcement Mailboxes.**

Number Option

To log directly into a specific Subscriber Mailbox, enter the **mailbox number** in the corresponding Number option.

For example, to have key 4 log directly into Subscriber Mailbox 305, for key 4 enter LOGON for the *Action* and 305 for the corresponding *Number*.

To have VM8000 InMail request Automated Attendant callers to select a Subscriber Mailbox to log into, enter **N** in the corresponding Number option. The key you choose must represent the first digit in the Subscriber Mailbox numbers.

For example, to have the Automated Attendant request callers enter the number of the Subscriber Mailbox where they want to log into, for key 3 enter LOGON for the *Action* and N for the corresponding *Number*. When callers dial 3, they hear, *Please enter your mailbox number*.

To have VM8000 InMail require Automated Attendant callers to enter a Subscriber Mailbox to log into (without playing an announcement), enter **XXX** in the corresponding Number option. The key you choose must represent the first digit in the Subscriber Mailbox numbers.

For example, to allow callers to log onto mailboxes 301~399, for key 3 enter LOGON for the *Action* and XXX for the corresponding *Number*.

To log into **any** valid Subscriber Mailbox, enter **IXXX** in the corresponding Number option.

For example, to allow callers to dial 1 plus any Subscriber Mailbox number to log on, for key 1 enter LOGON for the *Action* and IXXX for the corresponding *Number*.

**Hang Up Action (6) (HNGUP)**

When an Automated Attendant caller presses a key assigned to this action, VM8000 InMail says *Goodbye* and immediately hangs up.

Number Option

No entry is required in the corresponding Number Option.

**GOTO Action – Go to Mailbox (7) (GOTO)**

Use this option to provide Automated Attendant callers with the ability to route to Call Routing and Announcement Mailboxes. For example, a caller can dial a digit for Sales, and then go to the Call Routing or Announcement Mailbox that provides the dialing options and instructions for Sales.

Number Option

To have Automated Attendant callers dial a single digit to go to a Call Routing or Announcement Mailbox, enter the **mailbox number** in the corresponding Number option.

For example, to have key 1 go to Call Routing Mailbox 01, for key 1 enter GOTO for the *Action* and 01 for the corresponding *Number*.

To have VM8000 InMail require Automated Attendant callers to enter a Call Routing or Announcement Mailbox to go to, enter **XXX** in the corresponding Number option. The key you choose must represent the first digit in the mailbox number.

For example, to allow callers to go to mailboxes 000~015, for key 0 enter GOTO for the *Action* and XXX for the corresponding *Number*.

To log into **any** valid Call Routing or Subscriber Mailbox, enter **IXXX** in the corresponding Number option.

For example, to allow callers to dial 1 plus any Call Routing or Announcement Mailbox number to go to, for key 1 enter GOTO for the *Action* and IXXX for the corresponding *Number*.

**UND Action – Undefined Routing (0) (UND)**

Use this key action if you want a key to have no routing (no operation). When an Automated Attendant caller presses an undefined key, they hear, *That is an invalid entry*. The caller can then dial another option.

**Input Data**

Dial Action Table Number	01~16
--------------------------	-------

Key No.	Dial Action Table Action	Additional Data
1	<input type="radio"/> TRF Action - Screened Transfer (1) (TRF)	<input type="radio"/> <b>Digits</b> Entry : <b>0-9, #, and *</b> (8 digits max.) Use Dial Action Table digits to route an Automated Attendant call to a specific location (such as an extension). For example, to set up a TRF Action to route to extension 305, for 3 enter TRF for the <i>Action</i> and 305 for the corresponding <i>Number</i> .
2	<input type="radio"/> UTRF Action - Unscreened Transfer (2) (UTRF)	
3	<input type="radio"/> REC1 Action - Quick Message With Greeting (3) (REC1)	<input type="radio"/> <b>Caller Dialed Digits</b> Entry : <b>X</b> ( <i>Entered by pressing LK2</i> ) Use the X option to route an Automated Attendant call based on digits the caller dials. Each X entry represents one caller-dialed digit. For example, to set up a TRF Action to route to any caller dialed extension in the 301~399 range, for 3 enter TRF for the <i>Action</i> and XXX for the corresponding <i>Number</i> .
4	<input type="radio"/> REC2 Action - Quick Message Without Greeting (4) (REC2)	
5	<input type="radio"/> LOGON Action - Log Onto Voice Mail (5) (LOGON)	<input type="radio"/> <b>Ignore Digits</b> Entry : <b>I</b> ( <i>Entered by pressing LK3</i> ) Use the I option to represent any digit dialed by the Automated Attendant caller that VM8000 InMail ignores for routing. An example of this is REC action assigned to the * key in Dial Action Table 1 by default. The <i>Action</i> is REC2 and the <i>Number</i> is IXXX. This means that a caller can dial * + any mailbox number to leave a Quick Message in that mailbox. VM8000 InMail ignores the first digit dialed by the caller (*), and routes according to the next 3 digits dialed.
6	<input type="radio"/> Hang Up Action (6) (HNGUP)	
7	<input type="radio"/> GOTO Action - Go to Mailbox (7) (GOTO)	<input type="radio"/> <b>No Routing</b> Entry : <b>N</b> ( <i>Entered by pressing LK1</i> ) Use the N option when you want no Automated Attendant routing to automatically occur. This can be used with the LOGON action when you want to prompt the caller to enter a mailbox number. To do this for the # key (for example), for the # key enter LOGON for the <i>Action</i> and N for the corresponding <i>Number</i> . When the caller dials #, they hear, "Please enter the mailbox number. Or, to exit, press the pound key."
8	<input type="radio"/> UND Action - Undefined Routing (0) (UND)	<input type="radio"/> <b>Pause</b> Entry : <b>P</b> ( <i>Entered by pressing LK4</i> ) Use the P option when you want the Automated Attendant to pause while dialing.

## Program 47 : InMail

### *47-15 : Routing Directory Mailbox Options*

**Level:**

IN

#### Description

Use **47-15 : Routing Directory Mailbox Options** to define the Routing Directory Mailbox Options. This data is referred if Program 47-07-02 (Routing Master Mailbox Type) was set to Type 4 (Directory).

#### Input Data

Master Mailbox Number	1~32
-----------------------	------

Item No.	Item	Input Data	Default
01	<b>Minimum Number of Letters Required</b>	1~3	1
02	<b>Directory List Number to Use</b>	1~8	1
03	<b>Name Match</b>	0 = First 1 = Last	0
04	<b>Transfer Option</b>	0 = TRF 1 = UTRF	0
05	<b>Screened Transfer Timeout</b>	0~255	15
06	<b>Time Limit for Dialing Commands</b>	0~99	5
07	<b>Fax Detection</b>	0 = Disable 1 = Enable	0
08	<b>Next Call Routing Mailbox</b>	0~32	0
09	<b>Fax Extension</b>	Up to eight digits	No entry

#### Conditions

None

#### Feature Cross Reference

None

## Program 47 : InMail

### 47-16 : InMail Language License

**Level:**  
IN

#### Description

Use 47-16 : InMail Language License to define the language order InMail uses. Depending on the language license number, InMail uses the languages defined starting from Language 1. For example, if the system has a two language license InMail uses the language defined as Language 1 and 2 in the provided default table.

#### Input Data

Language	1~20
----------	------

Item No.	Item	Input Data	Default
01	Language License	01 = US English	Refer to <a href="#">Table 2-13 47-16-01 Default Table</a>
		02 = UK English	
		03 = Australian English	
		04 = French Canadian	
		05 = Dutch	
		06 = Mexican Spanish	
		07 = Latin American Spanish	
		08 = Italian	
		09 = German	
		10 = Madrid Spanish	
		11 = Norwegian	
		12 = Parisian French	
		13 = Brazilian Portuguese	
		14 = Japanese	
		15 = Mandarin Chinese	
		16 = Korean	
		17 = Reserved	
		18 = Reserved	
		19 = Reserved	
		20 = Flexible	

**Table 2-13 47-16-01 Default Table**

Language No.	47-16-01 Default
Language 1	01 (US English)
Language 2	04 (French Canadian)
Language 3	06 (Mexican Spanish)
Language 4	00 (No entry)
Language 5	00 (No entry)

# Program 47 : InMail

## 47-17 : Routing Distribution Mailbox Options

Level:  
IN

### Description

Use **47-17 : Routing Distribution Mailbox Options** to assign data when Program 47-07-02 is set to 4 (Distribution).

### Input Data

Routing Mailbox Number	1~32
------------------------	------

### Input Data

Entry Number	1~20
--------------	------

Item No.	Item	Input Data	Default
01	<b>Distribution Mailbox Category</b> Use Undefined (0) to skip Mailbox Number setting. Use Station Mailbox (1) for setting Mailbox Number to 1~512 (PRG 47-02). Use Group Number (2) for setting Group Mailbox (1~32) (PRG 47-03).	0 = Undefined 1 = Station Mailbox 2 = Group Mailbox	
	<b>Distribution Mailbox Number</b>	Up to three digits	

### Conditions

None

### Feature Cross Reference

# Program 50 : Common Channel Interoffice Signaling Service

## 50-01 : CCIS System Setting

Level:  
IN

### Description

Use **Program 50-01 : CCIS System Setting** to set the availability of CCIS in the UNIVERGE SV8100. No other CCIS settings function if this program is disabled.

### Input Data

Item No.	Item	Input Data	Default
01	CCIS Availability	0 = Disable 1 = Enable	0

### Conditions

None

### Feature Cross Reference

None

Program

50

## Program 50 : Common Channel Interoffice Signaling Service

### 50-02 : Connecting System Settings

**Level:**

IN

#### Description

Use **Program 50-02 : Connecting System Settings** to define the settings for each CCIS Route ID.

#### Input Data

CCIS Route ID	Route ID 1~8: CCIS via DTI Route ID 9: CCIS via IAD/CD-PVAA (IP-CCIS)
---------------	--

Item No.	Item	Description	Input Data	Default
01	<b>Port Number of Common Signaling Channel (T1)</b>	Specify the Trunk port to send D-channel information. This program is available for using DTI package.	0~200	0
02	<b>Common Signaling Channel Data Speed Assignment (T1)</b>	Assign the baud rate of Common Signaling Channel on DTI package.	0 = 64Kbps 1 = 56Kbps 2 = 48Kbps(1) 3 = 48Kbps(2)	1
03	<b>Originating Point Code</b>	Assign the Point Code of own side.	0~16367	0
04	<b>Destination Point Code (T1)</b>	Assign the Point Code of destination side on the DTI link.	0~16367	0
05	<b>Calling Name Indication (T1)</b>	Calling name indication does not send to destination party if switch is turned to Disable.	0 = Disable 1 = Enable	1
06	<b>--- Not Used ---</b>			

**Conditions**

- If 56K K-CCIS is used, 24 Multi-Frame (ESF) must be assigned in Program 10-03-02.
- DPC must be what the OPC is on the opposite side of the link.

None

## Program 50 : Common Channel Interoffice Signaling Service

### 50-03 : CCIS Destination System Settings

**Level:**

IN

#### Description

Use **Program 50-03 : CCIS Destination System Settings** to assign information of remote systems in a CCIS Network.

#### Input Data

CCIS System ID	1~255
----------------	-------

Item No.	Item	Description	Input Data	Default
01	<b>Destination Point Code</b>	Define the Point Code at the Destination Party.	0~16367	0
02	<b>CCIS Route ID (T1 only)</b>	Select the CCIS Route ID defined in Program 14-13 when the user tries to access the system in a CCIS network.	0~8 (CCIS Route IDs 5~8 are for future use and should not be used.)	0
03	<b>IP Address (IP only)</b>	Assign the IP Address to a CCIS System ID.	xxx.xxx.xxx.xxx (xxx = 0~255)	0.0.0.0
04	<b>Point Code Availability</b>	Define if the system associated with Destination Code can be Reached (1) or Not Reach (0). If set to 0 (Disable), when using the IP-CCIS that system will not be able to be called until it is set to 1 (Enable).	0:Disable 1:Enable	1

#### Conditions

None

### 50-09 : CCIS Centralized BLF Sending Extension Number Assignment

Level:

IN

#### Description

Use **Program 50-09 : CCIS Centralized BLF Sending Extension Number Assignment** to define the extension number for sending BLF messages. One extension number can have a sending switch for each sending group, which is defined in Program 50-08.

#### Input Data

Item No.	Item	Input Data	Default	Description
01	<b>Extension Number</b>	xxxxxxxx (up to 8 digits)	No Setting	Extension number. BLF message is indicated when the status of the specified extension number is changed.
02	<b>Send to Sending Group 1</b>	0 = Disable 1 = Enable	0	Enable (0) or Disable (1) the ability to send the BLF to Send Group 1 assigned in PRG 50-08-XX.
03	<b>Send to Sending Group 2</b>	0 = Disable 1 = Enable	0	Enable (0) or Disable (1) the ability to send the BLF to Send Group 2 assigned in PRG 50-08-XX.
04	<b>Send to Sending Group 3</b>	0 = Disable 1 = Enable	0	Enable (0) or Disable (1) the ability to send the BLF to Send Group 3 assigned in PRG 50-08-XX.
05	<b>Send to Sending Group 4</b>	0 = Disable 1 = Enable	0	Enable (0) or Disable (1) the ability to send the BLF to Send Group 4 assigned in PRG 50-08-XX.
06	<b>Send to Sending Group 5</b>	0 = Disable 1 = Enable	0	Enable (0) or Disable (1) the ability to send the BLF to Send Group 5 assigned in PRG 50-08-XX.

**Input Data**

Item No.	Item	Input Data	Default	Description
07	<b>Send to Sending Group 6</b>	0 = Disable 1 = Enable	0	Enable (0) or Disable (1) the ability to send the BLF to Send Group 6 assigned in PRG 50-08-XX.
08	<b>Send to Sending Group 7</b>	0 = Disable 1 = Enable	0	Enable (0) or Disable (1) the ability to send the BLF to Send Group 7 assigned in PRG 50-08-XX.
09	<b>Send to Sending Group 8</b>	0 = Disable 1 = Enable	0	Enable (0) or Disable (1) the ability to send the BLF to Send Group 8 assigned in PRG 50-08-XX.

## Program 50 : Common Channel Interoffice Signaling Service

### 50-11 : CCIS Centralized Day/Night Switching Sending Group Assignment

Level:

IN

#### Description

Use **Program 50-11 : CCIS Centralized Day/Night Switching Sending Group Assignment** to define Point Code and CCIS Route ID for sending Day/Night Switching message.

#### Input Data

Item No.	Item	Input Data	Default	Description
01	Destination Point Code	0~16367	0	Define the Point Code for Day/Night Switching.
02	CCIS Route ID	0~8	0	Define the CCIS Route ID to send Day/Night Switching messages. (T1 only)

# Program 51 : Cygnus-Link Service

## 51-01 : Cygnus-Link System Property Setting

Level:  
IN

### Description

Use **Program 51-01 : Cygnus-Link System Property Setting** to define the parameters of the Cygnus-Link feature.

- ☞ **Each system must be set with its own information.**
- ☞ **When the Cygnus-Link System ID is changed (Item 01), the system must be reset.**

### Input Data

Item No.	Item	Input Data	Default
01	<b>Cygnus-Link System ID</b> This is the ID of each Cygnus-Link system. Setting should insure that no overlap occurs between nodes.	0~50 (0 = No operation)	0
02	<b>Primary Candidate Order</b> <b>???</b>	1~50	30
03	<b>???</b>

# Program 80 : Basic Hardware Setup for System

## 80-02 : DTMF Tone Setup

Level:  
IN

### Description

Use **Program 80-02 : DTMF Tone Setup** to define the duration (on time) and pause (off time) for DTMF dialing. This option affects all trunk line calls system wide. Make separate entries for duration and pause. It is also possible to adjust the level of both high and low frequency tone.

Item No.	Item	Input Data	Default
01	<b>Duration</b>	1~255	5 (100 ms)
02	<b>Pause</b>	1~255	
03	<b>Tone Level (Low) (dB)</b>	1~97 -45 : +3	79 (-6dB)
04	<b>Tone Level (High)</b>	1~97 -45 : +3	83 (-4dB)

# Program 81 : Basic Hardware Setup for Trunk

## *81-03 : ODT Initial Data Setup*

**Level:**

**MF**

### Description

Use **Program 81-03 : ODT Initial Data Setup** to define the various basic timers for the E&M Tie Line Unit.

Item	Name	Input Data	Default
01	<b>PCM Method Type</b>	0 = u-law 1= A-law	0 (u-law)
02	<b>Answer Signal Time</b>	1~255 (10~2550ms)	6 (60ms)
03	<b>Clear Signal (Open Loop) Detection Time</b>	1~255 (100~2550ms)	7 (700ms)
04	<b>Ringing Signal Detection Minimum Time</b>	1~255 (10~2550ms)	10 (100ms)
05	<b>Ringing Signal Stop Detection Time</b>	1~255 (100~2550ms)	7 (700ms)
06	<b>Hook Flash Time</b>	1~255 (10~2040ms)	20 (200ms)
07	<b>Pause Time</b>	1~255 (60~15300ms)	50 (3000ms)
08	<b>WINK/DELAY Duration Time</b>	1~255 (10~2550ms)	20 (200ms)
09	<b>Incoming-WINK/DELAY Send Time</b>	1~255 (100~2550ms)	3 (300ms)
10	<b>Seizure-WINK/DELAY Receive Max. Time</b>	1~255 (100~2550ms)	48 (4800ms)
11	<b>Receive WINK/DELAY Duration Min. Time</b>	1~255 (10~2550ms)	13 (130ms)
12	<b>Receive WINK/DELAY Duration Max. Time</b>	1~255 (10~2550ms)	31 (310ms)
13	<b>Receive DP Make Minimum Time</b>	1~255 (2~510ms)	5 (10ms)

14	<b>Receive DP Make Maximum Time</b>	1~255 (2~510ms)	50 (100ms)
15	<b>Receive DP Break Minimum Time</b>	1~255 (2~510ms)	5 (10ms)
16	<b>Receive DP Break Maximum Time</b>	1~255 (2~510ms)	50 (100ms)
17	<b>Pause Time after WINK/DELAY Receive</b>	1~255 (8~2040ms)	13 (104ms)
18	<b>Loop Off Guard Time</b>	0~255 (0,100~25500ms)	20 (2000ms)
19	<b>DP Break Time (10pps)</b>	1~255 (2~512ms)	32 (64ms)
20	<b>DP Make Time (10pps)</b>	1~255 (2~512ms)	16 (32ms)
21	<b>DP Inter-digit Time (10pps)</b>	1~255 (32~8160ms)	19 (608ms)
22	<b>DP Break Time (20pps)</b>	1~255 (2~510ms)	16 (32ms)
23	<b>DP Make Time (20pps)</b>	1~255 (2~510ms)	8 (16ms)
24	<b>DP Inter-digit Time (20pps)</b>	1~255 (32~8160ms)	16 (512ms)

## *81-05 : ISDN BRI & PRI Layer 2 (T-Point) Initial Data Setup*

**Level:**

**MF**

### Description

Use **Program 81-05 : ISDN BRI & PRI Layer 2 (T-Point) Initial Data Setup** to define the various basic data for layer 2 of ISDN BRI and PRI.

Item No.	Item	Description	Input Data	Default
01	<b>Timer T200</b>	Specifies the timer value in 1/100ths of a second at the end of which transmission of a frame may be initiated.	1~255 (100~25500ms)	10 (1 sec)
02	<b>Timer T201</b>	Specifies the minimum time in 1/100ths of a second between retransmissions of the TEI Identity check messages.	1~255 (100~25500ms)	10 (1 sec)
03	<b>Timer T202</b>	Specifies the minimum time in 1/100ths of a second between retransmissions of the TEI Identity check messages.	1~255 (100~25500ms)	20 (2 sec)
04	<b>Timer T203</b>	Specifies the maximum time in 1/100ths of a second allowed without exchanging frames.	1~255 (100~25500ms)	250 (25 sec)
05	<b>N200</b>	Specifies the retransmission count.	1~255	3
06	<b>N201</b>	Specifies the frame lengths in ocelots.	1~65535 (Byte)	260
07	<b>N202</b>	Specifies the maximum number of transmissions from a TEI identity request message when the user requests a TEI.	1~255	3

# Program 81 : Basic Hardware Setup for Trunk

## *81-06 : ISDN BRI & PRI Layer 3 (T-Point) Timer Setup*

**Level:**  
MF

### Description

Use **Program 81-06 : ISDN BRI & PRI Layer 3 (T-Point) Timer Setup** to define the various basic timers for layer 3 of ISDN BRI/PRI (defined in Program 10-03-04).

#### Input Data

Layer 3 Timer Type Number	1~5
---------------------------	-----

Item No.	Item	Description	Input Data	Default
01	T301	Specifies the timer value in 1/100ths of a second of the timer to be started when the ALERT message is received.	0,180~254 (sec)	180 (sec)
02	T302	Specifies the timer value in 1/100ths of a second of the timer to be started when the SETUP ACK is sent. Timer is also restarted when INFO is received.	1~254 (sec)	15 (sec)
03	T303	Specifies the timer value in 1/100ths of a second of the timer to be started when SETUP is sent.	1~254 (sec)	4 (sec)
04	T304	Specifies the timer value in 1/100ths of a second of the timer to be started when the SETUP ACK is received. Timer is also restarted when INFO is received.	0~254 (sec)	30 (sec)
05	T305	Specifies the timer value in 1/100ths of a second of the timer to be started when DISC without progress No. 8 is sent.	1~254 (sec)	30 (sec)
06	T306	Specifies the timer value in 1/100ths of a second of the timer to be started when DISC with progress indicator No. 8 is sent. This timer is valid for Network side use only.	0~254 (sec)	30 (sec)
07	T307	Specifies the timer value in 1/100ths of a second of the timer to be started when SUSPEND ACK is sent. This timer is valid for Network side use only.	1~254 (sec)	180 (sec)

<b>Item No.</b>	<b>Item</b>	<b>Description</b>	<b>Input Data</b>	<b>Default</b>
08	<b>T308</b>	Specifies the timer value in 1/100ths of a second of the timer to be started when REL is sent.	1~254 (sec)	4 (sec)
09	<b>T309</b>	Specifies the timer value in 1/100ths of a second upon data link disconnection.	1~254 (sec)	90 (sec)
10	<b>T310</b>	Specifies the timer value in 1/100ths of a second of the timer to be started when CALL PROC is sent.	0~180 (sec)	180 (sec)
11	<b>T312</b>	Specifies the timer value in 1/100ths of a second of the timer to be started when SETUP is sent or re-sent on broadcast data link. This timer is only valid for Network side use only.	1~254 (sec)	6 (sec)
12	<b>T313</b>	Specifies the timer value in 1/100ths of a second of the timer to be started when connection request is sent. Valid range 1 ~ 4 seconds in 1 second increments. Value of 0 indicates timer not used.	1~254 (sec)	4 (sec)
13	<b>T314</b>	Specifies the timer value in 1/100ths of a second of the timer to be started when message segment is received.	1~254 (sec)	4 (sec)
14	<b>T316</b>	Specifies the timer value in 1/100ths of a second of the timer to be started when RESTART is sent.	(T317+1)~254 (sec)	120 (sec)
15	<b>T317</b>	Specifies the timer value in 1/100ths of a second of the timer to be started when RESTART is received.	1~(T316-1)	60 (sec)
16	<b>T318</b>	Specifies the timer value in 1/100ths of a second of the timer to be started when RES is sent. This timer is valid for user side use only.	1~254 (sec)	4 (sec)
17	<b>T319</b>	Specifies the timer value in 1/100ths of a second of the timer to be started when SUSPEND is sent. This timer is valid for user side use only.	1~254 (sec)	4 (sec)
18	<b>T320</b>	Specifies the timer value in 1/100ths of a second when B-channel access: connection is received, or D-channel access: DL-ESTABLISH confirmation or indication is received.	1~254 (sec)	30 (sec)
19	<b>T321</b>	Specifies the timer value in 1/100ths of a second of the timer to be started when STATUS ENQ is received.	1~254 (sec)	30 (sec)
20	<b>T322</b>	Specifies the timer value in 1/100ths of a second upon D-channel failure.	1~254 (sec)	4 (sec)

# Program 81 : Basic Hardware Setup for Trunk

## 81-10 : COT Initial Data Setup

Level:

IN

### Description

Use **Program 81-10 : COT Initial Data Setup** to define the various basic timers for each COT trunk port.

### Input Data

Trunk No.	1~ 200
-----------	--------

Item No.	Item	Input Data	Default
01	<b>DP Interdigit Time Selection</b> The DP Interdigit Time is the minimum pause time between dial pulses. Use this Program to select either Pattern A or pattern B.	0 = Pattern A (Pattern A: 10pps – 650 ms, 20pps – 500 ms) 1 = Pattern B (Pattern B: 10pps – 800 ms, 20pps – 800 ms)	1 (Pattern B)
02	<b>Prepause Time Selection</b> Specifies the loop open time for a hookflash signal sent to the CO or PBX when the Recall key on a multiline terminal is pressed. A Single Line Telephone (SLT) generates a hookflash to the CO or PBX line when a SLT hookflash is assigned.	1~13 (1~13 seconds) (0 = No Setting)	1 (1 sec.)
03	<b>Incoming Signal Detect Time Selection</b> Specifies the time after the incoming signal from another system is detected before the acknowledge signal is sent out.	0~15 (50~800 ms)	3 (200 ms)
04	<b>Disconnect Recognition Time Selection</b> Specifies the minimum time before a disconnected circuit can be accessed again.	1~15 (100 ms~1.5 seconds) (0 = No Setting)	3 (300 ms)
05	<b>Auto Release Signal Detection Time</b> Specifies the signal detection time for release of a CO/PBX line after a disconnect signal is received from the distant CO or PBX.	1~14 (50~700 ms) 15 = ∞ (No limit) (0 = No Setting)	7 (350 ms)
06	<b>Pause Time Selection</b>	1~15 (500~7500 ms)	6 (3000 ms)

Item No.	Item	Input Data	Default
07	<b>Hookflash Time Selection 1</b>	0 = 20 ms 1 = 40 ms 2 = 60 ms 3 = 80 ms 4 = 100 ms 5 = 140 ms 6 = 160 ms 7 = 200 ms 8 = 400 ms 9 = 600 ms 10 = 800 ms 11 = 1.0 seconds 12 = 1.5 seconds 13 = 2.0 seconds 14 = 3.0 seconds 15 = 5.0 seconds	9 (600 ms)
08	<b>Hookflash Time Selection 2</b>	0 = 20 ms 1 = 40 ms 2 = 60 ms 3 = 80 ms 4 = 100 ms 5 = 140 ms 6 = 160 ms 7 = 200 ms 8 = 400 ms 9 = 600 ms 10 = 800 ms 11 = 1.0 seconds 12 = 1.5 seconds 13 = 2.0 seconds 14 = 3.0 seconds 15 = 5.0 seconds	14 (3.0 sec.)

IN

### Description

Use **Program 81-11 : Tie Line Initial Setup** to define the various initial data for DID/TLI/DTI packages.

#### Input Data

Trunk No.	1~ 200
-----------	--------

Item No.	Item	Input Data	Default
01	<b>DP Interdigit Time Selection</b> The DP Interdigit Time is the minimum pause time between dial pulses. Use this Program to select either Pattern A or pattern B.	0 = Pattern A (Pattern A: 10pps – 650 ms, 20pps – 500 ms) 1 = Pattern B (Pattern B: 10pps – 800 ms, 20pps – 800 ms)	1
02	<b>Prepulse Time Selection</b> Specifies the loop open time for a hookflash signal sent to the Tie Line when the Recall key on a multiline terminal is pressed. A Single Line Telephone (SLT) generates a hookflash to the Tie Line when a SLT hookflash is assigned.	1~4 (1~4 = 0.5~2.0 seconds) (5~15 = 3.0~13 seconds) (0 = No Setting)	0 (No Setting)
03	<b>Tie Line Answer Detect Time Selection</b> Specifies the time before a UNIVERGE SV8100 system answer (Off-Hook) is recognized as an answer.	0~15 (130 ms~1950 ms) (0 = No Setting)	4 (520 ms)
04	<b>Tie Line Release Detect Time Selection</b> Specifies the circuit disconnect detected on the Tie Line on the distant system side is recognized as Tie Line.	0~15 (130 ms~1950 ms) (0 = No Setting)	4 (520 ms)

Item No.	Item	Input Data	Default
05	<b>Incoming Signal Detect Time Selection</b> Specifies the time after the incoming signal from another system is detected before the acknowledge signal is sent out.	[Wink Start] 1~15 (130 ms~1950 ms) (0 = No Setting)  [Delay] 1~15 (30 ms~450 ms) (0 = No Setting)	[Wink Start] 3 (390 ms)  [Delay] 3 (90 ms)
06	<b>Loop Off-Guard Time Selection</b> Assign loop off-guard time to prevent noise that could cause the system to be unable to answer an incoming Tie line.	1~4 (0.5 sec~2.0 sec) 5~15 (3 sec~13 sec) (0 = No Setting)	4 (2.0 sec)
07	<b>Length of Wink Signal Selection</b> Specifies the time a wink pulse is sent to another system.	0~15 (30 ms~480 ms)	5 (180 ms)
08	<b>Length of Delay Signal Selection</b> Specifies the time a delay pulse is sent to another system.	1~15 (300 ms~4.5 sec) (0 = No Setting)	1 (300 ms)
09	<b>Incoming Interdigit Timeout Selection</b> To specify the time, in seconds, that an address signal is missing during the incoming call detection process before an error tone is returned to the other system.	0 = 8 1~15 (1~15 seconds)	6 (6 seconds)
10	<b>Wink/Delay Signal Detect Timeout Selection</b> To specify a maximum time, in seconds, for receiving an acknowledgment signal from a distant system before sending a busy tone.	0 = 8 1~15 (1~15 seconds)	7 (7 seconds)
11	<b>Disconnect Recognition Time Selection</b> Specifies the minimum time before a disconnected circuit can be accessed again.	1~15 (0.1~1.5 seconds) (0 = No Setting)	3 (0.3 second)
12	<b>Automatic Release Signal Detection Selection</b> Specifies the signal detection time for release of a Tie Line after a disconnect signal is received from the distant CO or PBX.	1~14 (50~700 ms) 15 = ∞ (No limit) (0 = No Setting)	7 (350 ms)
13	<b>Pause Time Selection</b>	1~15 (500~7500 ms)	6 (3000 ms)

Item No.	Item	Input Data	Default
14	<b>Hookflash Time Selection 1</b>	0 = 20 ms 1 = 40 ms 2 = 60 ms 3 = 80 ms 4 = 100 ms 5 = 140 ms 6 = 160 ms 7 = 200 ms 8 = 400 ms 9 = 600 ms 10 = 800 ms 11 = 1.0 seconds 12 = 1.5 seconds 13 = 2.0 seconds 14 = 3.0 seconds 15 = 5.0 seconds	9 (600 ms)
15	<b>Hookflash Time Selection 2</b>	0 = 20 ms 1 = 40 ms 2 = 60 ms 3 = 80 ms 4 = 100 ms 5 = 140 ms 6 = 160 ms 7 = 200 ms 8 = 400 ms 9 = 600 ms 10 = 800 ms 11 = 1.0 seconds 12 = 1.5 seconds 13 = 2.0 seconds 14 = 3.0 seconds 15 = 5.0 seconds	14 (3.0 sec.)

# Program 81 : Basic Hardware Setup for Trunk

## 81-12 : Trunk Pad Level Data Setup

Level:  
MF

### Description

Use **Program 81-12 : Trunk Pad Level Data Setup** to define the various initial data for TLI/DTI/DID/BRT/PRT package.

### Input Data

Trunk Number	1~200
--------------	-------

Item No.	Item	Input Data	Default
01	Internal Transmit Pad Level	0 = +2dB 1 = +4dB 2 = +6dB	3 = +8dB
02	Internal Receive Pad Level	3 = +8dB	3 = +8dB
03	External (tandem) Transmit Pad Level	4 = +12dB 5 = +16dB 6 = +3dB 7 = -3dB	8 = 0dB
04	External (tandem) Receive Pad Level	8 = 0dB	8 = 0dB

## 82-01 : Incoming Ring Tone

Level:

MF

### Description

Use **Program 82-01 : Incoming Ring Tone** to set the incoming ring tones, which are the tones a user hears when a call rings an extension. These tones are grouped into four ring tone *Ranges* (1~4), also called patterns, that consist of a combination of frequencies. (You assign a specific *Range* to trunks in Program 22-03 and to extensions in Program 15-02.) Within each *Range* there are three frequency *Types*: High, Middle and Low. (Service Code 820 allows users to choose the *Type* for their incoming calls.) Each *Type* in turn consists of two frequencies and the modulation played simultaneously to make up the tone. These frequencies are determined by their Frequency Number selected in Items 1 and 2 (see below). In this program, you assign the two *Frequency Numbers* and *Modulation* for each *Type*, for each of the four *Ranges*. The chart below shows the default *Frequency Numbers* for each *Type* in each *Range*.

### Input Data

Incoming Ringing Tone Number	1 = Pattern 1 (Trunk Incoming) 2 = Pattern 2 (Trunk Incoming) 3 = Pattern 3 (Trunk Incoming) 4 = Pattern 4 (Trunk Incoming) 5 = Intercom Incoming Pattern
------------------------------	---

Ringing Tone Type Number	1 = High 2 = Mid 3 = Low
--------------------------	--------------------------------

Item No.	Item	Input Data
01	Frequency 1	1 = 520Hz 2 = 540Hz 3 = 660Hz 4 = 760Hz 5 = 1100Hz 6 = 1400Hz 7 = 2000Hz
02	Frequency 2	

Program

82

Item No.	Item	Input Data
03	Modulation	0 = No Modulation 1 = 8Hz Modulation 2 = 16Hz Modulation 3 = Envelope

**Default**

# Program 84 : Hardware Setup for VoIP

## 84-05 : PVA IP Address Setup

**Level:**  
IN

### Description

Use **Program 84-05 : PVA IP Address Setup** to define the IP Address of the CD-PVAA applications. ([This program is not available with V1000](#))

#### Input Data

Slot Number	01~24
-------------	-------

Item No.	Description	Input Data	Default
01	<b>IP Address</b> Set IP Address of IP Application. The IP Address is increased in accordance with the slot number.	1.0.0.1~126.255.255.254 128.1.0.1~191.254.255.254 192.0.1.1~223.255.254.254	Slot 1 = 172.16.0.20 Slot 2 = 172.16.0.21 Slot 3 = 172.16.0.22 Slot 4 = 172.16.0.23 Slot 5 = 172.16.0.24 Slot 6 = 172.16.0.25 Slot 7 = 172.16.0.26 Slot 8 = 172.16.0.27 Slot 9 = 172.16.0.28 Slot 10 = 172.16.0.29 Slot 11 = 172.16.0.30 Slot 12 = 172.16.0.31 Slot 13 = 172.16.0.32 Slot 14 = 172.16.0.33 Slot 15 = 172.16.0.34 Slot 16 = 172.16.0.35
02	<b>LAN Interface</b> NIC Auto Negotiation	0 = Auto Detect 1 = 100 Mbps, Full Duplex 2 = 100 Mbps, Half Duplex 3 = 10 Mbps, Full Duplex 4 = 10 Mbps, Half Duplex	0
03	<b>Master/Slave</b>	0 = Slave 1 = Master	1

Item No.	Description	Input Data	Default
04	<b>CCIS over IP Subnet Mask</b> Set the Subnet Mask Address of the IP Application.	Slot 1~24	255.255.0.0
05	<b>CCIS over IP Default Gateway</b> Set the Default Gateway of the IP Application.	Slot 1~24	0.0.0.0

**Conditions**

- System programming must be exited before these program options take affect.
- 

**Feature Cross Reference**

# Program 84 : Hardware Setup for VoIP

## 84-06 : PVA Data Setting

**Level:**  
IN

### Description

Use **Program 84-06 : PVA Data Setting** to set up threshold levels of every CD-PVAA slot. ([This Program is not available with V1000](#))

#### Input Data

Slot Number	01~24
-------------	-------

Item No.	Item	Input Data	Default	Description
01	<b>RTP Port Number</b>	0~65535	10020	
02	<b>RTCP Port Number</b>	RTP Port Number + 1	10021	It has to be RTP Port Number + 1.
04	<b>Fract Lost Threshold</b>	0~100%	0	The data is sent to the CD-CP00-US if the value exceeds the defined value.
05	<b>Packets Lost Threshold</b>	0~16777215	0	The data is sent to the CD-CP00-US if the value exceeds the defined value.
07	<b>Jitter Threshold</b>	0~4294967295 (sec)	0	The data is sent to the CD-CP00-US if the value exceeds the defined value.
09	<b>Delay LSR Threshold</b>	0~4294967295	0	The data is sent to the CD-CP00-US if the value exceeds the defined value.
16	<b>IMCP Redirect</b>	0=No 1=Yes	0	The VOIP blade supports sending the Internet Message Control Protocol (IMCP) redirect message.

**Conditions**

- System programming must be exited before these program options take affect.

# Program 84 : Hardware Setup for VoIP

## 84-24 : DT700 Multiline CODEC Basic Information Setup

Level:  
IN

### Description

Use **Program 84-24 : DT700 Multiline CODEC Basic Information Setup** to set the codec of each type of SIP Multiline Telephone.

### Input Data

Type	1 = Type 1 2 = Type 2 3 = Type 3 4 = Type 4 5 = Type 5
------	--

### Input Data

Item No.	Item	Input Data	Default
01	<b>Number of G.711 Audio Frames</b>  Input the amount of audio in the packets when using the G.711 CODEC.	1~4 1 = 10 ms 2 = 20 ms 3 = 30 ms 4 = 40 ms	3
02	<b>G.711 Voice Activity Detection Mode</b>  Enable or disable if no packets are sent when the system detects silence when using the G.711 CODEC.  Silence is determined by command 84-24-19.	0 = Disable 1 = Enable	0
03	<b>G.711 Type</b>  This decides the G.711 type. In North America, typically u-law is used.	0 = A-law 1 = u-law	1
04	<b>G.711 Jitter Buffer Min</b>	0~160 ms	20
05	<b>G.711 Jitter Buffer Average</b>	0~160 ms	40
06	<b>G.711 Jitter Buffer Max</b>	0~160 ms	80

**Input Data**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>
07	<b>Number of G.729 Audio Frames</b>	1~6 1 = 10 ms 2 = 20 ms 3 = 30 ms 4 = 40 ms 5 = 50 ms 6 = 60 ms	3
08	<b>G.729 Voice Activity Detection Mode</b>  Enable or disable if no packets are sent when the system detects silence when using the G.729 CODEC.  Silence is determined by command 84-24-19.	0 = Disable 1 = Enable	0
09	<b>G729 Jitter Buffer Min</b>	0~270 ms	20
10	<b>G729 Jitter Buffer Average</b>	0~270 ms	40
11	<b>G729 Jitter Buffer Max</b>	0~270 ms	80
17	<b>Jitter Buffer Mode</b>	1 = Static 2 = Adaptive during silence 3 = Adaptive immediate	3
18	<b>Voice Activity Detection Threshold</b>	0~30 (-19db~ +10db) 0 = Self adjustment 1 = -19db (-49dbm) : 20 = 0db (-30dbm) : 29 = 9db (-21dbm) 30 = 10db (-20dbm)	20
19	<b>Idle Noise Level</b>	5000~7000 (-5000dbm~ - 7000dbm)	7000
20	<b>Echo Canceller Mode</b>	0 = Disable 1 = Enable	1
21	<b>Echo Canceller Tail Size</b>	1 = 4 ms 2 = 8 ms 3 = 16 ms 4 = 32 ms 5 = 64 ms 6 = 128 ms	6
22	<b>Echo Canceller NLP Mode</b>	0 = Disable 1 = Enable	1

**Input Data**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>
23	<b>Echo Canceller NLP Noise</b>	40~70 (-40dbm~ -70dbm)	70
24	<b>Echo Canceller CNG Configuration</b>	0 = Adaptive 1 = Fixed	0
26	<b>TX Gain</b>  Input the TX gain from the IPLA to the telephone.	0~40 (-14dbm~+14dbm) 0 = -20dbm 1 = -19dbm : 20 = 0dbm : 39 = 19dbm 40 = 20dbm	20
27	<b>RX Gain</b>  Input the RX gain from the IPLA to the telephone.	0~40 (-14dbm~+14dbm) 0 = -20dbm 1 = -19dbm : 20 = 0dbm : 39 = 19dbm 40 = 20dbm	20
28	<b>Audio Capability Priority</b>	0~3 0 = G.711_PT 2 = G.729_PT 3 = G.722_PT	0
29	<b>Echo Canceller Configuration Type</b>	0~3	0
30	<b>Auto Gain Control</b>	0~5	0
32	<b>G.722 Audio Frame Number</b>	1~4 1 = 10 ms 2 = 20 ms 3 = 30 ms 4 = 40 ms	3
33	<b>G.722 Voice Activity Detection Mode</b>	0 = Disabled 1 = Enabled	0
34	<b>G.722 Jitter Buffer (min)</b>	0~160 ms	30
35	<b>G.722 Jitter Buffer (Average)</b>	0~160 ms	60
36	<b>G.722 Jitter Buffer (max)</b>	0~160 ms	120

## 90-02 : Programming Password Setup

Level:

IN

### Description

Use **Program 90-02 : Programming Password Setup** to set the system passwords. For password entry, the system allows eight users to be defined. Each user can have a:

- Unique alphanumeric name (up to 10 alphanumeric characters)
- Password entry of up to eight digits (using 0~9, # and \*)
- Password level

The IN level password is used by the System Installer for system programming. The SA or SB level password cannot access the IN level programs. The reverse type (white on black) just beneath the Description heading is the program access level. You can only use the program if your access level meets or exceeds the level the program requires. (SA level password can access to SA or SB programs, and SB level password can access to SB programs only.)

#### CAUTION

*Before changing your numbering plan, use the PC Programming or WebPro Programming to make a backup copy of your system data.*

### Input Data

User Number	1~8
-------------	-----

Item No.	Item	Input Data
01	User Name	Maximum 10 characters
02	Password	Up to 8 digits
03	User Level	0 = Prohibited User 1 = MF (Manufacturer Level) 2 = IN (Installer Level) 3 = SA (System Administrator Level 1) 4 = SB (System Administrator Level 2) 5 = UA (User Programming Level 1)

**Default**

User No.	User Name	Password	Level	Level Description
1	necii	47544	1 (MF)	Manufacturer Level - Access to all system programs.
2	tech	12345678	2 (IN)	Installer Level - Access to all IN level programs.
3	ADMIN1	0000	3 (SA)	System Administrator Level 1 - Restricted Access
4	ADMIN2	9999	4 (SB)	System Administrator Level 2 - More Restricted Access
5	USER1	1111	5 (UA)	User Programming Level 1
6	???		5 (UA)	User Programming Level 1
7	???		5 (UA)	User Programming Level 1
8	???		5 (UA)	User Programming Level 1

**Conditions**

- More than one extension can be in the programming mode.

---

**Feature Cross Reference**

None

# Program 90 : Maintenance Program

## 90-03 : Save Data

Level:  
SA

---

### Description

(This program is available only via telephone programming and not through PC Programming).

Use **Program 90-03 : Save Data** to save the programmed data on the USB Flash Drive. This program should be used after changing the programmed data.

#### Input Data

Item No.	Item	Input Data
01	Save Data	Dial <b>1</b> + press <b>Hold</b> (Press <b>Hold</b> to cancel.)

#### Conditions

- When reloading a customer database, the system must be reset (either using Program 90-08 or power down/power up) before all uploaded programming takes affect.

---

### Feature Cross Reference

None

# Program 90 : Maintenance Program

## 90-04 : Load Data

Level:  
SA

### Description

(This program is available only via telephone programming and not through PC Programming).

Use **Program 90-04 : Load Data** to load the system data from the inserted USB Flash Drive to the SRAM and Flash ROM in the system.

#### Input Data

Item No.	Item	Input Data
01	Load Data	Dial 1+ press <b>Hold</b> (Press <b>Hold</b> to cancel.)

#### Conditions

- After uploading the programming, reset the system and wait a few minutes for the system to reset completely before accessing any line or special system feature. Otherwise, some unusual LED indications may be experienced.

### Feature Cross Reference

None

## Program 90 : Maintenance Program

### 90-05 : Slot Control

Level:

IN

---

#### Description

(This program is available only via telephone programming and not through PC Programming).

Use **Program 90-05 : Slot Control** to reset or delete (uninstall) blades (slots 1~24).

Delete allows you to completely uninstall the blade. You should do this if you want to remove a blade and plug it into a different slot and still retain the port assignments. If a different type of interface blade is being installed in a slot previously used (e.g., changing from a LCA to an DLCA blade), the slot should be deleted (option 1) first before installing the new interface blade.

Reset allows you to send a reset code.

#### Input Data

Menu Number	1 = Delete 2 = Reset
-------------	-------------------------

Item No.	Item	Input Data
01	Slot Control	Slot Number (1~24)

#### Conditions

- When you delete or reset a blade, you must first remove it from its slot then run Program 90-05. When reusing the slot for another blade, you must plug the blade in or reset the system before the system can use the slot again.
- When you delete or reset a blade, all related programming in Program 10-03-01 is set back to default.

---

#### Feature Cross Reference

None

SA

### Description

(This program is available only via telephone programming and not through PC Programming).

Use **Program 90-06 : Trunk Control** for trunk maintenance. Busy Out lets you block a blade from placing outgoing calls (just like placing the blade switch down). Once bussed out, none of the ports on the blade can be used for new calls. Existing calls, however, are not torn down.

### Input Data

Menu Number	0 = Set Busy Out 1 = Reset Busy Out (idle)
-------------	---

Item No.	Item	Input Data
01	Trunk Control	Trunk Port Number: 001~200

### Conditions

None

### Feature Cross Reference

None

# Program 90 : Maintenance Program

## 90-07 : Station Control

Level:

SA

---

### Description

(This program is available only via telephone programming and not through PC Programming).

Use **Program 90-07 : Station Control** for extension maintenance.

#### Input Data

Menu Number	1 = Hardware Reset 2 = Software Reset
-------------	--

Item No.	Item	Input Data
01	Extension Control	Extension Number (up to eight digits)

#### Conditions

None

---

### Feature Cross Reference

## 90-08 : System Reset

Level:  
IN

### Description

(This program is available only via telephone programming and not through PC Programming).

Use **Program 90-08 : System Reset** to perform a system reset.

#### Input Data

Item No.	Item	Input Data
01	System Reset	Dial 1 + press <b>Hold</b> (Press <b>Hold</b> key to cancel)

#### Conditions

- After restoring a customer database, the system must be reset using Program 90-08 or by powering down/powering up before all the restored programming takes affect.

### Feature Cross Reference

None

# Program 90 : Maintenance Program

## 90-09 : Automatic System Reset Time Setup

Level:

IN

---

### Description

Use **Program 90-09 : Automatic System Reset Time Setup** to define the time for the system to automatically reset.

#### Input Data

Item No.	Item	Input Data	Default
01	<b>Month</b>	00~12 ( <i>Note 1</i> )	00
02	<b>Day</b>	00~31 ( <i>Note 2</i> )	00
03	<b>Hour</b>	00~23	00
04	<b>Minute</b>	00~59	00

*Note 1 If the Month is set to 00 and Day is set, the system is automatically reset every month on the predefined day.*

*Note 2 If the Day is set to 00 and the Time (Hour and Minute) is set, the system automatically resets every day at the predefined time.*

#### Conditions

None

## 90-10 : System Alarm Setup

**Level:**  
IN

### Description

Use **Program 90-10 : System Alarm Setup** to assign a status to system alarms. You can designate an alarm as Major or Minor. This program also assigns whether or not the alarm is displayed to a multiline terminal and whether or not the alarm information is reported to the pre-defined destination.

#### Input Data

Alarm Number	001~100
--------------	---------

Item No.	Item	Input Data
01	<b>Alarm Type</b>	0 = Not Set 1 = Major Alarm 2 = Minor Alarm
02	<b>Report</b>	0 = Not Report (No autodial) 1 = Report (autodial)

**Table 2-19 Description of Alarm**

Alarm No.	Type	Report	Name	Content of Alarm	Cause	Action	Recovery	Alarm Status
1	2	0	PKG Initialize Error.	1. The PKG failed to initialize. 2. The PKG did not start normally.	1. PKG not inserted firmly. 2. PKG was removed, but not reinserted firmly. 3. Old PKG data still reported due to no initialization.	1. Insert PKG firmly. 2. Insert PKG firmly. 3. Delete slot information in PRG 90-05 and reinsert the PKG.	Upon initialization, the PKG is recognized.	ERR REC
2	2	0		The unit did not step on a regular procedure and it was pulled out. Or, it is not normally inserted.	1.The package is half. 2.The package is out of order.	1.Please insert the package firmly. 2.Please try again after initializing the system data once when LED doesn't blink normally. 3.Exchange of packages.	When the unit is reconfirmed, the error is recovered.	ERR REC

**Table 2-19 Description of Alarm (Continued)**

Alarm No.	Type	Report	Name	Content of Alarm	Cause	Action	Recovery	Alarm Status
3	2	0	Communication fault between CD-CP00-US and other PKGs.	The error occurred when communicating with the package. When the package is broken, it recognizes it as a communication fault.	1.The unit is half. 2.The power-supply voltage of the system is outside ratings. 3.The equipment that generates the noise in the same power supply system as the power supply origin of the system is connected, and it malfunctions because of the power supply noise. 4.The equipment to which it is adjacent to of a main device, and has put out the radiation noise exists, and it malfunctions because of the radiation noise. 5.The chassis is not properly grounded.	1.Please insert the unit firmly. 2.The power-supply voltage must use another power supply when is in the range of ratings or measuring with the voltmeter, and deviating from the rated range. 3.Please use the power supply besides the equipment with the possibility of the noise source. 4.Please separate as much as possible and use a main device from the equipment by which you seem may generate the radiation noise. 5.Please ground the chassis correctly.	When the unit is reconfirmed, the error is recovered.	ERR REC
4	2	0	PKG S/W Download Error	The unit program was not able to be downloaded normally. The unit was not able to be started normally.	The package software is not stored in the downloaded USB memory. The stored package software is illegal. Package information that had been installed before remains.	Delete slot information that corresponds by PRG90-05-01 to delete package information that had been installed before. There is a possibility that the unit program is broken though an external factor of the noise etc. is thought. Please load into the USB memory and try again when you back up the unit program. Please inquire of the manufacturer when not restoring it.	Please exchange units, though it is likely to restore by mounting the unit again. When the unit program is normally downloaded, the error is recovered.	ERR REC
5	0	0	<b>--- Not Used ---</b>					
6	0	0	Blocking	The link of terminals connected with the ESI package came off.	<ul style="list-style-type: none"> <li>• Breakdown of terminal.</li> <li>• Faulty wiring and wiring determination.</li> <li>• External noise.</li> <li>• Breakdown of ESI package.</li> </ul>	Confirm the terminal connected with same ESI. If they work normally, confirm the breakdown or the wiring for the terminal. Exchange the terminal that doesn't work and the working terminal, and confirm it's working. An external factor of the noise etc. is thought. Please reconfirm wiring and the installation,etc. Please inquire of the manufacturer when the problem occurs after it confirms it.	The error is recovered when reconnecting or exchanging it.	ERR REC

**Table 2-19 Description of Alarm (Continued)**

Alarm No.	Type	Report	Name	Content of Alarm	Cause	Action	Recovery	Alarm Status
7	1	0	Power failure	The supply of the commercial power stopped.	<ul style="list-style-type: none"> <li>The power cable came off.</li> <li>• Power failure</li> <li>• The power supply unit broke down.</li> </ul>	Confirm the power supply outlet when the commercial power has not stopped. Please inquire of the manufacturer when the problem occurs.	When the commercial power is restored, the error is recovered.	ERR REC
8	1	0	RAM Backup Battery Error	RAM backup battery on the CD-CP00-US blade is unplugged or defective.		Check the battery connector. If it is connected correctly, replace the battery.	The error is recovered once the battery is replaced.	ERR REC
9	<b>--- Reserved ---</b>							
10	0	0	ISDN Link Error	Layer1 link of ISDN lines came off.	<ul style="list-style-type: none"> <li>Connected determination of main device and ISDN line</li> <li>• Breakdown of DSU</li> <li>• The setting of PRG10-03 is not corresponding to an actual line.</li> </ul>	Confirm the data of PRG10-03. Reconfirm wiring and the installation of DSU. Please inquire of the manufacturer when the problem occurs after it confirms it.	When the connection returns normally, the error is recovered.	ERR REC
11	0	0	CTI Link Error	The link with the CTI server came off.	<ul style="list-style-type: none"> <li>• LAN cable defective.</li> <li>• Connected HUB broken.</li> <li>• The CTI server doesn't start normally.</li> </ul>	Please reconfirm the CTI server, wiring, and the connection. Please inquire of the manufacturer when the problem occurs after it confirms it.	When the connection returns normally, the error is recovered.	ERR REC

## 90-36 : Firmware Update Time Setting

Level:  
IN

### Description

(This program is available only via telephone programming and not through PC Programming).

Use **Program 90-36 : Firmware Update Time Setting** to define the data for the firmware update feature. This data is available to set for the WebPro/PC Programming FW update feature. A compact flash card must be inserted in the CD-CP00-US for this feature.

The following firmware is available to update with this feature:

- main.bin
- Dspdbu.bin
- dsp.bin

Item No.	Item	Input Data	Default	Description
01	Firmware Update Schedule Time	Year: 0~99	0	This Program sets the time to update the firmware using a compact flash card. Time registration fails if an expired time is registered.
		Month: 0~12	0	
		Day: 00~31	0	
		Hour: 00~23	0	
		Minute: 00~59	0	
02	Update mode	0 = Non Active 1 = Activated	0	This Program activates the Firmware Update feature. If this setting is 1, new firmware on the compact flash card updates according to the setting at 90-36-01.

Item No.	Item	Input Data	Default	Description
03	<b>Update Report</b>	256 characters max.	No Setting	This Program outputs a report when the update is executed and saves one copy on the system. If a new update occurs, the new report overwrites the old report. Refer to the <a href="#">Sample Report</a> shown.

### Sample Report

Result	Report Display
Update Success	Update is successful with the Update Time.
Update Fail	Update failed. Drive A (Compact Flash) was not available.
Update Fail	Update failed. The file, main.up, does not exist on drive A.
Update Fail	Update failed. The scheduled time has expired.

**Conditions**

- Using this program to copy a multiline terminal Programmable Function Keys, copies all keys whether or not they exist on the terminal to which the programming is being copied. This may cause confusion when trying to define a key which is already defined but which does not exist on the terminal (displays as DUPLICATE DATA). It is recommend to either clear these non-existent keys or copy only from an extension which has the same or fewer number of keys than the extension to which the programming is being copied.

## Program 92 : Copy Program

### **92-03 : Copy Program by Port Number**

**Level:**

IN

---

#### Description

(This program is available only via telephone programming and not through PC Programming).

Use **Program 92-03 : Copy Program by Port Number** to copy extension and the data of each outside line.

Item No.	Item	Input Data
01	<b>Source Number</b>	Enter the port number from which the data is to be copied.
02	<b>Destination Number (From)</b>	Enter the first port number to which the information is to be copied.
03	<b>Destination Number (To)</b>	Enter the last port number to which the information is to be copied. If the information is only to be copied to one port, enter the information entered in the Destination Number (From) entry.

## 92-06 : Fill Command

Level:  
IN

### Description

Use **Program 92-06 : Fill Command** to allocate the data of each extension number of each extension group or each table.

### Input Data

Program Number	XX-XX
----------------	-------

Item No.	Item	Input Data
01	<b>Source Number</b>	Each extension port = 1~512 (PGM 11-02) Each virtual extension port = 1~256 (PGM 11-04)
02	<b>Destination Number (From)</b>	Each ACI port number = 1~96 (PGM 11-06)
03	<b>Destination Number (To)</b>	Each extension group = 1~64 (PGM 11-07) Each ACI group = 1~64 (PGM 11-08) Each ACD group = 1~64 (PGM 11-17)
